SERVICE—In our various departments from fifty to one hundred competent men and women are actively engaged in serving our customers. Among these are practical experts, specially fitted by training and experience to confer with you on any subject pertaining to our business. Their suggestions or recommendations incur no obligation on your part and may save you needless expense and disappointment. You should take advantage of this service.

WHAT OUR DIAMOND TRADE MARK STANDS FOR. By reason of our business standing and the experience gained by a quarter century of success in serving the growers of the Northwest, we have established trade relations with the world's best producers and sources of supply. Only by such connections is it possible, in the seed trade, to obtain the select true stocks—the best of the season's production; and when you see our DIAMOND Trade Mark on your packet of seeds or item of merchandise you can feel that it is a mark of real quality—THE BEST OBTAINABLE.

OWNING OUR GROUNDS AND BUILDINGS in the business center of Portland—with our house tracks easily accessible to all railroads—places us in the most advantageous position to render prompt, efficient and economical service.

PORTLAND, OREGON

Portland Seed Company's

COMPLETE SEED ANNUAL

For 1917

BIG RETURNS TO GROWERS are indicated for 1917 owing to the shortage and high prices of food supplies in the world's markets, and every available bit of ground should be planted to a marketable crop, or one that will be useful in keeping up the home supply and reducing living expenses.

- VARIETIES: No changes of importance have been made as we do not speculate in novelties but grow and list only varieties that we believe satisfactory and profitable in our territory.
- OREGON GROWN SEEDS AND PLANTS of our own introduction and grown under our supervision have stood the test of open competition in the Coast markets, and are standards of excellence wherever known. Our Seed Potatoes won high honors at the Panama Fair, the best acre yield for the State of California. Shadeland Oats also won a special medal and diploma. Our Broccoli has proven so valuable that a big industry has been developed, specializing on its production here in Oregon. Our New Oregon Strawberry is in such favor by big commercial growers on the Coast that we are unable to supply the demand for plants. Golden West Corn, Oregon Yellow Danvers Onion, Riverside Giant Rhubarb and Oregon Pole Lima Beans are other big successes.
- THE HOME GARDEN: Be sure to plant a home garden, even a small space rotated will produce an astonishing supply of delicious, fresh vegetables of a quality that you can seldom buy, and will reduce your living expenses. The care of your home garden, whether it be vegetable or flower, will prove a healthful and profitable diversion.
- GOOD SEEDS, SQUARE DEALING, RIGHT PRICES and a willingness to anticipate the demands of our trade have developed our present splendid facilities and equipment, and it will be our earnest endeavor to serve you to your satisfaction.

Portland Seed Company

WHEN AND HOW TO ORDER

SEND in your combined orders for seeds, plants, supplies, etc., at once. We are prepared to fill orders as soon as this Catalog reaches you, and if you do not want all sent now we will send part now and the baltance later. The advantage of this is that your order is entered and filled or stock reserved so the complete order, or any part, can be sent upon notice without delay. If you want part or all of your order held, state it distinctly with date when shipment is to be made. All orders for potatoes, plants, and other perishable goods are carefully booked on receipt, and filled in rotation as soon as weather permits. If shipped early, they are at buyer's risk.

- use our order blanks.—Fill out the spaces giving postoffice and shipping point. It is best not to write letters on the same sheet as your order.

 Do not forget to sign your name.
- SEEDS BY MAIL are postpaid in lots of one pound or less of a variety—unless otherwise stated. See parcel post rates for larger lots.
- LARGE ORDERS.—Any dealer, market gardener, institution or individual wishing seed in large quantities, is requested to mail us a list of what is wanted, and we will promptly return it with the very lowest market prices. A letter of inquiry may save you dollars if you want to buy in quantity.
- BY FREIGHT OR EXPRESS.—In ordering vegetable or flower seeds to be sent by freight or express at your expense, deduct postage from single pound postpaid prices.
- PREPAY STATIONS.—When you send in orders to go by freight or express be sure that you add money enough to pay freight charges if your station is a prepay point, which is always the case where there is no regular agent.
- complaints or praises.—If you are well pleased with our goods and the manner of doing business, tell everyone. If you are not, tell us, so we can please you. Our best efforts will be put forth in filling all orders carefully and promptly in a way that will please you.

USE MONEY-ORDERS, POSTOFFICE OR EXPRESS, Bank Drafts or Registered Letters.

DO NOT send personal checks, as your order may be delayed for their collection or identification Stamps will be accepted on small orders.

BE SURE TO ORDER EARLY—BEFORE STOCKS ARE DEPLETED.

NOTE.—We use every precaution in procuring fresh, pure and reliable seeds, etc., but we, in common with other responsible seed houses, sell our goods subject to the following disclaimer, it being that adopted by the American Seed Trade Association, i. e.:—We give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs, nursery stock, roots or plants sent out and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are to be returned at once.—Portland Seed Company

General Notes on Planting and Culture

WE have marked those varieties that mature early with this little Diamond, —our trade-mark. This will aid you in the selections for your home garden.

It you live in Northwestern Oregon or Washington you will have better success with your garden by planting these early maturing varieties after the Spring weather is settled and the ground warm, than if you planted very early, as many seeds will not give the best results in the cold damp of the early Spring, and even if they live, the plants may be stunted and not grow. These suggestions are only general, as you will note that many special sorts can be planted very early.

If you live in the Willamette Valley or Southern Oregon you can plant almost anything as early as the condition of the soil will permit.

Do not work the soil when it is wet, as this has a tendency to make it lump and bake and may put it in such shape that nothing can thrive in it. Wait until it is just dry enough to crumble away nicely when turned over, and if you will press the dirt firmly down on the seeds, getting right in the row and tramping the soil down with your feet — they will germinate quickly even in comparatively dry soil. Any extra work in carefully preparing the soil will more than repay you in the increased results, and always remember that constant and thorough cultivation is almost equal to water and fertilizer both, and will insure a good crop even in a dry season, and on ordinary soil.

New land must be thoroughly broken up and cultivated in order to kill out the wild nature, as new ground in the wooded sections of the Pacific Coast rarely produces bountiful crops the first few seasons without careful culture, fertilizing and rotation.

It pays to fertilize and cultivate to supply ready plant foods to the growing crops, as many years of accumulation of Fir and Pine needles will sour the ground, and until they rot and decay are detrimental to crop growth, but if properly worked and fertilized, good and profitable crops can be harvested from the beginning.

Plan your plantings and keep a garden book or record of some sort, for by so doing you will get the utmost pleasure and profit from your garden and as the seasons pass you will find this record an invaluable aid and reference work. For if you keep a record you will soon learn what varieties are best for your requirements and to know your favorites, and when buying seeds or plants you will know just what to order.

If you are in doubt about what you should do, or want any special information, be sure to write to us. We will be pleased to give your inquiries our careful attention, and advise you to the full extent of our knowledge.

Diamond Quality Seeds are Tested Seeds

TO further guard the interests of our customers and maintain our standard of excellence, we have installed a modern seed laboratory, equipped as recommended by the U.S. Dept. of Agriculture, placing in charge a certified seed analyst. It is here that final tests and inspections are made, and only those seeds that are above the standards are offered to the public, and bear our Diamond Trade Mark - the mark of quality that stamps them as the best obtainable.

We are the only Seed Company maintaining a seed laboratory in Oregon.

ASPARAGUS

Asparagus is one of the earliest Spring vegetables, and would be in universal use were it not for the mis-taken idea that it is difficult to grow. In reality it can be produced very easily and cheaply and is a profitable A bed 15x50 feet, requiring about 100 plants, should give an abundant supply for the average market crop. familu.

CULTURE. - Soak the seeds 24 hours in warm water, and sow early in drills one foot apart. An ounce of seed will sow about 300 feet of drill. Keep the soil mellow and free from weeds. After one year's growth, transplant into permanent beds that have been carefully prepared by working to a depth of 24 inches, manuring transplant into permanent oeus that have oven curejulty prepareu by working to a aepin of 24 inches, manuring deeply, using old manure and bone meal; 5 feet is a convenient width for a bed that will carry three rows, and can be reached without treading upon it. Set the plants about 18 inches apart in the rows and spread the roots out, firming the soil down on them. If your soil is well drained the bed may be level, but if not it must be elevated a little. Give a good dressing of well rotted manure after planting and an occasional application of salt or brine. In the Fall when the foliage turns yellow, cut it off and give a dressing of manure or good commercial fertilizer. A warm, sandy soil is the best, and one which has for some years been cultivated in garden crops and heavily manured is greatly preferred to a fresh soil. But at no period of its growth should the asparagus crop be allowed to lack for manuring. From one to two years' time can be saved by buying roots of us. See plant department 7260 roots will plant an acre.

Argenteuil

A popular French asparagus of great merit; larger and lighter in color and said to be superior to Palmetto; of vigorous, even growth: very early and free from disease.

Pkt., 5c; oz., 15c; 1/4 lb., 35c; 1b., \$1.00

Conover's Colossal

A large and rapid grower of excellent quality. Makes large uniform stalks of finest quality. This is the famous 'Bouldin Island' Asparagus, a superior canning variety, color light green. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 85c

Columbian Mammoth White

A newer, distinct and valuable variety. The stalks are white, of the largest size; very productive and early.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 85c

Palmetto

The favorite green asparagus. Extra early and the uniformly large stalks remain tender longer than other varieties, being in prime condition for some days after coming above the ground. Palmetto is disease resistant, and a heavy, sure cropper.

Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 85c

DIAMOND FRUIT FERTILIZER for ASPARAGUS

ASPARAGUS PLANTS-Four Best Varieties as Above

ONE-YEAR-OLD PLANTS—Postpaid, 25c dozen, 75c per 50, \$1.00 per 100. By express or freight, 20c dozen, 50c per 50, 75c per 100, \$6.00 per 1,000.

TWO-YEAR-OLD PLANTS-Postpaid, 40c per dozen, \$1.00 per 50, \$1.50 per 100. By express or freight, 25c per dozen, 75c per 50, \$1.00 per 100, \$8.00 per 1,000.

Large Green Artichoke Globe

The variety used as a table vegetable. The edible portion is the thick end of leaf of the flower head. Sow early in drills and when about ten inches high transplant into rows four feet apart each way. It will produce only a small crop the first year, but will continue in good bearing five years. Cut before the bud opens. The seedlings are variable and for market gardening they are generally propagated from cuttings.

The buds when in blossom resemble huge thistles and the foliage being highly ornamental, this variety is much used for hedges and display Pkt., 5c; oz., 50c in barkings

Artichoke Jerusalem .-- White.

Distinct from the Globe, belongs to the Sun-flower family. Produces tubers like potato; grown in the same way. A fine vegetable for table and also valuable as hog feed. Price and description under Field Seeds.

BEANS

We offer the following varieties as being best for our western condition as they have given the largest averagyield and are most desirable and profitable for home or market gardens.

CULTURE.—The soil best adapted for growing beans is a light, rich, well-drained loam, which was well manured for the previous crop. If the ground is too freshly manured the plants are apt to run to vines and set few blossoms. Plant in drills about two inches deep and from eighteen inches to two feet apart, as soon as the ground is dry enough and warm—about May 1st, or later, and for succession up to July 15th. Beans are very sensitive to cold and wet before they have sprouted, but are not so liable to be damaged after they are above ground.

Plant about 1 lb. of Dwarf or Bush Beans to 100 ft. of drill, 1 bushel per acre. Pole Beans—1 lb. to 100 hills, requiring about 1/5 bushel per acre. When planted in hills, 21/4 to 3 ft. apart, small varieties such as "Navy" and "Lady Washington" will require from 16 to 25 lbs. per acre; larger sorts running from 25 to 30 lbs. Owing to their short season of growth, from 60 to 80 days, beans generally make a profitable crop for trucking. After harvesting the beans, always plow the vines under to fertilize the soil.

For single ibs. by mail add 10c postage. Larger lots at parcel post rates.

Wax or Yellow Podded Kinds DWARF OR BUSH VARIETIES

Pencil Pod Black Wax

"Pencil Pod" is the most satisfactory of the early dwarf wax Beans.

Of dwarf, bushy growth, about fifteen inches high, large, luxuriant foliage, beneath which in great clusters will be found an enormous crop of beautiful straight yellow pods six to seven inches long, well rounded, deeply "saddle backed," meaty and solid clear through; they are brittle, of rich mild flavor, and entirely stringless. An early sure cropper; of the finest quality.

Pkt., 10c; Ib., 30c; 10 Ibs., \$2.50

Golden Wax

Very hardy and productive. A good second early variety of fine quality, but should be picked young to avoid strings.

Pkt., 10c; lb., 30c; 10 lbs., \$2.50

Davis Wax

Rustless and immensely productive, very hardy and one of the best for market gardeners. The dried bean is kidney-shaped, clear white, and a favorite for baking and canning.

Pkt., 10c; Ib., 30c; 10 lbs., \$2.50

Wardwell's Kidney Wax

Vines are of medium size, with long, flat pods of a delicate, wazy yellow, very brittle and entirely stringless when young. A favorite main crop variety with market men.

Pkt., 10c; lb., 30c; 10 lbs., \$2.50

Improved Black Wax

The standard early market variety, a sure cropper of good quality.

Pkt., 10c; lb., 25c; 10 lbs., \$2.00

For BEANS use 350 lbs. per acre of our

Diamond Vegetable Fertilizer

"Pencil Pod" Black Wax

"DRY BEANS" are a profitable crop. Lady Washington is the standard commercial variety Write us before you plant.

BEANS—Continued

Dwarf or Bush—Green Podded Kind For single lbs. by mail add 10c postage. Larger lots at parcels post rates.

Owing to our mild Winters and cool Summers, locally grown acclimated seed from properly selected strains will be found to give best satisfaction in the Pacific Northwest. We are constantly testing and selecting the most dependable and profitable sorts and increasing our facilities and connections for local production, and when we offer a variety as being suited to your requirements and location you can accept it without fear of disappointment.

In growing Beans commercially, sufficient moisture, freedom from frost from the middle of May to late September, and thorough preparation of the soil with good cultivation, are the requirements for a profitable crop. Closer planting can be practiced where there is plenty of moisture and under dry conditions as too much moisture will not allow the crop to mature properly and close planting will often hasten maturity by absorbing the moisture, growing conditions being favorable.

Anthracnose produces large, scabby, dead spots on the pods and the controlling measures are the selection of clean seed and spraying the plants with Bordeaux Mixture.

Powdery Mildew, showing a white growth of fungus covering the surface of the leaves, especially in rainy or damp weather, should be treated with powdered sulphur.

Cut worms and flea beetles can generally be controlled by the use of "Corona" Arsenate of Lead, either sprayed or dusted on the foliage. Ask for booklet "Garden Pests and their Control."

> Stringless Green Pod Extra Early

The finely shaped, long green pods are absolutely stringless, and are ready to market two weeks earlier than any other green-podded bean. It is of immense value, not only to the market gardener, but also for those who seek early beans of a rare quality for the home table. A splendid dried brown bean. Pkt., 10c; lb., 20c; 10 lbs., \$2.50

Oregon Green Pod

An old time favorite with marketmen and for home use, being of splendid quality, very hardy, and we believe the most prolific of the green-podded bush beans; is a second early, with long straight, handsome pods, well filled with large white beans, mottled red; bears through a long season. In response to the insistent demand from those who are familiar with its merits, we have grown a fine stock and restored this splendid bean to its place in our list.

Pkt., 10c; lb., 30c; 10 lbs., \$2.50

Dwarf Horticultural

Grows erect, strong and snrubby, and is very prolific. The bean is highly prized, green shelled. It is rather large, plump and beautifully mottled yellow and red; one of the most delicious and desirable beans and a great favorite with market gardeners. The dwarf type of the old favorite London Horticultural Pole Bean.

Pkt., 10c; 1b., 25c; 10 lbs., \$2.00

Refugee, or Thousand to One

Of great value on account of its hardiness, vigorous growth and wonderful productiveness. Is not excelled by any other variety as a snap bean, and is considered the best for pickling or canning Beans small, dark purple, veined brown. Pods of perfect form, dark green, veined purple.

Pkt., 10c; lb., 20c; 10 lbs., \$1.75

White Navy

Grown extensively for marketing dry shelled The best known small white bean. Dwarf in growth and very productive.

Crop failure

Canadian Wonder

This spiendid bush bean is the largest, most prolific of the green-podded sorts, and is entirely stringless in its early development. Comes a little later than the New Stringless Green Pod, but continues in bearing throughout the season, and is excellent shelled green.

Pkt., 10c; lb., 25c; 10 lbs., \$2.00

Broad Windsor "Horse Beans"

Stalk erect, strong and shrubby. The bean is large, broad and flat; should be planted early and is best green shelled. A European variety, very hardy and can be planted earlier than other sorts. Grown extensively for stock in some sections.

Pkt., 10c: lb., 15c: 10 lbs., \$1.25

Lady Washington

Sturdy, bushy plant, erect habit, and is a great improvement over the old "Navy," being much earlier, a little larger, and a very heavy yielder; being especially adapted to our Western soils, and is entirely free from disease. Bush attains a height of about fourteen inches, and beans mature in September. Pkt., 10c; Ib., 25c; 10 lbs., \$2.00

Castor Bean

(For Ornamental Varieties see flower seed)

Used for medicinal purposes and by some claimed to keep moles away. Castor beans are very ornamental, the plants and foliage being large and tropical in appearance

Pkt., 10c: lb., 20c

Climbing or Pole Beans

For single lbs. by mail add 10c postage Larger lots at parcel post rates

CULTURE. - Do not plant until the soil has become warm and the weather settled—and always remember beans should have rich, well drained soil. It is best to set the poles before planting; these should be six to eight feet high, rows about four feet each way

Plant four to six beans to the hill and thin to two or three, depending on the variety. If trellis is used, sow in hills about one to two feet apart in the row. A pound should plant 75 to 100 hills. A top dressing of commercial fertilizer or old manure should be worked in when cultivating

Asparagus Bean

The True Asparagus Bean is superior to Kentucky Wonder in quality and fully equal in productiveness. The long, slender pods are very fleshy, almost round, crisp, tender and delicious, of a beautiful pale green color, attractive form and absolutely stringless. No bean equals them either for market or home use. They grow vigorously and bear heavily, the vines being literally covered with great clusters of shapely pods. Asparagus beans are profitable and heavy producers for market or garden, but owing to their fleshy pods are a difficult seed crop to produce and the demand has always exceeded the supply.

Pkt., 10c; 1b., 35c; 10 lbs., \$3.00

Kentucky Wonder

A vigorous climber; very prolific, bearing in clusters extremely long and very fleshy, succulent pods; flat, thick and remarkably tender. A firstclass pole variety.

Pkt., 10c; lb., 25c; 10 lbs., \$2.09

London Horticultural The "Cranberry Pole" Bean

Very desirable for the family garden. vigorous; pods green, streaked with red. large, oval, cream colored, beautifully splashed with red. Has no superior, green, shelled or dry.

Pkt., 10c; lb., 20c; 10 lbs., \$1.50

Lazy Wife

Pods are from four to five inches in length, produced in large clusters in great abundance. Dark green, thick, fleshy and stringless; of unusually rich flavor. Dry beans, pure white; excellent for winter use.

Pkt., 10c; lb., 30c; 10 lbs., \$2.50

Dutch Case Knife

Good corn hill bean; very early; pods long and flat; beans white; used green or dry.

Pkt., 10c; lb., 25c; 10 lbs., \$2.00

Scarlet Runner

A favorite as a shell bean and for its flowers, which are bright scarlet; seeds broad and kidney shaped. Pkt., 10c; lb., 30c; 10 lbs., \$2.50

Oregon Pole Lima

Our Seed Beans and

Peas are

Picked.

Hand

The only Lima Bean that will thrive in our cool climate

Oregon Pole Lima grows a strong, thrifty vine and is very prolific, bearing continuously until frost. the blossoms bursting from the top shoots in long panicles, while the pods can be seen in every stage of development, to the matured beans at the bottom of the vine. Pods are well filled, having three to five large beans of the finest quality. Gather any time after full maturity.

Oregon Pole Lima can be planted in any garden soil as early as April or late as July. Give the same care and culture as other Beans, and they are ready to use when the pods are filled and first begin to ripen. It is not necessary that they should dry on the vines, except for seed.

They are at their best when the full green pods begin to turn yellow

Oregon

Pole Lima

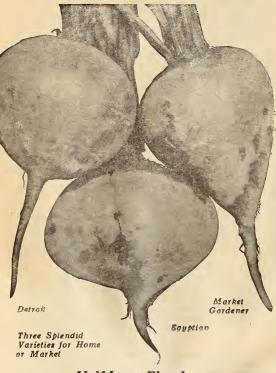

Try "Oregon Pole Lima." It is a wonder, sure to grow, and will produce more fine beans of delicious table quality than any variety we know of.

Price per pkt., 15c; 1/2 lb., 25c; 1 lb., 40c; postpald

BEETS

CULTURE. — The Beet is hardy and may be planted as soon as the ground can be well prepared, doing best in rich, sandy soil, sown in rows sixteen inches apart, covered one and one-half inches deep. The seed will sprout better if soaked twenty-four hours in warm water before planting. Thin out by using the largest ones when they are of sufficient size, continuing until they are six or eight inches apart in the rows. crop, the rows should be far enough apart to permit the use of a horse cultivator.

Half Long Blood

A new variety of excellent quality. One of the very best for Winter use; does not become woody and keeps as well as the long Dark Blood. The root is smooth and handsome, and the flesh is briltiant in color and as good in quality as the best Blood Turnip varieties. Give it a trial.

Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., \$1.15

Diamond VEGETABLE FERTILIZER

600 to 1000 lbs. per acre for Beets-Full information in our free Booklet "Fertilizers."

P. S. Co.'s Market Gardener

This new, extra early Beet is remarkable for its fine quality and rapid growth; it is of deep red color and handsome shape; as an early market sort it is unrivaled. It is to a large extent superseding the Egyptian, being earlier in development, more attractive in appearance and of superior quality for the table.

Pkt., 5c; oz., 15c; 1/4 lb., 40c; lb., \$1.25

Detroit Dark Red Turnip

A fine Beet for bunching for market; tops exceptionally small and uniformly upright. The roots are perfect turnip shape with small taproots. One of the deepest red beets. Quality is of the finest; sweet and tender, best beet for home gardens.

Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., \$1.00

Extra Early Egyptian

The best variety for forcing, and for market gardeners, being very early with small tops. Roots very dark red, rounded on top, but flat beneath, with very small tap roots.

Pkt., 5c; oz., 10c; ½ lb., 30c; lb., \$1.00

Early Eclipse

One of the best early sorts. It possesses all the qualities requisite in a first-class beet, and is of a uniform, globular shape. The roots are a bright, glossy red, fine-grained and delicious. Pkt., 5c; oz., 10c; 1/2 lb., 30c; lb., \$1.00

Early Blood Turnip-Improved

An extra selected stock of blood turnip having larger, coarser tops and roots than the Detroit Dark Red, and requiring a longer time to mature. Excellent for Summer and Autumn use. Pkt., 5c; oz., 10c; 1/2 lb., 30c; lb., \$1.00

Long Smooth Dark Blood

The leading late variety, keeping well all Winter. Should be planted in rich, warm soil to secure rapid growth, which makes them tender. Top small, root long and smooth. Flesh deep purple! fine and sweet.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., \$1.00

Spinach Beet

Swiss Chard or Sea Kale

New Savoyed Leaf "LUCULLUS." derful new sort of "Spinach-Beet," growing about two and a half feet high. The heavy stalks are over an inch thick and bare for more than a foot of their length. The leaves make the finest of "greens." Swiss chard is hardy, easily grown and should be in every garden. It is one of the most delicious of all vegetables.

Pht., Se: on., 15e: 1/ 1b., 50e

SI III COMPANY

BEETS-Continued-MANGEL WURZEL

These are grown extensively for stock feeding, and afford large quantities of fresh, nutritious and wholesome food during the Winter months, in connection with grain and dried forage. Sugar Beets are richer and sweeter than Mangels, but do not produce as heavily.

CULTURE OF MANGEL AND SUGAR BEETS. — Thoroughly fine the soil as good roots cannot be grown in lumpy, poorly prepared ground. The largest crops come from a soil ranging from light to a friable clay loam that has received from eight to fifteen loads of manure to the acre. This can be plowed in or half broadcast and half used in the furrows; a deep plowing in of fresh manure in the Fall is best. It is also necessary to add some commercial fertilizer, but any good soil will grow a fair crop under ordinary culture.

Use 6 to 10 pounds of seed to the acre, depending on whether machine or hand planting is used, planting liberally so that in thinning an even stand can be secured. The rows can be 18 to 30 inches apart, depending upon soil and method of culture. Level culture is best. If planted during dry weather, be sure the seed is in from one to one and one-half inches as it requires lots of moisture to burst the hard shell.

A poor stand and weak germination is often due to improper planting and lack of moisture. Transplanting can be successfully done to fill vacancies. Do this before a shower, and early, breaking off the tops of the larger leaves.

Like all root crops, they require clean culture. Thin early, giving two thinnings and leaving the plants 10 to 12 inches apart. The medium sized roots have the greatest food value.

Forty to sixty tons is a fair yield of Mangels. Sugar Beets, 10 to 13. Beets are easily spoiled even by light freezing and should be cut and stored to protect from frost, covering with a little soil to prevent evaporation.

Yellow Giant, Intermediate, or Gate Post

Roots very large, growing over one-half out of the ground; flesh white, sweet and tender; tops bright green, comparatively small; neck small, short. We think perhaps this is the best of the yellow fleshed beets, because its fine flesh never becomes woody and its roots grow so well out of the ground that the crop is easily harvested. An enormous cropper.

> Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 65c Not postpald, 5 lbs., \$2.50; 10 lbs., \$4.50

Mammoth Long Red

An improvement on the Long Red. It stands head and shoulders above all other varieties of Mangels; unequaled for yielding and feeding qualities. Grows to a very large size, and will yield 50 tons per acre with ordinary cultivation. If you want a large crop of large Mangels of good quality, don't fail to try this sort. Very uniform, smooth and of good shape. Should be grown in deep loose soil.

Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 65c Not postpaid, 5 lbs., \$2.50; 10 lbs., \$4.50

New Mangel Half Sugar

A new variety, more valuable for feeding purposes than the old sorts, it being very much richer. In addition to this, the size and form have been improved until it yields as much per acre as the best Mangels, and twice as much per acre (bulk of roots) as the rich sugar beet. Roots large, very smooth, with few rootlets; creamy white in color, with medium sized tops.

Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 65c Not postpaid. 5 lbc., \$2.50: 10 lbs.. \$4.59

Danish Sludstrup

This new Mangel comes highly recommended. Our seed is direct from the originator. We give his descriptions as follows: Long, reddish-yellow, grows well above the ground, and is easy to pull. Has repeatedly been awarded a first class certificate by the Danish Government and is doubtless the best Mangel in the world.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 70c Not postpald, 5 lbs., \$2.75; 10 lbs., \$4.75

Danish Red Giant Eckendorf

Is of straight, cylindrical form, very blunt, and grows mostly above the surface. Awarded a first-class certificate as a very heavy cropper.

class certificate as a very heavy cropper.

Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 70c
Not postpaid, 5 lbs., \$2.75; 10 lbs., \$4.75

Golden Tankard

Considered indispensable by many dairy farmers. They state that they are able to obtain a higher price for milk when feeding cows on "Golden Tankard." Sheep thrive on it. "Golden Tankard" is of a rich, deep yellow throughout. Early, hardy and a heavy cropper; on account of its shape the roots can be left standing close in rows.

Pkt., 5e; oz., 10e; ½ lb., 25e; lb., 65e Not postpaid, 5 lbs., \$2.50; 10 lbs., \$4.50

Improved Danish Intermediate— Taaroje—Best for Heavy Soils

Large, smooth, oval shaped mangel that grows high above the ground and is easily harvested. For very heavy soils this variety is preferable to the "Sludstrup." The food value is very high, the yield large. Special awards and first-class certificate by the Danish government.

Pkt., 5c; oz., 10c; 3/4 lb., 25c; lb., 70c Not postpald, 5 lbs. \$2.75; 10 lbs., \$4.75

BROCCOLI

or Winter Cauliflower

BROCCOLI is so nearly related to late Cautiflower that the varieties are often listed under both heads—the principle difference being in the hardiness and time of maturity, Broccoli not heading until late Winter or early Spring. Culture is same as for late Cauliflower, and good, rich, well-drained bottom land is best, but well-tilled, well-fertilized upland will produce a good crop.

The St. Valentine Broccoli, which we introduced some years ago, has been extensively grown by commercial planters and a profitable industry established—many carloads being shipped from Oregon each season.

St. Valentine The Finest of All Broccoli

This grand new strain introduced by us is a sure header of immense size, finest quality, and is ready for market in February. The large, solid, handsome, white heads remain in good condition longer than other varieties.

Pkt., 10c; ¼ oz., 50c; oz., \$1.25

Large White French

A valuable variety with large, white heads, firm and of good flavor.

Pkt., 5c; oz., 65c; 1/4 lb., \$1.50

We are the only source of supply of the genuine St. Valentine Broccoli —our seed stock coming direct from the originator.

Brussels Sprouts

The plants, which are very hardy, grow two or three feet high, and produce, from the sides of the stalks numerous little sprouts, which resemble very small cabbages one or two inches in diameter. The leaves should be broken down in the Fall, to give the little heads more room to grow. They should be treated in all respects like Winter cabbage or kale

Odense Market

An improved Danish variety, producing in greatest abundance firm, shapely sprouts, thickly set around the entire stalk; will stand a severe Winter, and is unsurpassed for market or home garden Pkt.. 10c: 0z.. 25c; ½ lb., 75c

Dwarf Improved

A carefully grown strain, very hardy and giving compact, round sprouts of large size and good quality.

Pkt., 5e; oz., 10e; ¼ lb., 35c

LOOK over our BOOK list. An up-to-date Garden Book may save you some money.

Vegetable Plants

Thrifty, well grown, frue to name standard varieties in any quantity for seasons able delivery. See PLANT DEPT.

CULTURE. - The Cauliflower succeeds well in any soil where cabbage will grow but best results are obtained in rich loam with an abundance of water. By sowing early varieties in a hot bed in February or March, or later in a cold frame, fine heads can be obtained quite early. For a later supply, sow seed in a prepared bed in May, choosing a cool, moist place. When large enough, transplant, making the rows about two and a half feet apart and eighteen inches between the plants. In dry seasons the crop must be watered.

P. S. Co.'s "Mt. Hood" Early Snowball

The seed that produces those handsome large white solid heads that bring big profits to the gar-dener. We offer our "Mt. Hood" Cauliflower seed in sealed packets only, under our own label, it having been carefully selected and grown for us by one of the very few expert Cauliflower growers, and is the best strain of "Early Snowball" obtainable. We especially recommend "Mt. Hood" Snowball for either early or late planting.

Pkt., 25c; ½ oz., \$1.50; oz., \$2.50

Early Snowball

Ordinary strain. This is the regular grade of Early Snowball" that is generally offered, and while it will not give as good results as "Mt. Hood," can be depended upon to produce a good crop.

Pkt., 5c; oz., \$2.00; 1/4 lb., \$6.00

Autumn Giant

The heads are white, large, compact and thoroughly protected by foliage.

Pkt., 5c; oz., 75c; 1/4 lb., \$2.00

Danish Giant-Dry weather Cauliflower

"Danish Giant" is an early, large, solid white Cauliflower that can successfully withstand a drouth that would prove fatal to other varieties and will thrive splendidly in dry sections, being peculiarly adapted to their growing conditions, but like all cauliflower must have rich soil and cultivation to give best results. "Danish Giant" can also be grown under moist conditions and is a dependable market variety. If your location is subject to drouth or you are "dry farming," be sure to plant "Danish Giant."

Pkt., 20c; 1/4 oz., 60c; oz., \$2.00; 1/4 lb., \$6.50

Large Algiers

A valuable late sort, sure to head, of the best quality and very popular with market gardeners everywhere. Plants large, but of upright growth, the leaves protecting the heads so that they will endure, uninjured, a frost that would ruin other sorts. One of the very best of the late varieties.

Pkt., 5c; oz., \$1.25; 1/4 lb., \$3.75

RONA DRY" The Universal Insecticide Powder—For the control of garden pests— Used on Cauliflower and Cabbage before Saves them from Cutworms and Chewing Insects. Free Booklet, "Garden Pests."

DON'T BUY cheap strains of Cauliflower Seed. Only the best select strains can be depended upon to produce a big percentage of large, white, solid heads

It is important that the plants should not be crowded in the seed bed, or they will run up weak and slender and be likely to make long stems

P. S. Co. First Crop The Ideal Early Cabbage

The earliest of all pointed varieties and an ideal sort for the private or market gardener

First crop being ten days ahead of any other cabbage, takes but little room, and produces fine, solid heads. We advise all our customers to try this new variety for we believe it is a sterling novelty of the greatest value

Pkt., 5c; oz., 25c; 1/4 lb., 60c

Copenhagen Market A Splendid Cabbage for Home Gardens

A new extra early globe-shaped Cabbage slightly flattened. The large solid heads are very uniform, with few outer leaves, keeps well and stands handling. Copenhagen Market originated in Denmark, where it is the favorite market variety, and we recommend it to our customers as the best early round head. Gardeners should give it a trial. Our stock is direct from the originator.

Pkt., 10c: oz., 25c

Succession

Heads large, slightly flattened; grows low on the stem.

Pkt., 5c; oz., 20c; 1/4 lb., 50c; lb., \$1.50

For Cabbage—

Use 1000 pounds per acre of

DIAMOND FRUIT FERTILIZER

Full information and analyses in our Free Book "Fertilizers"

Early Jersey Wakefield

The favorite Early Cabbage with our market gardeners. A sure header. The thick, stout leaves and compact habit make it the best for Wintering over and very early setting.

Grown more extensively for market than any other early cabbage. Is always of good size, very solid, and has but few outside leaves; a reliable header and always gives good satisfaction.

Pkt., 5c; oz., 20c; 1/4 lb., 50c; lb., \$1.50

seed has so much influence on the quality of the product, and gardeners should always use the best procurable. Second-Rich, well prepared ground Third—Frequent and thorough cultivation. A heavy. moist and rich loam is most suitable, which should be highly manured and worked deeply. Cabbage is univer-sally grown and specific directions regarding the time and method of planting applicable

Early Dwarf Flat Dutch

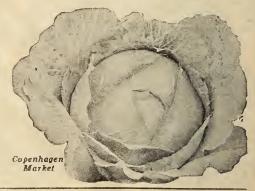

Grows low on the stem; a sure header; firm, fine grained, tender and excellent.

Pkt., 5c; oz., 20c; 1/2 lb., 50c; lb., \$1.50

Early Winnigstadt

A desirable variety, having conical, solid heads: a sure header under almost any conditions, and keeps better than most early varieties. Fine appearance and of excellent quality.

Pkt., 5c; oz., 15c; 1/4 lb., 50c; lb., \$1.50

Cabbage Plants Well grown stocky plants, properly hardened off-all standard sorts in season. Prompt deliveries at right prices, SEE PLANT DEPARTMENT.

Diamond Ball Head

An Improved Danish Ball Head, reselected for many years by our grower, who has been successful in securing a perfect late market sort of just the right size and finest quality. Heads are a little flatter than the older strain and stems shorter, color lighter green, but showing the characteristic reddish veins on the outer leaves. Solid, crisp, and of remarkable uniformity; market growers will get more perfect salable heads from Diamond Ball Head than from any other late cabbage. Pkt., 10c; 0z., 25c; ¼ 1b., 75c; 1b., \$2.50

Danish Round Head

A round ball shaped cabbage of great solidity. Color, rich dark green, has few outer leaves, is very hardy and is a profitable late market variety. Pkt., 10c; oz., 25c; ½ ib., 75c; ib., \$2.50

Premium Late Flat Dutch

This is superior to any other late cabbage in cultivation, when large areas are planted for shipping. It possesses all the good qualities of the "Late Flat Dutch," and is a sure header.

Pkt., 5c; oz., 20c; 1/4 lb., 50c; lb., \$1.88

Danish Ball Head or Hollander

This is one of the hardiest cabbages in cultivation and endures both frost and drouth that would destroy other varieties.

Plants rather long-stemmed, but compact; leaves very smooth, but thick: head of medium size, round and very solid, being the hardest heading cabbage we know of, and of the very best quality. Matures quite late, keeps well, and is considered by many the best cabbage to hold over for Spring markets.

Fkt., 5c; ez., 20c; 4/1b., 50c; lb., \$1.75

Charleston, or Large Wakefield

Large and a little later than the "Early Jersey Wakefield."

Pkt., 5c: oz., 20c: 1/4 lb., 50c: lb., \$1.50

Red Cabbage Odense Market

Used for pickling. The heads are very fine and remarkably sure heading.

Pkt., 5c; oz., 20c: 1/4 lb., 60e; lb., \$2.00

Savoy Cabbage Vertus—Late Savoy

Large, compact heads; crisp and tender with a rich fiavor. Desirable for cooking or salads.

Pkt., 5c; oz., 20c; 1/4 lb., 60c; lb., \$2.00

If you grow cabbage, kale, cauliflower, celery—you need a MASTER'S PLANTER
Price \$4.25. Endorsed by the Washington State Experiment Station, Bulletin No. 6.

CARROTS

ARROTS, aside from being one of our most useful and easily grown garden vegetables, are invaluable for stock feeding. They are greatly relished, promote health and put a sleek coat on cattle and horses, giving a well-kept appearance. Dairy and stockmen should grow them extensively. For their special use we recommend our "Yellow Giant."

 ${f CULTURE.}$ — A sandy loam is the best soil for the carrot, but any good land, if thoroughly and deeply worked, will produce satisfactory crops. Sow as early in the Spring as the ground is fit to work, though good crops may be grown from sowing as late as June 15. For table use, sow the smaller kinds in rows 16 to 18 inches apart, and for field culture prepare the ground thoroughly and sow in arills 18 to 24 inches apart. Cover one-half to one inch deep and see to it that the soil is well firmed above the seed

Earliest Short Horn, or French

The earliest variety in cultivation, and best suited for forcing. Roots, reddish brown, globular and about two inches in diameter should be used before full grown.

Pkt., 5c; oz., 15c; 1/4 lb., 40c; lb., \$1.25

Early Scarlet Horn

The best early kind for general use. It is larger than the forcing variety, but fully as good in quality, and produces a much larger crop.

Pkt., 5c; oz., 15c; 1/4 lb., 25c; lb., \$1.60

Oxheart

A thick carrot, five or six inches long and very blunt at the lower extremity. It grows very rapidly and the root attains a weight of more than a pound. It is tender and of good flavor. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., \$1.00

Chantenay

The Market Gardener's Favorite

Tops, medium sized; necks, small; roots, tapering slightly, but uniformly stump-rooted and smooth; color, deep orange red; flesh, very crisp and tender. Although this is a medium early sort, it furnishes roots of usable size as early as any; is a heavy cropper, and is undoubtedly one of the best for both the market and private garden, while its great productiveness makes it very desirable as a field sort.

Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., \$1.00

Danver's Half Long

Grown largely on account of its productiveness and adaptability to all classes of soil. Tops, medium sized, coarsely divided. The smooth, handsome roots are of medium length, tapering uniformly to a blunt point; flesh, sweet, crisp, tender; deep orange in color. Although the roots of this variety are short, they produce as large bulk as the longer field sorts, and are more easily harvested.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 90c

St. Valery

A popular French Carrot of a deep, rich orange red color, with very straight roots, broad at the top and tapering abruptly near the point. Average length 10 to 12 inches, foliage small. The table quality is excellent and the fact that it yields heavily in light soil makes it useful as a stock We consider it a valuable variety Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 75c carrot

Portland Seed Co.'s Improved Long Orange

Popular for farm use on deep, mellow soil. Our stock is an improvement obtained by years of careful selection of the best formed and deepest colored roots, which grow to a large size, some specimens averaging twelve inches in length. specimens averaging twelve inches in length. Enormous crops can be grown under fair culture; one of the best varieties for feeding stock.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 80c

-"EXCELLENT POTATOES"-

Gentlemen:

In the spring of 1916 I purchased of the Portland Seed Company 60 lbs. of Pride of Multnomah seed potatoes. I planted 50 lbs. on a lot 50 x 60 ft. and harvested in October, 1916, 2,400 lbs. of marketable potatoes from this ground. They are excellent potatoes.

(Signed) JOHN T. HOLLOWAY.

CARROTS—Continued Good and Productive Stock Carrots

Portland Seed Company's Yellow Giant

Specially Adapted to Moist, Heavy Solls

This new Carrot originated at the Sydney, Australia, Experimental Station, and has proved itself to be the earliest and most productive stock carrot offered to date. It is a half long variety, with an Immense broad shoulder. The Carrot penetrates less than one-half the depth into the ground, which saves about one-half the expense of harvesting the crop. The color is of bright yellow, and is perfection itself for giving the proper color to butter. Every dairyman who wants a big crop of carrots of the right quality and easy of culture should plant our Yellow Giant.

Crop shortage makes it impossible to supply this season—but present contracts insure an ample supply for 1918.

Improved Short White-"Mastodon" Of Excellent Table Quality

Ranks as a field carrot, owing to its enormous productiveness and the ease with which it can be harvested. Roots half long, smooth, very heavy at the shoulder, but tapering regularly at the point; color, light green at the crown, white below; flesh, rich, white, solid, crisp and of excellent flavor.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 80c

Large White Belgian

Extensively grown for stock feeding; very productive. Grows so much above the ground that the entire crop can be pulled by hand.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 85c

Yellow Belgian

Large root; yellow flesh; good keeper for late eding. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 80c feeding.

Chervil---Curled

This plant is used for flavoring soups and salads, and has a strong perfume.

Pkt., 5c; oz., 10c; 1/4 lb., 35c

Cress

Curled, or Pepper Grass

This salad is much used with lettuce, to which its warm, pungent taste makes an agreeable addition. The seed should be sown in drills about 16 inches apart, on very rich ground, and the plants well cultivated. It may be planted very early.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 75c

True Water

One of the most delicious of small salads, and should be planted wherever a suitable place can be found. The seed should be sown and lightly covered in gravelly, mucky lands, along the borders of small, rapid streams. Under favorable conditions they increase very rapidly by self-sown seed and extension of the roots.

Pkt., 5c; oz., 35e; 1/4 lb., \$1.00.

Corn Salad

Fetticus, or Lamb's Lettuce

A refreshing salad, used extensively in Winter and Spring as a substitute for lettuce. It is often cooked like spinach. Sown in drills one foot apart, in the Spring or Fall. On the approach of cold weather cover over with straw or coarse litter.
Pkt., 5c; oz., 15c; ½ lb., 40c; lb., \$1.25

Collards

True Georgia

Used as "Greens" mainly in the South and West. As the leaves are pulled off, others grow in their places.

Pkt., 5c; oz., 15c; ½ lb., 30c

Chives

See Vegetable Plant List. See Herbs. We supply all vegetable plants in season.

Chicory

Extensively used to adulterate coffee and as a substitute for it. The culture is the same as for Dig at about the same time as carrots, carrots. wash, slice and dry by artificial heat. The blanched leaves are used by some for salad.

LARGE ROOTED OR COFFEE. -The best kind. Pkt., 5c: oz., 15c: 1/ lb., 45c: lb., \$1.50

Has the Marvelous "Vortespoon" One Piece Skimming Device - gets all the Cream

CELERY

CULTURE.—Sow the seeds early, about February, in a hot-bed or cold frame. When three inches high transflant, setting them four inches apart. When grown six inches, and fine, stocky plants, set in richly manured, deep soil, in rows three and a half feet apart and about nine inches from plant to plant. Water if dry weather follows transplanting. During the next two months all the attention that is required is to keep down the weeds. Blanch by placing boards along the rows, or earth up a little, and continue doing so at intervals until only the tops of the leaves are visible late in Autumn. Never hoe up the earth when plants are wet. One ounce of seed produces about six thousand plants. SEE FOOTNOTE ON GROWING.

White Plume The Leading White Celery

A handsome, crisp sort, of very easy cultivation. Naturally its stalks and portions of its inner leaves and heart are white, so that by closing the stalks either by tying or by simply drawing the soil up against the plant and pressing it together, the work of blanching is completed without the troublesome process of "banking" or "earthing up." It is the earliest It is the earliest celery known.

Pkt., 5c; oz., 20c; 1/4 lb., 65c; lb., \$2.00

Golden Yellow Self-Blanching

This is no doubt the best celery for early Spring market use. Plants are of a yellowish green color when young, but as they mature the inner stems and leaves turn a beautiful golden vellow. which adds much to their attractiveness and makes the work of blanching much easier.

Pkt., 16c; oz., 75c; ½ lb.. \$2.50

Large White Solid

Of vigorous growth, white, crisp, tender; fine, nutty flavor.

Pkt., 5c; oz., 20c; 1/4 lb., 60c; lb., \$1.75

Golden Heart, or Golden Dwarf

Solid, of fine, nutty flavor; excellent.

Pkt., 5c; oz., 15c; 1/4 lb., 50c; lb., \$1.50

Winter Queen

This is without doubt the most valuable variety of celery for Winter and Spring use ever introduced. Has double the amount of heart of any known celery. The plant has a fine appearance, of compact growth, and blanches to a beautiful cream-white. Ribs perfectly solid, crisp and a delicious nutty flavor.

Stored for Winter or Spring use, it is an excellent keeper and when taken out the blanched stalks will be firm and crisp; entirely free from strings; brittle and of sweet flavor.

Pkt., 10c; oz., 35c; 2 oz., 65c; 1/4 lb., \$1.00

Giant Pascal

Largest variety grown; of fine, nutty fiavor; very easily anched. Pkt., 5c; oz., 15c; ½ lb., 50c; lb., \$1.50 blanched. Colory Seed. For flavoring Oz., 10c; 1/2 lb., 20c; lb., 65c

CELERIAC

Turnip Rooted Celery

Large Smooth Prague

improved form with very few side roots. The largest and best varlety.

Pkt., 5c; oz., 20c; 1/ lb., 60c.

To Succeed with Celery you must keep your plants growing constantly while young, if you allow them to "stand still" they will run up to seed later. Always cultivate as soon after watering as the ground is dry enough to work well.

Fertilize heavily in the spring—and use nitrate later if needed.

DIAMOND FERTILIZERS FOR CELERY Read our Fortilizer Book Mailed free on request

CUCUMBERS

CULTURE.—Cucumbers need a warm, rich soil, and should not be planted in open ground until the weather is settled, as otherwise they will not thrive. Plant in hills four feet apart each way, thinning to three or four of the strongest plants, after danger from insects is passed. As fast as the cucumbers attain suitable size they should be taken from the vine, whether required for use or not, as their ripening soon destroys the vines' usefulness

"Diamond" Long Green

The leading large variety. Fruit from ten to twelve inches long, dark green, crisp and tender A good variety for slicing, and when ripe they are the best for sweet pickles. We offer our "Dlamond Strain"—they will grow long and uniform in shape. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 85c

Peerless, or Early White Spine

One of the best sorts for table use, fruiting early and abundantly. Fruit uniformly straight and handsome; light green, with a few white spines.

Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 85c

Boston Pickling, or Green Prolific

Color, bright green, and a great producer. The fruits average four to five inches in length when large enough for slicing, and are of excellent quality, but it is for producing medium sized pickles that this variety is so highly esteemed.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 85c

Cumberland Pickling

The vines are hardy, strong, and fruit very eely. The straight young fruits possess the distinctly roughened surface so much desired for small pickles. The large fruits average nine to ten inches in length, two and a half inches in diameter. with full rounded ends, and are of good quality for Pkt., 5c; oz., 10c; 1/2 lb., 25c; lb., 75c

Gherkin For Pickling

A very small, oval, prickly variety, quite distinct om all others. Pkt., 5e; oz., 20c; ½ lb., 60c from all others.

Early Cluster

Fine, vigorous, producing the bulk of the crop near the root and in clusters. Fruit short with uniformly thick end, dark green, but paler at blossom end. A very productive sort.

Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c

Short Green, or Early Frame

An excellent sort for both table use and pickling. Fruit straight, small at each end, bright green, with crisp, tender flesh. Comes into use a little later than the Early Cluster and keeps green a long time. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c.

Telegraph—Forcing

A standard forcing variety, very popular with gardners. Fruit fourteen to sixteen inches long, of very fine quality. A sure and heavy cropper. Pkt.. 25c

Lemon Cucumber

This dainty little cucumber resembles a lemon both in form and color, having a distinctive flavor superior to and not found in any other cucumber. The Lemon Cucumber is so prolific that a single vine will be ample for the needs of the average family. It is also said that the Lemon Cucumber can be eaten without fear of the harmful results that some experience from eating cucumbers.

Pkt., 5c; oz., 25c; 1/4 lb., 75c; lb., \$2.06

Japanese Climbing

A useful variety for growing on a trellis or wire. cumbers are long of a dark green color, white flesh, crisp, and of a good flavor. Fkt., 10c; oz., 15c; 1/4 lb., 50c

"The Davis Perfect" Cucumber

The "Davis Perfect" is of perfect form, large size and of the finest color; is crisp, delicious and almost seedless.

The "Davis Perfect" is as handsome, grown outside, as any hothouse cucumber.

Pkt., 10c; oz., 15c; ½ lb., 35c; lb., \$1.00

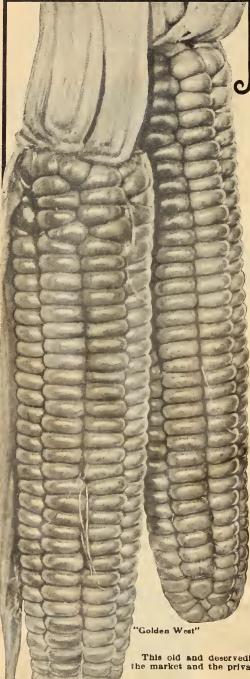

Early Russian

Earliest and hardiest. Very vigorous and productive. Fruit three to four inches long, thick. oval, pointed at each end, and covered with fine. small spines. Pkt., 5c; oz., 10c: ¼ lb., 25c; lb. 75e

For Cucumbers "DIAMOND FRUIT FERTILIZER" will repay its cost many times over. Let us send you our FREE BOOK "FERTILIZERS"

Sweet or Sugar Corn

For single lbs., by mail, add 10c postage; large lots at parcel post rates

CULTURE.—Corn should not be planted until the ground is warm, as the seed will rot in cold, damp soil, or if planted too deep. Late April is early enough for first plantings and for succession plant every two weeks through May and June. Cover the first planting very lightly, increasing the depth a little for the later plantings. For the Dwarf Early varieties, rows should be three feet apart; for later large varieties, four feet, and the hills two to three feet in the rows.

Sweet or Sugar varieties are used both for table and stock feeding, some of the large later sorts being breferred for silos and fodder.

Golden West-Oregon **Grown Seed**

The richest, sweetest corn ever grown—To be sure of the right strain, look for our Diamond trade mark

Our "Golden West" Corn, a selection from the original strain of Golden Bantam, produces a larger careful selection, improves yearly. We believe it to be the richest, sweetest, best yielding early sweet corn, nothing having ever been produced that with it in any way. "Golden West" is extremely hardy, can be planted earlier than other varieties, and, being of dwarf habit, can be planted closer than other sorts. It is the very best corn for market or home gardens, where earliness and quality are considered. The color is a rich, creamy yellow, deepening to golden as it matures, and the quality is so fine that you must try it to appreciate how good corn can be.

Pkt., 10c; lb., 25c; 10 lbs., \$2.00

Golden Bantam

The original yellow sweet corn. Does not grow quite as large an ear as our "Golden West," but has most of its good qualities, being early, productive. sweet and rich.

Pkt., 10c; lb., 20c; 10 lbs., \$1.75

Oregon Evergreen
We offer "Oregon Evergreen" as the finest main crop Sweet Corn. The flavor and sweetness have not been excelled and the extreme whiteness of the large ears makes it very beautiful and valuable for canning. It is large and the stalks produce more ears than any other variety and have a very heavy husk over the grains, protecting them from insects and keeping the ear fresh a long time after cutting "Oregon Evergreen" is a hardy, vigorous grower

and is the ideal Corn for market gardeners. Pkt., 10c; lb., 30c; 10 lbs., \$2.50

Livingston's Early Sugar

A grand "dry weather" corn that will stand severe drouth—the stalks remaining green and ears filling well even in the driest years. In favorable seasons it will produce ears fit for table in 60 days from planting. Ears averaging 7 inches long contain from 12 to 14 rows of deliciously sweet, pure Pkt., 10c: lb., 25c white kernels on white cob

Early Minnesota

This old and deservedly popular variety is one of the best early sorts for the market and the private garden

Pkt., 10c; lb., 25c; 10 lbs., \$2.00

Stowell's Evergreen

Remarkable for remaining a long time in a fresh condition suitable for the table. Hardy and productive, and the best late variety for general use.

Pkt., 10c; lb., 25c; 10 lbs., \$2.00

Remember THE RICH FLAVOR AND SWEETNESS OF CORN DISAPPEAR QUICKLY AFTER GATHERING AND TO BE AT ITS BEST SHOULD BE USED AT ONCE.

SUGAR CORN—Continued

Early White Cory

MAMMOTH

The stalks are no larger than those of the "White Cob Cory," but each stalk furnishes two or more large, fine-shaped ears, which are fit for use before those of most other sorts. The ears are 12-rowed, very symmetrical and handsome. The grain is large, broad, very white and of remarkably good Pkt., 10c: Ib., 20c: 10 lbs., \$1.50

BLACK MEXICAN

An old favorite still in good demand on account of its quality and sweetness. A good variety for home gardens. Pkt., 10c; lb., 20c; 10 lbs., \$1.50

For the CORN EAR WORM

DUST "CORONA DRY" ON THE NEW SILK as soon as it appears.

"Garden Pests and Their Control" mailed free on request.

Black Beauty

EGG PLANT

Should be started in a hotbed and transplanted when the weather is settled and the ground thoroughly warm. They will thrive with the same treatment as that given the tomato.

Black Beauty

An extra early, quick-growing, vigorous variety, handsome and very uniform. Color, deep blackish purple. Splendid market sort.

Pkt., 10c; oz., 50c; ½ lb., \$1.50; lb., \$6.00

New York Improved, Large Purple

The leading market variety. Large, round, dark, excellent and the most productive. Pkt., 5c; oz., 30c; 1/4 lb., \$1.00

GARLIC

CULTURE—Garlic is a profitable crop if your soil is right and proper methods of culture are employed. The sets are planted in the same manner as "Multi-plier Onions," dividing the little clump, planting each bulblet thick end down, being careful not to bruise them as they will rot if injured. October is the planting month in Western Oregon.

A medium loam soil containing a little sand and well-drained is best and commercial fertilizer should be used. Deep and thorough preparation of the soil is necessary.

Plant in rows 14 inches apart-sets 4 inches apart in the row. It requires 175 to 200 lbs. to plant an When approaching maturity, the tops die down and are not removed but used to braid the Garlic together for hanging up and convenience in handling.
An acre should produce from two to four tons.

Price per lb., 20c; postpaid, 30c. Write for quotation on large lots.

ENDIVE

This is a hardy vegetable, cultivated principally for a Winter salad. Sow from May until August for a succession of crops; tie the leaves closely together to blanch them.

Broad Leaved Batavian (Escarolle)

Has broad, thick leaves, which form a large loose ad. Pkt., 5c; oz., 10c; ¼ lb., 30c head.

White Curled

A beautiful variety, with curled, mossy leaves. for early use. Pkt., 5c; oz., 10c: 1/4 lb., 30c

Green Curled

Standard sort for Fall and Winter.

Pkt., 5c; oz., 10c; 1/4 lb., 30c

Horse Radish Roots

For prices and description, see Plant Department

Kohl Rabi

Hardy and of easy culture. Grown from plants the same as cabbage. The Kohl Rabi is a vegetable intermediate between the cabbage and turnip and combines the flavor of both. The edible part is a turnip-shaped bulb formed by the swelling of the stem. Kohl Rabi is far superior to cabbage or turnips in the delicacy of its flavor, and is a splendid addition to every garden. It should be eaten before growth ceases.

Early White Vienna

Very early; bulb white; best table variety.

Pkt., 5c; oz., 20c; ¼ lb., 65c

Early Purple Vienna

Same as above, except in color, which is purple.

Pkt., 5c: oz., 20c; ¼ lb., 65c

Herb Seeds-Sweet, Pot and Medicinal

Every garden should contain a collection of Herbs for flavoring and medicinal purposes. They are almost a household necessity; are easily grown, and many of them are very ornamental.

CULTURE. — Herbs in general delight in rich, mellow soil. Those marked with an (*) are perennial, and when once obtained in the garden may, with a little attention, be preserved for years. Sow the seeds early in the Spring in shallow drills, one foot abart. We offer some of the most useful and popular. They should be cut on a dry day, just before they come into full bloom, and tied in bunches and hung up or spread thinly on a floor where they can dry quickly. When dry and crisp, rub fine and bottle.

All the following Herbs, 5c per Packet. Except where noted.

KALE

Emerald Isle Finest Kale in the World

This is really the handsomest Kale that has ever come under our notice; and is entirely distinct from other strains, very hardy, of medium height, and very vigorous, throwing out new shoots as fast as the leaves are used, and will furnish excellent greens all winter. The closely curled, handsome leaves are most attractive and of fine flavor. A fine exhibition plant. We offer Oregon grown seed.

Fit., 10c; cz., 15c; ½ 15b., 20c

Tall Green Curled Scotch

Grows about two feet high; leaves dark green, curled and wrinkled; very hardy and is improved by a slight frost.

Pkt., 5c; oz., 10c; 1/4 lb., 25c

HALF DWARF MOSS CURLED. — Medlum sized leaves, nicely curled. Pkt., 5c; oz., 19c; ½ lb., 30c

DWARF GREEN CURLED.—Leaves beautifully curled and bright green.

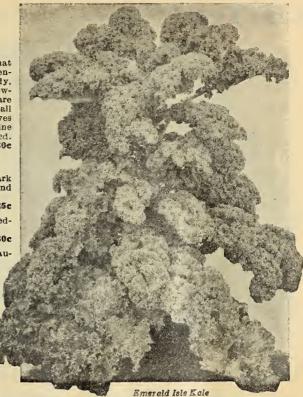

Pkt., 5c; oz., 10c: ½ lb., 25c

LEEK

The Leek belongs to the Onion family, Prized for soups. Cultivation similar to that of Onions, but should be hilled up about the neck to blanch it.

Large Rouen, or American Flag

A large, favorite American sort. Pkt., 5c; ex., 23c; ½1b., 56c; 1b., \$1.50

MUSTARD

Mustard is used alone as "greens," or with cress as salad. Sow any time in the Spring, in rows, and thin out as necessary.

SOUTHERN GIANT CURLED.—We offer a fine strain of the true curled leaf.

Pkt., 5c; oz., 10c; ½ lb., 15c; lb., 50c WHITE ENGLISH.—Leaves mild, tender when young; seeds yellow.

Pkt., 5c; oz., 10c; 1/4 lb., 15c; lb., 40c

FORDHOOK CURLED.—Beautiful dark green, finely curled plume-like leaves that are of distinctive flavor; superior to spinach as greens and is fine for salads. "Fordhook Curled" is vigorous and productive.

Pkt., 5c; oz., 10c; ½ lb., 30c; lb., 90c CHINESE MUSTARD.—Less pungent than other varieties. Chinese Mustard is most delicious, thriving at the same season and under conditions that are favorable to spinach. A splendid addition to our gardens.

Pkt., 5c: oz., 10c: 1/4 lb., 15c; lb., 45c.

Mushroom Spawn

With intelligent care and good spawn, Mushrooms can be made to pay handsomely. They can be successfully grown in a dry cellar, under the benches of a greenhouse, or in sheds, where the temperature can be kept from 50 to 60 degrees through the Winter. Our free pamphlet gives general instruction.

Lambert's Pure Culture

A new kind of spawn, without a doubt the best; much superior to the common English. It comes in bricks, weighing about 20 cunces. These are broken up into pieces the size of a walnut and put into the bed one footapart each way. A brick will plant 10 sq. ft

Price, per brick, 25c; postpaid, 49c; by express, not prepaid, 5 bricks, \$1.90

MUSHROOMS. How to Grow Them. By Falconer. 162 pages. Postpaid \$1.10 MUSHROOM CULTURE and Pure Culture Spawn. 32 pages. Postpaid 35c

LETTUCE is so extensively grown that cultural directions seem unnecessary, but we offer a few simple suggestions that may save a later disappointment, as any failure is generally blamed to the seed. This should not be, as Lettuce, like many other vegetables, requires very rich soil, plenty of water, a cool growing season and intense culture to produce the best results. If the earliest varieties are planted out in the Spring, and the weather turns dry and hot, they will run up to seed without heading. The same seed sown in the Fall or with cooler growing weather would develop perfectly. At a temperature of 40 degrees or lower lettuce will not thrive. At 65 degrees and upward it has a tendency to run up and not head properly. For outside planting sow the seed in shallow drills from one to two ounces to the 100 yards. An ounce will produce 3,000 plants. Four pounds should plant an acre. Lettuce matures in forty to sixty days from time of planting.

Portland Seed Company's Crispette

Our "New Crispette" is a beautiful lettuce, the quality of which is simply perfect. The large, curly leaves, which cover the outside of the solid heads, are of a bright, light green. The unusual solidity of the heads is insured by the large, white main ribs of the leaves, each of which curving strongly toward the center, makes it impossible for the leaves to open outward and expose the center, which will always be found crisp, tender, sweet and melting. It matters not whether grown to head in the early Spring or the hottest days of Summer, the leaves are always crisp and tender. Pkt., 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.25

May King

A large growing, smooth leaved, richly flavored Plant, light green, with round leaves, which into a very solid, compact, round head; is a long time without running to seed. Inner stands a long time without running to seed. leaves blanch to a rich, golden yellow. Exceedingly rich, tender and buttery. Fine for open ground or forcing. For succession plant in Spring, then in August and again in September.

Pkt., 5c; oz., 15c; 1/4 lb., 35c lb., \$1.25

Grand Rapids—For Early Forcing

As a Lettuce for greenhouse forcing, this variety undoubtedly stands at the head of the list. Of quick growth, and stands for some days after being fit to cut. The plant is upright, and forms a loose head or cluster of large, light yellowish green leaves, slightly crimped and blistered, rather thin, good flavor, crisp and tender. It will stand shipping better than most curled sorts.

Pkt., 5c; ez., 15c; ½ lb., 35c; lb., \$1.25

All Seasons

A valuable new "Butter Head" Lettuce; the best main crop variety, as its large heads continue to grow for two or three weeks after they are ready to use, and are very slow to seed. "All Seasons" is headed up ready for use in

less than ten weeks from planting. Color of outer leaves is a bright green, with inner leaves blanched a rich golden yellow; very crisp and of excellent flavor. Pkt., 5c; oz., 15c; ½ lb., 35c; lb., \$1.00

Large Drumhead

One of the largest heading kinds, but the heads are not so solid as the "Hanson" or "Deacon."

Pkt., 5c; oz., 15c; ½ lb., 30c; lb., \$1.00

LETTUCE—Continued

New York or Wonderful

The Best Head Lettuce for Market Growers

This is the mammoth head lettuce so popular in California, from whence it is shipped to the Northern markets, arriving in splendid condition. The immense heads are solid, heavy, beautifully blanched to a creamy white with bright green outer leaves. The quality is unsurpassed, being tender, crisp and sweet. "New York" is a hardy, rapid grower, deep rooted and resistant to drought: a slow seeder and sure to head.

Pkt., 5c; oz., 15c; 1/2 lb., 50c; lb., \$1.50

Deacon

Heads very solid and of excellent flavor, remains in condition for use as long as any variety in cultivation. Plant medium sized, with very few outer leaves, which are deep green and very thick, while the inner ones blanch to a bright yellow and are exceedingly well flavored, crisp and tender. This is certainly one of the best varieties for Summer use

Pkt., Sc; oz., 15c; 1/4 lb., 30c; lb., \$1.00

Early Prize Head

Standard sort; one of the best thin leaved, clustering varieties. The very large leaves are savoyed or crimped, bright green, tinged with red, and are exceedingly tender, crisp and sweet, forming a large, loose head. One of the best for the garden but not good to ship long distances.

Pkt., 5c; oz., 15c; 1/2 lb., 30c; lb., \$1.00

Hanson

Improved Hard Heading Stock

One of the very best. Heads green outside and white inside; grow to a remarkable size, very solid, and is deliciously sweet, crisp and tender. It withstands the hot sun well.

Pkt., 5c; oz., 15c; ¼ lb., 35c; lb., \$1.25

Simpson's Early Curled

A leading market variety used for very early planting and forcing. Forms a dense mass of finely curled and wrinkled leaves that are excellent and tender, and do not wilt readily.

Pkt., 5c; oz., 15c; 1/4 lb., 30c; lb., \$1.00

Black Seeded Simpson

Forms a close, compact mass of curly leaves of a yellowish green.

Pkt., 5c: oz., 15c: 1/4 lb., 30c: lb., \$1.00

Early Tennis Ball

The plant is small, of rapid growth, and should be used as soon as large enough, as it quickly runs to seed. Leaves dark green, thick and crisp. One of the best for growing under cover, and for forcing.

Pkt., 5c; oz., 15c; ½ 1b., 30c; 1b., 31.00

Brown Dutch

Forms a large, solid head, sweet, tender and of good flavor. Outer leaves are tinged with brown Very hardy.

Pkt., 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.25

BEST OUT OF 5 VARIETIES-

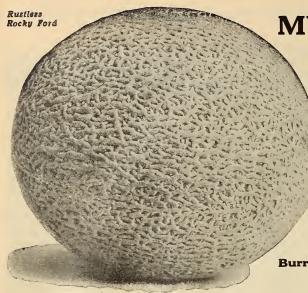

Gentlemen:

Twin Falls, Idaho

I used "Crispette" and "New York Wonderful" Lettuce Seed for early planting and they are both the best I tried among 5 varieties from elsewhere.

O. T. FULLER

Burrell Gem

The Perfect Melon for Market or Home Gardens

"Burrell's Gem" has a tough, thin rind, well arched ribs, covered with a closely interlaced gray netting; shape elongated, being about 4½ inches in diameter by 6 inches long, flesh of a reddish orange, very thick, fine grained and spicy, seed held firmly in a triangular cavity. This is the secret of a good shipping melon. If the seeds shake loose easily a melon will quickly decay.

Pkt., 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.00

Rocky Ford or Netted Gem

The most popular and best seller among Muskmelons. The fruit is oval, slightly ribbed, densely covered with coarse netting. Flesh thick, green, very sweet and highly flavored. The fruit is wonderfully uniform in shape and quality. Grown largely in Colorado and shipped in carload lots all over the country. The favorite with market gardeners everywhere.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Osage, or Miller's Cream

One of the finest flavored melons in cultivation. and highly recommended. The flesh is of a rich salmon color, very sweet and melting in quality.

Pkt., 5c: oz., 10c: ¼ lb., 25c: lb., 75c

MUSKMELONS

CULTURE. — Plent in hills four to six feet apart each way, after danger o frost is past and ground is warm; enrich well with well-rotted manure and plant the seeds just under the surface, not too deep. One ounce to fifty hills; two to three pounds per acre.

Melons thrive best on warm, light soils, but good crops are obtained on heavy ground if it is rich and well drained; in cultivating, hill up by drawing the soil toward the plant. Use Bug Death, lime, slug shot or land plaster for destroying insects.

Burrell's Rustless Rocky Ford Cantaloupe

See Cut

This new melon, the highest development of the "Rocky Ford" type, has light green flesh which is very deep, rich and delicious, the quality being unsurpassed. It is solidly netted, thrifty, vigorous, rust resistant and a continuous bearer until frost. Ninety-flye per cent of the seed crop were choice, standard size melons.

Pkt., 5c: oz., 15c: 1/4 lb., 50c; lb., \$1.50

Emerald Gem

The superior quality of "Emerald Gem" makes it most desirable for home gardens. The fiesh is very thick, of a dainty salmon color, and the flavor is the finest and sweetest of all melons. The skin is smooth and of a deep emerald green; rind thin; it bears early and is very prolific.

Pkt., 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.00

Small Green Nutmeg

A variety ripening early. Flesh, green, fine and sweet. Superior for the early market, or family garden, and a favorite for hotels and restaurants.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Paul Rose, or Petoskey

Created by a cross between the "Netted Gem" and "Osage"; fruit oval, about five inches in diameter. rich orange in color, sweet and highly flavored.

Pkt., 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.00

Well-Known and Popular Varieties

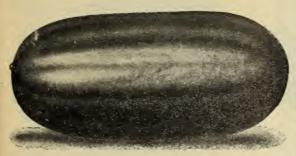

JENNY LIND.—Extra early, flesh green, fine flavor	5c	Oz. 10c	½ 1b. 25c	Lb. 75c
EXTRA EARLY HACKENSACK.—Flesh green, delicious, juicy and sweet; medium size	5c	10e	25c	75c
LARGE YELLOW CANTALOUPE.—Early and productive; flesh salmon color, rich, sweet	5c	15c	35c	\$1.00

FOR MARKET GARDENER—"Earliest of All Potatoes" can be ready for use in early June from March planting. They have been marketed in eight weeks from planting. The vines die down and the ground can be used again the same season SEE PAGES 22 AND 32.

WATERMELONS

CULTURE. — Watermelons thrive best on light, well-drained soils, but give good results on any good rich garden soil that is properly drained and cultivated. Plant after the weather is settled and ground warm. Hills should be eight feet apart each way and with well rotted manure thoroughly worked into each hill. One ounce of seed will plant thirty hills; two to three pounds per acre. Thin to two or three plants per hill.

Tom Watson

This excellent new melon is of elongated form, averaging 18 to 24 inches in length, 10 to 12 inches in diameter, has a thin, dark green rind and deep red fiesh; crisp and sugary, with a lusciousness and distinctive flavor that makes it one of the finest melons ever produced; is hardy, early and stands handling and long shipment. We consider it a valuable market or home variety.

Pkt., 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.00

Halbert Honey Watermelon

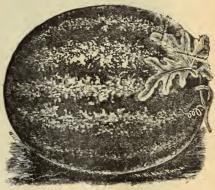

This superb Melon is a great improvement over the well-known "Kleckleys Sweet," as it fully equals it in delicious flavor and crispness, is more uniform in outline, darker in color, more vigorous and productive, and will ripen perfectly in the cooler sections where other varieties fail. The average length is eighteen to twenty inches, both ends being blunt and fully rounded out. The rich, dark, glossy green, the thin rind and the bright crimson make the new "Halbert Honey" the most attractive Watermelon.

Pkt., 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.00

Kleckley's Sweet, or Monte Cristo

A splendid sort for home use or near markets. Vine vigorous and productive; fruit of medium size; oval; color dark, mottled green in two shades, forming indistinct stripes. Flesh a beautiful bright rich red; exceedingly sweet and tender.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 65c

Sweet Heart

This meion has become very popular as a shipping meion. Vine vigorous and productive, ripening its fruit early. Fruit large, oval, very heavy, uniformly mottled dark and very light green; rind thin, but firm; flesh bright red, firm, solid, but very tender, melting and sweet. Fruit retains its good quality for a long time after ripening.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 60c

Cuban Queen

A very fine variety, growing to a great size; flesh bright red, solid and sweet. The skin is beautifully striped dark and light green. Melons are wonderfully solid; rind thin. They are enormously productive and ripen early.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 60c

Ice Cream, or Peerless

A grand favorite and standard variety. Superior in every respect. Has beautiful crimson core, which is always fine grained; can not be surpassed in flavor; very prolific.

Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 60c

Fordhook Early

A fine extra early melon. Fruit of good size; skin dark green; flesh bright and crisp, sweet and good quality; rind thin, but tough. Good shipper.

Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 60c

- "Some Gain" -

Gentlemen

The seeds were received by me in splendid condition. I saved \$16.00 by sending to you.

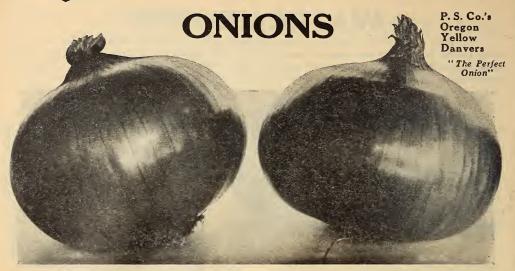

This is some gain. (Signed) John Cottell

- "For the Past 15 Years" -

Gentlemen:

I have used your seeds for the past fifteen years and find them very good.

(Signed) Mrs. C. Martin

WE are large growers of Onion Seeds and Sets, and for years have been specializing on varieties that attain their greatest perfection in the Northwest and believe in our "OREGON YELLOW DANVERS" we have the finest type of Danver Onion ever offered, and recommend it to all commercial growers.

CULTURE. — For best results in Onion growing, the soil should be deep and rich; bottom land of rather loose texture being preferred—(beaverdam soil is best).

Sow $2\frac{1}{2}$ or 3 lbs. of seed per acre, as early in the season as the ground can be put into proper condition, using some good fertilizer such as our special Onion Fertilizer, or manure supplemented with Bone Meal, Muriate of Potash, and in some cases Nitrate of Soda, the latter often being used after the plants are up, while the other fertilizers are worked into the soil before the seed is sown. Hardwood ashes may take the place of the Muriate of Potash.

Thorough clean cultivation and thinning during the growing season is necessary.

In the Fall the tops of the Onions will naturally fall to the ground and shrivel up and the roots let go their grip on the soil, when the Onions should be lifted and allowed to dry off for a day or two before storing away. If the weather remains too wet to dry off in the fields, the Onions may be put under open sheds for a while where there is a good circulation of air.

In case the tops do not die off naturally, they may be broken down and so cause the bulbs to ripen quicker, but such Onions will not make good keeping bulbs, and should be disposed of as soon as possible.

To be sure of a good crop, sow none but the best of seed—it may cost a little more than a cheaper grade of seed, but it is worth more than the difference in the price.

Portland Seed Co.'s Oregon Yellow Danvers

This is the variety generally planted in the Northwest. The largest crops of onions and the best keepers, bringing the highest prices on the Pacific Coast markets are the Oregon Yellow Danvers. The bulbs are uniformly large, of a half-globe in shape, with small necks, and as a market or table onion can not be excelled.

Our seed is grown specially for us by the best onion seed growers in Oregon. No onion grower can afford to plant anything inferior when such seed can be obtained. Pkt., 5c; oz., 25c; ¼ lb., 75c; lb., \$2.50 Sow as ground can be prepared in the Spring. Give clean culture. An ounce of seed should drill 150 feet—3 to 4 lbs. per acre. If you contemplate a large planting, write us.

Australian Brown

This onion resembles the Oregon "Yellow Danvers" in general appearance, but has a clear, amberbrown skin that attracts buyers. It matures early, ripens uniformly, and will keep in good condition longer than any other onion. For late sowing and when necessary to replant. Australian Brown heads the list.

Pkt., 5c; oz., 20c; 1/4 lb., 60c; lb., \$2.00

Prizetaker—The Genuine The Handsomest and Largest Yellow Globe Onion

Of fine flavor, handsome shape and enormous size. A perfect globe shape, with a bright straw-colored skin; the necks are very small and the onions always ripen up hard. A good variety for transplanting, which is sometimes necessary to secure a crop especially on upland.

Pkt., 5c; oz., 20c; 1/4 lb., 60c; lb., \$2.00

DIAMOND ONION FERTILIZER 1000 Pounds to the Acre

Our Free Book "FERTILIZERS" tells things you should know about fertilizers—gives analyses, values and crop requirements—tells what fertilizers are and how to use them.

ONIONS—Continued

"Bunching" Onion

This variety is especially useful to market gardeners for producing an attractive "green onion." The young stalks are crisp and mild, attaining a good size before the bulb forms.

Pkt., 5c; oz., 20c; 1/4 lb., 60c; lb., \$2.00

Large Red Wethersfield

A standard variety; one of the most productive kinds, even in poor soil. Its good keeping qualities render it one of the best for shipping.

Pkt., 5c; oz., 20c; ¼ lb., 60c; lb., \$2.00

Yellow Globe Danvers

A very handsome, round or globe-shaped variety of large size, with thin, yellowish skin, white flesh, fine grained, mild, very firm, and the best of keepers. It ripens early.

Pkt., 5c; oz., 20c; 1/4 lb., 60c; lb., \$2.00

White Portugal or Silver Skin

Skin and flesh pure white; mild flavor and flat shape; grown largely for sets.

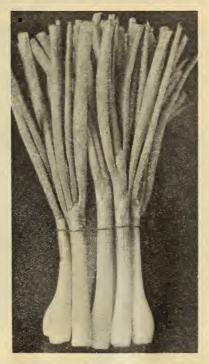

Pkt., 5c; oz., 30c; ¼ lb., 75c; lb., \$2.50

-OUTYIELDS ALL OTHERS-

Gentlemen

I am well satisfied with the seed I get of you and have not had a single packet fail to grow. Also your Oregon Yellow Danver Onions have out-yielded all other kinds I have tried so far.

(Sgd.) Michel S. Haley.

Onion Sets-Pound Prices Postpaid

Bottom Onion Sets

Small onions grown from seed that has been sown too thickly to attain a large size. The small onions (about ½ inch in diameter) thus obtained are planted out and are ready in a short time to pull as green onions for the table or bunched for the market. If left to stand they make ripe onions of the best quality, and come to maturity some six weeks earlier than a crop grown directly from the seed.

Per Ib. 25c

For Garlic see page 19.

Top Sets

Produced in clusters.

Per 1b., 25c

Shallots

Valuable for bunching or for an early crop. The smallest sets make fine bulbs of good size, while the larger ones produce a cluster of small to medium-sized bulbs. Light brown skin; mild, white flesh.

Per 1b., 30c

Bottom Multiplier

Extra Early Peas

Little Marvel

A Splendid New Dwarf Pea for Home or Market

The dwarf, bushy vines averaging 15 inches are loaded with firm, square-ended pods 2½ to 3 inches long, tightly filled with plump, luscious, deep green peas. "Little Marvel" is as early as "American Wonder," fully equals the superb quality of "Nott's Excelsior" and far outylelds these two popular sorts. Pkt., 10c; lb., 20c; 10 lbs., \$1.75

Blue Bantam

Extremely early, "Blue Bantam" excels in the size of pods and quality of the sweet large dark green Peas with which they are filled, and is said to surpass all extra early dwarf varieties in yield. Very dwarf and hardy.

Pkt., 10c; Ib., 20c; 10 lbs., \$1.75

New-Richard Seddon

A dwarf English Pea of the finest quality; very early. Has large shapely pods well filled. Is sweet and delicious. A hardy, prolific Pea of the great-est merit. As early as American Wonder and far more prolific. Try it.

Pkt., 10c: lb., 20c: 10 lbs., \$1.75

Alaska or Earliest of All The Standard Extra Early Variety

A smooth, blue pea, of even, vigorous, growth and extra early maturity. Vines two to three feet high, unbranched, bearing four to seven long pods, which are filled with medium-sized, bright green peas of excellent flavor. A great favorite with our market gardeners for Fall or early Spring planting.

Pkt., 10c: lb., 15c: 10 lbs., \$1.26

----"Finest Ever"-

Gentlemen:

Your Earliest of All Potatoss are ready to dig. They are the finest early potato I ever saw and a good yielder. Producer is filling the earth with fine potatoes. Those two varieties have proven the (Signed) W. E. JOHNSON & EDE. best for us in this soil. We will report later.

It's Easy to Inoculate FARMOGERM—Increases the Yield—Improves the Quality Peas and Beans with FARMOGERM—Builds Up Your Soil—Garden size 50c.

Early Garden Peas-Continued

For single th. by mail add 10c postage. Larger lots at parcel post rates. 10c packets are postpaid.

Pkt., 10c; Ib., 20c; 10 lbs., \$1.75

Laxtonian

A new, early, dwarf, robust, large podded pea of superior excellence; often referred to as "Dwarf Gradus," and is said to surpass "Gradus," in yield and quality, with the added advantage of dwarfer growth, averaging 16 inches. The large pods are well

filled, holding 8 to 10 peas.

"Laxtonian" is so highly recommended that you should give it a Pkt., 10c; lb., 20c; 10 lbs., \$1.78

American Wonder

One of the most popular and best of the early wrinkled sorts. A great favorite for family use. Has stout, branching vines, covered with well-filled pods containing seven or eight large, exceedingly sweet, tender and well-fiavored peas. Height 10 to 12 inches.

Pkt., 10c; Ib., 20c; 10 lbs., \$1.50

Gradus

This extra early, wrinkled pea bears pods of large size and combines quality with earliness. It is very hardy; can be planted fully as early as the smooth peas; growth, vigorous and healthy; viez 2½ feet in height; very prolific. The quality and flavor are delicious and the peas remain tender and sweet for a long time.

Nott's Excelsion

The most desirable sort for the market gardener, and unexcelled for the home garden. Very hardy. The pods contain from six to nine large peas, which are unusually fine flavored and tender.

Pkt., 10c; lb., 15c; 10 lbs., \$1.25

Premium Gem

One of the earliest dwarf varieties, coming in a little later than the "American Wonder;" grows taller, much more productive and continues in bearing longer. The quality of the pea is very superior. Height, 15 inches. Pkt., 10c; lb., 15c; 10 lbs., \$1.25

---"FINE AND PURE"-

Gentlemen:

I could buy Thomas Laxton from other seed bouses but their seed has always proven very poor and badly mixed, while seed from the Portland Seed Company has always been (Sgd.) PHILIP MARTIN. exceptionally fine and pure.

Gentlemen:

Every seed you sent me, Peas, Onions, Spinach, Radish and Celery, came up and are growing fine. The Peas are just coming in blossom. It is a pleasure to have a garden when one has good seed. (Sgd.) CHARLES H. PAYSON.

Telephone

Main Crop Varieties

Telephone-Tall

A Great Favorite With Our Market Gardeners.

Immensely productive, of the finest quality and excellent, sugary flavor; vines strong; the pods are of large size, filled with large, luscious peas; height Pkt., 10c; Ib., 20c; 10 lbs., \$1.50

USE FARMOGERM

ON GARDEN PEAS --- Insures the maximum yield and improves the soil. SEE FERTILIZERS

Improved Stratagem

One of the best of the large podded peas; the pods are of immense size filled with large, dark green, wrinkled peas of the finest quality; vine of medium height, but very stocky, with very broad, light green leaves, and bearing an abundance of large, handsome pods.

Pkt., 10c; Ib., 20c; 10 lbs., \$1.50

Yorkshire Hero

One of the largest, sweet, wrinkled kinds; vines strong and spreading; pods of good size and well filled; much in use, and has enjoyed a long popularity; medium late; bears a long time; height, 2 1/2 feet. Pkt., 10c; lb., 15c; 10 lbs., \$1.25

---EXPECTS SAME TREATMENT-

Gentlemen:

I have dealt with you for four years and have always received the best of attention when I sentan order. I have also found your seeds and nursery stock true to name. I cannot praise you and your stock highly enough. I hope to trade with you for time indefinite and expect to receive the same treatment as in former years.

(Sigd.) TEDDY HUTCHESON.

Gentlemen:

My seeds arrived O. K., and are all planted, and doing well. Needless to say I am far, and. away, more pleased with such treatment than the amount involved as it tends to show the strictly honest business method in vogue in the conduct of your business. FRANK CLARKE.

PARSNIPS

As the seed germinates very slowly, sow as early in Spring as possible, in drills fifteen inches apart on deeply cultivated, rich. loamy soil. Keep clear of weeds and thin to three or four inches apart. The roots of the parsnip are improved by freezing.

Early Half Long Ready in 90 days. Me Medium sized, easily dug, has a fine rich flavor—good for home gardens
Pkt.,5c;oz.,10c; ¼lb.,20c;lb.,50c

Hollow Crown or Long White

Root very long, white, smooth, tender, sugary and of most excellent flavor. Very hardy; will keep through the Winter without protection.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 50c

Guernsey. Half Long

Root white, very tender, with a smooth, clear skin. Shorter and thicker than "Hollow Crown:" desirable for stiff soils Requires about 120 days

Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 50c

PARSLEY

Very useful for flavoring soups, meats and for garnish-The green leaves are used for flavoring or they may be dried crisp, rubbed to a powder and kept in bottles until Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c needed.

Extra Double-Curled

A fine, free growing, but not large variety. The plants bear a great number of leaves, which are so abundant and so finely curled that they resemble a bunch of moss. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Turnip-Rooted, or Hamburg

The root, which resembles a small turnip, is the edible portion of this variety. Extensively grown and used for flavoring soups, etc.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Champion Moss Curled

A compact growing, finely cut and much curled variety of a bright green color.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Sow the seeds early in hotbeds; or later, when the weather becomes warm, in open beds. When two or three inches high, transplant to a warm, mellow soil, in rows eighteen inches apart and a foot apart in Guano and hen manure are excellent fertilizers and will greatly increase the yield.

NEW PERFECTION PEPPER.—Perfection is well named, as these perfect peppers are unequaled for quality and sweetness, are large smooth, with flesh 3 times as thick as in other varieties, and the skin can be slipped off by heating or boiling a little, or you can pare them like you would an apple. Growth is vigorous. Yield is heavy and continuous, bearing until frost. Pkt., 10c; oz., 50c; 1/4 lb., \$1.75.

CHINESE GIANT.—Sweet. The mildest and best of the mild red peppers. 4 to 5 inches in diameter: color, brilliant deep red; borne in clusters; bush stocky, well branched; vigorous and about as early as Ruby King.

Pkt., 10c; ½ oz., 25c; oz., 40c; ½ lb., \$1.25

NEW NOCERA.—A Giant Red Pepper of largest size; mild and very fleshy; a favorite English variety. 35c; 1/4 lb., \$1.00

Sweet or Sugar and Winter Luxury are good Pie Pumpkins

Sweet, or Sugar

A handsome and productive small pumpkin; skin, orange; flesh, deep yellow, fine grained and very sweet. This is the famous "New England Ple Pumpkin."

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Mammoth Tours

A productive French variety; grows to an enormous size. Pkt., 5c; oz., 10c; ½ lb., 35c; lb., \$1.00

Tennessee Sweet Potato

Pear shaped; flesh thick, cream white, fine grained and of excellent flavor. 50日 10 Pkt., 5c; oz., 10c; ¼ lb., 20c; lb., 65c

Large Yellow, or Connecticut Field

Large, round; deep, glossy yellow. Vines vigorous and very productive; good keeper. Grown extensively for stock feeding.

Pkt., 5c; oz., 10c; ½ lb., 20c; lb., 50c

Winter Luxury

The best flavored pie pumpkin grown; enormously productive; excellent keeper; medium size; color, golden-russet, finely netted; flesh, deep golden. sweet, tender and very thick; none better.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c

Giant of All "King of Mammoths"

This colossal Pumpkin is almost a globe in shape. The skin is of a beautiful, rich golden yellow; flesh firm, fine grained and deep yellow, sweet flavored, very thick and of excellent quality for so mammoth a variety. These Pumpkins attain an enormous size and will carry away prizes at your county fairs.

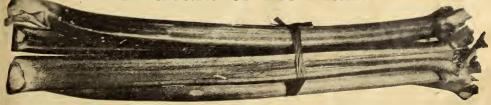

Large pkt., 10c; oz., 15c; 1/4 lb., 35c; lb., \$1.00

Large Sweet Cheese

A popular variety. Fruit flattened; skin mottled light green and yellow. Flesh, yellow, thick, tender; very nutritious and of excellent quality; a most productive variety.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c

Rhubarb or Pie Plant

CULTURE.—Rhubarb succeeds best in deep, rich, somewhat retentive soil. The richer its condition and the deeper it is stirred the better. Sow in drills an inch deep and thin out the plants to six inches apart. In the Fall transplant the young plants into very highly manured and deeply stirred soil, setting them four to six feet apart each way, and give a dressing of coarse manure each Spring. The stocks should not be plucked until the second year and the plant never allowed to exhaust itself by running to seed.

Victoria, or Mammoth

Very large; finest cooking variety.

Pkt., 5c; oz., 15c; ½ lb., 40c; lb., \$1.25

The New "Rievrside Giant"

Is the finest of all Knubarbs and the most profitable to grow. See Plant Department.

Rhubarb Roots.—From October to June we can always supply one or two-year-old Rhubarb-Roots. Customers wanting only a few dozen roots for home gardens will save much valuable time by ordering roots instead of seed. For prices, see Plant Department

FOR many years we have been growing seed Potatoes by careful re-selection, and comparative tests in various sections have shown that our select seed will produce the largest crops and more uniform salable tubers with average soil and culture, and have proven profitable and satisfactory under the conditions for which they are recommended.

The value and importance of Potatoes in rotating, and as a money crop should be more generally recognized, and to secure a ready market and increase your profits you should grow only the best standard sorts that are known to be suited to your soil and are in demand in your market. We have never known the time when fancy stock could not be sold at a fair price even when the market was overloaded.

SUGGESTIONS FOR GROWING—treatment of Seed

YOU can grow potatoes under most average conditions of soil and care, but for the big yields of shapely tubers that pay big profits it requires soil adapted to potato growing, good seed stock properly planted, and plenty of cultivating at the right time. You can make your soil fit by proper rotation and use of necessary fertilizers.

CULTURE.—Plow deep—8 to 10 inches—using a "jointer" to put all weeds and grass below reach of Harrow and Cultivator. Put the soil in good tilth—disc and use leveling harrow. Plant in rows 42 inches—ten to fourteen inches in the row if rich soil and you want to keep the size down—in poorer soils plant the hills farther apart. Early potatoes can be planted very close and good yields will result. As soon as danger of frost is over, spread the seed out thin in the sun or in a light room—this keeps back the sprouts, makes them sturdy, gives vigor and vitality to the seed, and helps kill fungus.

Cut the seed to about two eyes, planting four or five inches deep, harrowing soon after planting, and again as soon as up, and follow with a light and then a deep cultivation before the tubers begin to set. As soon as they start to form, drop away a little with your cultivator, and later on just work the surface to keep down weeds and retain moisture.

Weeds Rob the Growing Crop of Food and Moisture—and Yield no Tubers.

Treat Your Seed Potatoes

To prevent fungous diseases, Rhizoctonia, Fusarium, wilt, scab, etc., dip the seed before planting, using a solution of Corrosive Sublimate 1 part to water 1,000 parts soaking the potatoes for two hours, then spreading out to dry before planting.

CAUTION.—This solution is deadly poison, and should be kept away from animals and children. Must be made in a wooden tub or barrel—never put in a metal container.

Formaldehyde Treatment—

Soak the tubers before cutting for one hour and a half in a solution of 1 lb. (or pint) of Formaldehyde to 30 gallons of water. Formaldehyde is safe to use and is very effective for Scab but is not as good as the Corrosive Sublimate treatment for extreme stages of Rhizoctonia.

POTATOES are as sure and profitable a crop investment, and labor considered, as can be grown. And the varieties we offer (seed stock of our own growing), will produce the maximum yield of shapely salable tubers that will command the highest market prices. We can tell you the best varieties for your market and soil.

SEED POTATOES—Continued P. S. Co.'s "Earliest of All"

can be had ready for baking nine weeks from planting, and fully matured in 13 weeks

WE HAVE YET TO FIND an early potato that can compare with our "Earliest of All." Its quick growth and early maturity gives the ground for July planting, and a second crop of late potatoes or, better, some crop to build up the soil can be grown the same season. Summer drouth does not affect it, for its growth is complete before it can be injured. Planted early is ideal for "Dry Farming." "Earliest of All" was originally a selection from "Eureka" showing a marked difference in habit and greatly increased yield which years of careful reselection have firmly fixed and improved.

"EARLIEST OF ALL" is a healthy, vigorous grower not subject to blight or disease, and does not make a second growth. Keeps as well as any late potato.

A handsome, shallow eyed, white-skinned potato of the finest table quality. This is the popular Early White potato sold in the public market.

PRICES: 1 doz. eyes, postpaid, 30c; 4 lbs., whole potatoes, 60c, postpaid; by Freight or Express, per peck, 75c; ½ bu., \$1.25; bu., \$2.00; 100 lbs., \$3.00.

One hill " Earliest of All" - See back cover

Illustration of "Earliest of All" is one of 5 hills dug in a row, field run (see back cover) weight 6½ lbs. The 5 hills weighed 25 lbs. 9 oz., and shows the uniformity and splendid yield of this "Earliest of All" potatoes. THE STOCK WE GROW HAS BEEN OBTAINED BY CAREFUL and SYSTEMATIC SELECTION, COVERING MANY YEARS and TO TEST RESULTS we have repeatedly secured planting samples of "Eureka" (the parent stock) and these comparative tests have proven in every trial the superiority of our selected heavy yielding strain.

TO BE SURE of getting the genuine "Earliest of All" buy direct from our Portland store. Beware of substitutions and varieties that are "just the same".

STANDARD EARLY VARIETIES

Early Freeman

A vigorous, productive, early potato of oval shape with russet skin, fine grained, white and floury. Not quite as early as "Earliest of All," but much earlier and a far better yielder than other very early varieties. Tubers shapely and uniform, with very few small ones. We specially recommend Early Freeman as a potato of real merit. Try it. Price, mail, 1 doz. eyes, 30c; 4 lbs. whole pota-

Price, mail, 1 doz. eyes, 30c; 4 lbs. whole potatoes, 60c, postpaid. Frt. or Exp., pk., 75c; ½ bu., \$1.25; bu., \$2.00; 100 lbs., \$3.00.

Early Sunrise

The best early pink variety—earlier than Rose. about the same depth of color, not so flat but a smoother potato, a bit more slender than Rose; Sunrise is hardy, has always been free from blight, and is the best yielder of its type.

Price, postpaid, 4 lbs. whole potatoes, 60c; Frt. or Exp., peck, 75c; ½ bu.. \$1.25; bu.. \$2.00; 100 lbs., \$3.00.

Early Rose

Our stock of this popular variety is a special improved strain of our own growing; is very vigorous and extremely early.

Price, postpaid, 4 ibs. whole potatoes, 60c; Frt. or Ex., peck, 75c; ½ bu., \$1.00; bu., \$1.75; 100 ibs., \$2.75.

Early White Prizetaker

One of the finest of all early sorts; oblong in form, 4 or 5 inches in length, with white, smooth skin and few eyes. It is a very superior cooking potato, baked or bolled, cooking up dry and floury.

White Prizetaker has important advantages over other early Potatoes, as its white skin, large size and good keeping qualities make it an ideal main crop variety, that sells at the best price. We always advise early planting, as the crop will be larger and better.

PRICE, postpaid, 4 lbs. whole potatoes, 60c; Freight or Express, peck, 75c; ½ bu., \$1.25; bu., \$2.00; 100 lbs., \$3.00.

Early Ohio

We offer a select stock of this popular old favorite—from Northern grown seed—that we have grown for several years, a true heavy yielding strain—one of the best early pink potatoes.

Price, postpaid, 1 doz. eyes, 30c; 4 lbs. whole potatoes, 60c; Frt. or Exp., pk., 75c; 1/2 bu., \$1.25; bu., \$2.00; 100 lbs., \$3.00.

Early Rural

Early Rural is an extra early red, round to oval shaped potato of the finest quality—of snowy whiteness—and a clean vigorous grower maturing very early and yielding heavily.

Price, postpaid, 4 lbs. whole potatoes, 60c; Frt. or Exp., pk., 75c; ½ bu., \$1.00; bu., \$1.75; 100 lbs., \$2.75.

of All'"—is a coarser, later potato—with a purplish pink blossom.—If you grow "Cobbler" and it is the finest earliest potato you ever saw—and has a white blossom—the chances are 10 to 1 it is "Earliest of All".

SEED POTATOES—Continued

PRIDE OF MULTNOMAH—Main Crop Excels in Yield and Table Quality

PRIDE OF MULTNOMAH Potato was first offered eight years ago and is the best main crop potato for Western Oregon. During these years we have distributed it to many sections of the United States, always receiving splendid reports, and up to the present time have yet to find a variety combining so many desirable qualities.

PRIDE OF MULTNOMAH excels in yield, uniformity, and table quality, being fine-grained, of snowy whiteness, and for baking or boiling has no superior. Its skin is thin, smooth and white; eyes shallow. In form they are the ideal elongated type so much in demand by commercial growers.

also the best keeping potato we have ever known.

PRIDE OF MULTNOMAH is blight and disease resistant to a remarkable degree, and during the eight years we have grown it there has never been a crop failure. The top growth is vigorous and a mass of fine fibrous roots enable it to withstand drouth Should be planted early to insure perfect maturity and finest quality

ORDER NOW and have your potatoes when you are ready to plant. We have never had enough to fill all orders. Don't you be the one that is disappointed.

PRICE, postpaid, 1 doz. eyes, 30c; 4 lbs. whole potatoes, 60c; Freight or Express, 1 peck, 75c; ½ bu., \$1.25; bu., \$2.00; 100 lbs., \$3.00.

"PRIDE OF MULTNOMAH", named after Multnomah county, Oregon, where it originated, is a seedling of our White Prizetaker and has an official record yield of 790 bushels per acre—fine shapely potatoes—the prize acre at the Panama-Pacific Exposition. Mr. M. J. Brickley, Hamburg, Calif., also won a special medal on Pride of Multnomah at the same exposition. Our own seed crops have run from 400 to 600 bushels per acre since its introduction. It is the most profitable late potato.

SNOW POTATO

A splendld early maturing main crop Potato that gives a good yield on poor or light soll.

This fine potato, originating in Maine-a State famous for the quality of its potatoes—has proved a wonderful producer on poor soils where other

varieties would not thrive.

Given good soil and culture, "Snow" produces enormous crops of fine large, oval tubers, slightly flattened. having shallow eyes and netted skin. "Snow" is fine-grained, flaky and of excellent quality. The luxuriant vines are dark green. The potatoes grow close together with few small ones.

"Snow" is a main crop potato, but makes an early and quick growth. Try it.

PRICES: 1 doz. eyes, postpald, 30c; 4 lbs. whole potatoes, 60c; by Freight or Express, per peck, 75c; ½ bu., \$1.25; bu., \$2.00; 100 lbs., \$3.00.

A single small hill of "Snow"

SNOW" is one of the best for east of the Cascades and is used by the "DRI-FRESH" CO." at The Dalles, Ore.

SEED POTATOES—Continued

"PRODUCER"

A large smooth oval white potato with shallow eyes, of finest table quality; will not "boil to pieces," and baked has no superior; is a hardy, vigorous grower that earned its name of "Producer" on account of its enormous and never failing yield.

'Producer' is a seedling we have had on trial for several seasons, and it has always given a big crop even when conditions were very unfavorable and in dry weather. We hesitated to offer a new potato. but "Producer" has been such a success that we consider it a valuable sort-especially for dry or light soil as it will give a good yield where other varieties would fail.

PRICES: 1 doz. eyes, postpald, 30c; Whole Potatoes by mall, 4 lbs., postpald, 60c; by Freight or Express, customer's expense, peck 75c; ½ bu., \$1.25; bu., \$2.00; 100 lbs., \$3.00.

White Rose

A standard market potato in southern California, the shape being a flattened oval rather elongated, having few eyes and a beautiful creamy white skin. As an exhibition variety White Rose has won many honors, being awarded a gold medal at San Francisco, and the blue ribbon over all varieties at the Oregon State Fair, and the Benton County Fair.

Yields well, and although not an early maturing potato, it makes a vigorous rapid growth and can. be used quite early.

Stock is very limited this season, and trial orders should be placed early.

Price, postpaid, 4 lbs. whole potatoes, 60c; Frt. or Exp., peck, 75c; ½ bu., \$1.25; bu., \$2.00; 100 lbs., 3.00.

Burbank

A standard commercial variety. We can offer a splendid strain of select Burbanks, not the "runstock generally seen, but the genuine article, which is a really good potato.

Our Burbanks sold to California growers produced record crops that passed certification inspection under the new California laws.

Price, postpaid, 4 lbs. whole potatoes, 60c; Frt. or Exp., peck, 75c; 1/2 bu., \$1.00; bu., \$1.75; 100 lbs., \$2.75.

Garnet Chili

A large, late, round-shaped potato, much in mand by California growers for producing demand by California growers for producing the early, round, pink potatoes supplied to the northern markets. Its growth is so vigorous and rapid that the young tubers form very early and stand handling and shipping better than early varieties that are more advanced. A heavy yielding, sure cropper.

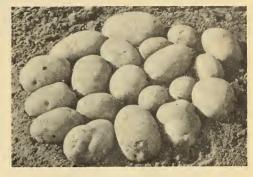

Price, postpald, 4 lbs. whole potatoes, 60c; Frt. or Exp., peck, 75c; $\frac{1}{2}$ bu., 1.00; bu., \$1.75; 100 lbs., \$2.75.

New Oregon

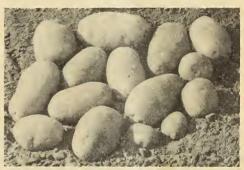

This potato is a seedling from Bliss' prize. large shapely potato of the oval type, of fine table quality and a heavy yielding, vigorous grower, well adapted to clay soils.

New Oregon was furnished to the school children for the state potato growing contest in 1913 by the originator, Mr. Kaplinger, and made a splendid record.

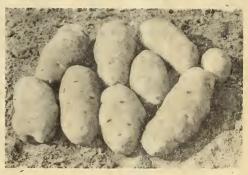

Price, postpaid, 4 lbs. whole potatoes, 60c: Frt. or Exp., peck, 75c; bu., \$1.00; ½ bu. 1.75; 100 lbs. \$2.75.

A Hill of Producer

A Hill of White Rose - A Gold Medal Potato

A Hill of American Wonder American Wonder

American Wonder is not only one of the best main crop potatoes, but is also one of the earliest potatoes grown. It is a strong grower, and great producer. Tubers white, large and uniform in size; elongated, slightly compressed, with few eyes, and is of good quality.

Our strain of American Wonder is of exceptional purity and superior quality, having been carefully grown by reselection for many years. Seed stock furnished to California growers passed certifica-

rion inspection and produced record crops.

Price, postpaid, 4 lbs. whole potatoes, 60c;
Frt. or Exp., peck, 75c; ½ bu., \$1.00; bu., \$1.75;
100 lbs., \$2.75. Write for price in quantity.

FIGURE WE GROW MANY VARIETIES OF POTATOES IN OUR TRIALS THAT ARE NOT CATALOGUED, and are prepared to grow seed potatoes to order, in car lots, from our own select stocks, or from seed stock furnished. Special terms to Dealers and Commercial Growers.

RADISHES

To secure Radishes with crisp, tender fiesh, grow them quickly in rish, locas soil, and gather before reaching full size. Our Radish Seed is strictly of the finest grade, being grown from carefully selected roots. Frequent planting should be made for succession, so that a supply of fresh, tender Radishes in the finest condition may be had at all times.

Early Crimson Giant The Largest Early Scarlet Turnip-Shaped Radish

A new, early Radish, double the size of any of the turnip-shaped type, but, notwithstanding its immense size, does not get hollow and pithy. The flesh is a sparkling white, solid, crisp, juicy and of the mildest flavor. The shape of the bulb varies from round to almost oval, but the bright, deep crimson color of the skin remains quite con-Excellent for both forcing and open ground. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., \$1.00

Early Scarlet Turnip

A small, round, red turnip-shaped Radish, with emall top and of very quick growth; very early; rich color and crisp, tender flesh.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c

Early Scarlet Turnip, White Tipped A beautiful variety; deep scarlet with white tip. Very early. Has a small top, and may be planted closely. Flesh crisp, tender and sweet. Cannot fail to give satisfaction as a forcing Radish.

Pkt., 5c; oz., 10c: 1/4 lb., 25e: lb., 7#e

DIAMOND VEGETABLE **FERTILIZER** Makes

gardening pay. See "Fertilizers".

White Icicle

This superb Radish is the finest and longest of the very early, pure white varieties. Planted in the Spring, is ready for use in twenty to twenty-five days; their long, slender form and pure, paper-white skin are most attractive when bunched for market. This Radish is not only crisp and tender when young, but also retains these qualities until the roots attain large size; is excellently adapted for forcing purposes or successive sowing in the open ground and gives a continuous supply of tender. crisp Radishes for the table or market throughout the season.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Early Long Scarlet, Short Top

This bright scarlet, small topped sort is uniformly straight, smooth, brittle and crisp, and is a standard and excellent sort for private gardens or market use.

Pkt., 5c; oz., 10c; 1/4 ib., 20c; ib., 65e

Long Brightest Scarlet, White Tipped

This is the brightest and handsomest colored Scarlet Radish known. The lower third of the root is snow white; very attractive. It is extra early and the flesh is very tender. Valuable for forcing or open ground.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c

Early Snowball

A grand improvement on the White Box or White Turnip Radish which has been so popular for several years. It is handsome in shape, very early, and has but few leaves, is of a clear white color, solid, juciy, crisp, tender and unsurpassed in flavor A good sort for forcing. Pkt., Sc; oz., 10c; ½ lb., 20c; lb., 65c

White Icicle Early, Sweet and Criss

RADISHES—Continued.

Cincinnati Market

A superior strain of long scarlet, an early, rapid grower of a deep crimson color, so clear and brittle Keeps fresh and as to be almost transparent. stands shipment-a fine market radish.

Pkt., 5c: oz., 10c: 1/ lb., 20c; lb., 65c

Improved Chartier

Roots long, tapering, and attaining a very large size. Of rapid growth; remains crisp and tender till fully grown. Color, scarlet above; shading into white at the tip. Flesh white and mild flavored.

Pkt., 5c; oz., 10c; 1/2 lb., 20c; lb., 65c

French Breakfast, or Half Long

Medium size, quick growth, crisp and tender; lower end and taproot white.

Pkt., 5c: oz., 10c: 1 lb., 25c; lb., 65c

Vhite Strasburg

One of the best large Summer sorts. It covers a long season, as it is good when quite small. roots are long, very white, crisp and tender.
Pkt., 5c; oz., 10c; 1/1 lb., 20c; lb., 60c

Lady Finger, or White Vienna

Of rapid growth and beautiful shape. Skin and flesh snow-white; very juicy, firm, crisp and tender: the finest of Long White Radishes.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 60c

Winter Radishes

California Mammoth White China

This is the largest of all radishes. ten to twelve inches long and are solid, tender and Keeps well through Winter. crisp.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c

BLACK SPANISH LONG .- Standard Winter ort; has good flavor and keeps well.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

China Rose Winter

One of the best Fall and Winter varieties; a favorite with market gardeners; bright rose color: flesh white, firm and of superior quality.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c

BLACK SPANISH ROUND .- Same as long, except shape.

Pkt., Sc; ox., 10c; 1/2 lb., 20c; lb., 75c

SPINACH

This is an important gardener's crop, of easy culture. For Spring and Summer use, sow either broadcast or in drills one foot apart and one inch deep, as early as the ground can be worked, and every two weeks for a succession.

Improved Thick Leaved. Variety which grows very rapidly, forming a cluster of large, very thick, elightly savoyed leaves of fine color, and quality when cooked. Best for market gardeners.

Savoy Leaved. Very early; of upright growth; Plant in the Autumn for Spring leaves pointed. use; grows quickly.

Prices are uniform on all varieties.

Victoria. Leaves large, tender and of good quality; good market sort.

Prickly Winter. Hardiest variety; may be sown in the Fall; seed prickly; leaves long, pointed. thick and succulent.

Long Standing. An improved variety for general use; slow going to seed.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., \$1.00

SALSIFY or Vegetable Oyster

Salsify is a nutritious and wholesome vegetable, having the appearance of a small parsnip; in flavor closely resembling oysters, for which it is, in that respect, a good substitute. It is rapidly coming into more general use.

CULTURE. - Sow early in Spring, in drills a foot apart, and when two or three inches high thin out to three or four inches. Its general culture is the same as that recommended for carrots. The roots are perfectly hardy and may remain in the ground during Winter, or may be stored in dry earth or sand.

MAMMOTH SANDWICH ISLAND .- The leading variety; produces a large crop of straight, smooth Pkt., 10c; oz., 25c; 1/2 lb., 75c; lb., \$2.00 roots.

TURNIPS-Ruta Baga or Swede

FOR feeding stock in Fall and Winter there is nothing superior to Turnips or Ruta Bagas, as they are much liked by all kinds of stock and serve to keep them in good condition. We can not too earnestly recommend farmers to increase their sowings largely, for we are sure the crop will prove remunerative.

Bangholm Pajbjerg

Danish Purple Top

This variety was awarded a first-class certificate by the Danish government for heaviest yield, having given 49 tons per acre. In shape is a little more elongated than the Globe types. This variety is recommended as the best of its class.

Pkt., 5c; oz., 10c; 1/2 lb., 25c; lb., 85c

Monarch or Tankard

This is a yellow fleshed sort, having very large, tankard-shaped roots; flesh very solid, fine grained, of fine flavor; grows well out of the ground and yields large crops.

Pkt., Sc; oz., 10c; 1/4 lb., 20c; lb., 75c

Skirving's

Enormously productive; fiesh yellow, solid and reet. One of the best for field culture. eweet.

Pkt., 5c; oz., 10c; 1/2 lb., 20c: lb., 75c

White Sweet Russian

This variety is most excellent, either for table or stock. It grows to a very large size; flesh white, solid, of a firm texture, sweet and rich; an excellent Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 75c

Improved American Purple Top

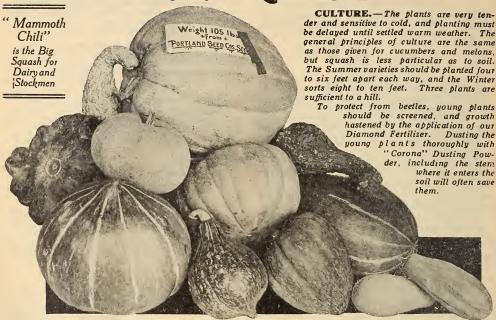

The leading standard variety, being very distinct in type, attaining a wonderfully large size; immense yielder. The flesh is very firm, superior in every way, valuable alike for all purposes.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 75c

SQUASH

Summer Varieties

Mammoth White Bush Scallop

The best Summer sort for the market: very productive and of good size.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Early Yellow Mammoth Bush Scallop

An early, flat, scallop-shaped variety; color yellow; flesh pale yellow and well flavored; very productive. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Mammoth Summer Crookneck

Early, prolific, solid, curved neck; skin yellow, thin, hard and warty; flesh tender and of good quality. Twice as large as the ordinary Crookneck and several days earlier.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

White Summer Crookneck

Similar to the Yellow Crookneck, but of a beautiful ivory white and unsurpassed quality.

Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c

English Vegetable Marrow

Oblong, dull yellow skin, very prolific and of finest table quality.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Fordhook

Oblong in shape, eight to ten inches long, with thin, yellowish skin, slightly ridged. One of the finest Summer Squashes, and if left to ripen makes a splendid Winter sort.
Pkt., 5c; oz., 10c; ¼ lb., 25c; lb.,75c

Winter Varieties

True Hubbard

The best seller and most popular variety on our list. Rind dark green, warty and very hard. Flesh light orange, very dry, sweet and rich flavored. Has no superior. Keeps perfectly through the Winter. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 85c

New Delicious

This new Fall and Winter squash resembles the old Hubbard; average weight is between five and ten pounds. Seed cavity small; flesh exceedingly thick, compact, fine grained; color, golden orange. The flesh is meaty, granulated, tender and almost of mealy dryness, cooking sweet and rich, whether steamed, baked, boiled or made into pies.

Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 85c

Boston Marrow

Skin yellowish, very thin; flesh dry and fine grained; of unsurpassed flavor.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c

Golden Hubbard

The same in size, shape and quality as the well known Hubbard Squash, except that it is a bright red or golden color, and somewhat earlier. It is also a long keeper. One of the very best Fall and Winter sorts yet introduced. Maturing before the frosts; is vigorous and wonderfully productive. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., \$1.00

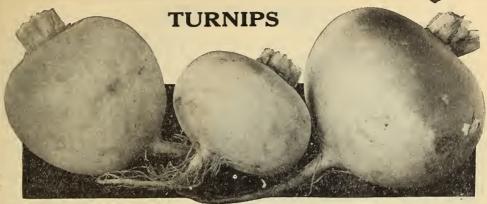

Mammoth Chili

The largest of all Squashes, growing to an enormous size, often weighing over 200 pounds, while its rich, fine flavored flesh insures its value for all purposes. Its size makes it valuable for stock Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., \$1.00

Sibley, or Pike's Peak

Shell smooth, thin and of a pale green color; the flesh is thick, solid, deep orange color; very dry, fine grained with a delicate flavor.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., \$1.00

Orange Jelly

White Milan

P. T. White Globe

FOR early use sow the small sorts as soon as the ground can be worked in the Spring, in drills fourteen inches apart. As the seed is very fine, it should be covered but slightly, except in very dry weather. For Fall and Winter use, sow the early kinds during July, August and September.

Early Garden Turnips

Early Purple Top Milan

This variety is ready for the table sooner after planting than any other yet introduced. small, erect, strap-leaved; bulb a deep purple above, white underneath; flesh white, firm and delicate.

Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., \$1.25

Early White Milan

Same as Purple Top Milan, but pure white, sweet and tender; best early market variety.

Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., \$1.25

Early White Flat Dutch

One of the very best and most universally grown. Small, erect top, round, flat; flesh, white, firm, but very tender and sweet. Of quick growth, it is soon ready for the table and keeps well.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 65c

Purple Top Strap Leaf
A leading white-fleshed variety, and one of the
best, either for the family, market garden or field It is medium size, and produces a large crop. The flesh is firm, but tender, and of a superior rich buttery flavor. A good keeper.

Pkt., 5c; oz., 10c; 2 oz., 15c; ¼ lb., 25c; lb., 75c

Early Snowball

Early round turnip, maturing in seven weeks, is of perfect form, snowy whiteness, crisp, solid and of fine flavor. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Orange Jelly
Or Robertson's Golden Ball
Undoubtedly one of the most delicate and sweetest yellow-fleshed turnips yet introduced. Not of large size, but firm, hard and most excellent flavor. Keeps well and is superior as a table variety. It is extensively used by market gardeners.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Main Crop Turnips

Danish Bortfelder

This is a superior Danish variety introduced as an improvement on Cow Horn, being a heavier vielder and growing straight. It is also sweet and fine-grained, being a good table Turnip. Shape is long and tapering, but grows well up out of the ground. Sow in Spring for Summer, and in mid-Summer for Winter feeding.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Cowhorn

Sometimes called Long White. Slightly crooked. Pure white except a little shade of green at the top. Grows half out of the ground and is of very rapid Is delicate and well flavored. Has proved itself one of the best stock turnips ever introduced in Oregon, as it is an immense yielder.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Pomeranian White Globe

One of the most productive kinds, and in good, rich soil, roots will frequently grow to 12 pounds in weight. It is of perfect globe shape; skin white and smooth; leaves dark green and of strong growth.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 65c

Purple Top White Globe

A large, globe-shaped variety; purple above the ground. It is handsome and of excellent quality, and recommended both for the family garden and field crop.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Large White Norfolk

A white variety, usually attaining a very large size. Extensively grown for stock feeding. The leaves are also used for greens. It is hardy and may remain in the ground all Winter. Yields very large crop. Pkt., 5c; oz., 10c; ½ lb., 20c; lb., 65c

White Egg

Is perfectly smooth, of a pure, clear white, growing half out of the ground, and at times to the size of a Ruta Baga, being a very choice kind for table use; of excellent flavor; sweet and mild. Pulls clean from the ground; thin, snow-white skin. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c

Yellow Aberdeen Round, medium size; light yellow.

Produces a large crop; is hardy and keeps well; flesh very firm but tender and sweet. A great favorite with the dairymen.

Pkt., 5c; oz., 10c; 2 oz., 15c; 1/4 lb., 25c; lb., 75c

TOMATOES

Chalk's Early Jewel

Large, bright red, smooth, round fruits, very deep and colored evenly up to the stem; very solid, almost seedless and of the finest flavor.

Vines are vigorous, not subject to blight, and yield fully equal to or better than Earliana.

We recommend Chalk's Early Jewel as the very best early Tomato for either market or home gardens, as it has given us uniformly better satisfaction under the varying conditions of soil and climate in the Northwest.

Pkt., 10c; ez., 20c; 1/4 lb., 60e

Tomato Culture—by Littooy Post Paid 25c.

Bonny Best

Bonny Best has given splendid results wherever tried and being early, hardy and very productive can be recommended for outside planting wherever tomatoes can be grown. It is also a good forcing variety. Fruit smooth, round, slightly flattened, solid and of a bright scarlet. Quality excellent.

Pkt., 10c; oz., 30c; 1/4 lb., \$1.00

New-Carter's Sunrise

A very early English variety of fine flavor and healthy, vigorous growth, with solid flesh and few seeds; very even, smooth and shapely. Color, bright, rich scarlet. Is also one of the best forcing varieties.

Pkt., 25c

Comet-Forcing

The very best forcing variety and a general favorits with greenhouse growers. Color is a beautiful scarlet; fruits are of good size, very smooth and uniform. We offer a select strain from inside stock.

Pkt., 25c

Ponderosa

The largest Tomato, fruits are solid and of a purplish red color, sweet and of good quality.

Pkt., 10c; oz., 40c; ½ lb., \$1.00; lb., \$3.00

THE NEWER types of hardy, prolific Tomatoes are better adapted to the cool Coast climate than the older sorts; and splendid crops are now being grown where heretofore it was thought Tomatoes would not thrive. A good plan is to try several varieties and find which is best suited to your special conditions.

CULTURE. —Sow early in hotbeds, and as soon as they have four leaves transplant into shallow boxes. Harden off, and set out as soon as danger of frost is past. An ounce of seed will produce 3,000 to 4,000 plants.

If blight appears use "Bordeaux" but it is better to use as a preventative before blight strikes the plant, and as a control measure for flea beetles, spraying the under side of follage.

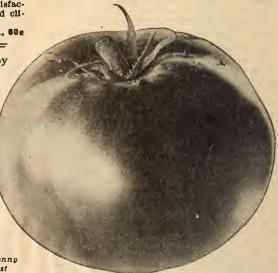

Spark's Earliana The Earliest Tomato

Of large, uniform size and beautiful red color. Ripens thoroughly all over, the stem end coloring up perfectly. Almost seedless and very solid. A most vigorous grower and heavy bearer, continuing until frost. Succeeds everywhere, and especially recom-

mended for this Coast.

Spark's Earliana is as near seedless as any tomato, giving but 12 to 15 pounds of seed to the acre. For this reason the genuine seed can never be sold at a low price.

Pkt., 10c; ex., 13c; ½ 13c., 50c

Livingston Globe One of the Best Early Tomatoes Hardy and Blight Proof

Fruits are of large, even size; very early; ripen clear through and are always smooth, firm and round; with solid meat and few seeds. Color is a beautiful glossy, rose-tinged purple; very productive. Livingston's Globe is of delicious table quality and will keep longer than any other Tomato. Is also an excellent forcing variety.

Pkt., 10c; oz., 25c; 1/4 lb., 75c

FIELD AND FARM SEEDS

HERE are many varieties of grasses and forage plants offered by Eastern seedsmen (often under new names) that will not give profitable crops in our climate, and to avoid disappointment, we refer you to the following list, which has been carefully selected and contains the most desirable varieties for general and special purposes.

A careful reading of the following pages will give you much valuable information that has required

years of observation and experimenting to obtain.

IMPORTANT, Read Carefully

Clover, Grass and Field Seeds are subject to market changes, therefore we cannot print prices good for any length of time. When ready to buy, write us for special prices, stating quantity wanted; or send in your order at catalog prices. We guarantee that we will give you full value for the money sent, whether the price at the time you order be higher or lower, or if the difference is very great we will notify you before shipment. No premiums on Grass and Field Seeds.

Single pound prices include postage. If ordering by freight or express deduct 10c per pound.

Write for prices on large quantities.

100 lb. PRICES are F.O.B. PORTLAND, and are SUBJECT to MARKET CHANGES. But-You will always get full value for money sent us.

Artichokes

There is an unlimited market for Hogs and Artichokes are the cheapest and best feed. They never fail. They are also valuable to dairymen, being cheap, and good milk producers.

Planted and cultivated same as potatoes. Of great value for feeding stock. They are the best hog feed known; are remarkable for their fattening properties, great productiveness (over thousand one bushels

having been raised on and one acre) ease with which they can be They grown. need not be dug. the hogs Turn into the field, and thev will help themselves by rooting. One acre will keep twenty to hogs in from thirty condition from

October until April, except when the ground is frozen too hard for them to root. They are said to be a preventive of cholera, and other hog diseases, and are also highly recommended for milch cows, Increasing the yield of milk and at the same time improving their condition. acre early in the Spring. Plant ten bushels per

Note.—Tubers on hand from January to May. Per lb., postpald, 15c; F. O. B. Portland, 100 lbs., \$2.00

Artichoke

Tubers

Cow or Thousand Head Kale Plants In Season

The great demand for this wonderful forage plant proves it to be the most valuable green feed for Pacific Coast dairy and stockmen; endorsed by Agricultural Colleges and Government Stations. Cow Kale should be grown in the same manner as cabbage. Make the rows 4 feet, plants 3 feet apart in the row. Can be set as late as July. Write for full information on Planting and Feeding.

Postpald, oz., 10c; 1/4 lb., 20c; lb., 60c

Flax Seed

We have a splendid lot of selected recleaned Western-grown Flax, new crop, large plump seed. Per lb., postpald, 20c; F. O. B. Portiand, 100 lbs., \$8.00

BUCKWHEAT

Buckwheat is a valuable crop that can be easily grown wherever wheat will grow, producing a good yield even on light or poor soil and under favorable conditions is very profitable, being in big demand for milling-and is also the best "Bee pasture."

Sow 36 lbs. per acre in drills, 48 lbs. broadcast. We recommend the Japanese variety.

Common, ib., postpaid, 20c; F. O. B. Portland, 100 lbs., \$4.50

SILVER HULL.—Of a light gray color, rounder than the common; has a thin husk; matures earlier and yields heavily. An excellent milling variety.

Per ib., postpaid, 20c; F. O. B. Portiand, 100 ibs., \$4.50

JAPANESE.—Ripens early—is hardy and yields the largest crops. The grains are extra large, dark brown, very thin hulled and makes the highest grade of flour. Good seed stock has been very scarce for several seasons, but we now have a fine lot which we can offer at a very low price.

Per Ib., postpald, 20c; F. O. B. Portland, 100 Ibs., \$4.50

A quarter of a ib. of seed will produce enough Kale plants for one acre.

BARLEY

BARLEY is a shallow feeder, the roots growing near the surface, and requires a rich, mellow soll. Barley responds readily to good tillage and any extra work with the disc and fine tooth harrow will be amply repaid. Do not try to grow upon poor, sandy or wornout soils, or where the ground is not in good condition or well drained. In rotation, Barley follows Corn, Peas, Potatoes, or any cultivated crop, and is the best nurse crop for starting clovers or mixed grasses. Should be planted late after ground is warm and Spring weather settled. Plant two bushels per acre. Crimson Clover planted in the Fall and plowed under after blooming in the Spring, leaves the soil in fine condition for barley.

Trial Plot of Hannchen Barley, Oregon Agricultural College.

Blue Hulless Barley Beardless

This new Barley originated at the Oregon Agricultural College and is recommended as one of the most satisfactory varieties for this section, being a heavy yielder with strong straw and makes a satisfactory and profitable crop for either hay or grain

Price: lb., postpaid, 15c; Freight or E. press F. O. B. Portland, 100 lbs. \$3.00. postpaid, 15c; Freight or Ex-

New-"Oderbrucker" Barley

This is a Pedigreed strain of 6-row barley, selected and bred by the University of Wisconsin, and is considered the earliest maturing, most prolific of all the barleys. Has a stiff straw, is rust resistant, and owing to its high protein content is a very superior feeding sort. This is the variety that was secured at great expense by the Oregon and Washington Railroad Co. for introduction in their territory. We offer the genuine stock of our own growing.

Price: Ib., postpaid, 15c; Frt. or Exp., F. O. B. Portland, 10 lbs., 35c; 100 lbs., \$2.75.

White Hulless or Bald Barley Beardless

White Hulless, or Baid Barley .- A very Early Spring variety-beardless, and of high feeding value, said to exceed corn as a pork producer. Can be fed to all live stock—especially valuable used in a mixed ration. Grain plump, heavy and when threshed is hulless like wheat. A heavy cropper. When grown and cut for hay it produces a magnificent fodder, which is very rich and almost equal of all kinds. Culture same as Common Barley.

Per lb., postpald, 15c; F. O. B. Portland,
100 lbs., \$3.00.

Common Barley

We always aim to have a nice, clean stock of good Seed Barley on hand at all times. This is the common 6-row bearded type.

Per lb., postpaid, 15c; F. O. B. Portland, 100 lbs., \$2.75.

Hannchen Barley

Hannchen is the earliest and best of the 2-rowed barleys, is drought resistant and a sure and heavy cropper. The seed stock we offer was grown by the Oregon Agricultural College, and they write: "We call your special attention to the plumpness of the seed, thinness of the hull and the ease with which the beards break off. It frequently happens that these beards drop in the field before harvest. Although a Spring Barley, the United States Department of Agriculture has successfully grown Hannchen Barley from fall seeding where the winters are mild.

Price: ib., postpaid, 15c, Freight or Express F. O. B. Portland, 100 lbs. \$3.00.

Beardless Barley

Beardless .- The earliest barley known. straw is about the height of the Common Barley, but better, and will stand up on any land; last season's seed crops averaged 65 bushels per acre, although the season was a dry unfavorable one. Sow as early as you can; frost does not hurt it. Many farmers will not grow Barley on account of the long, harsh beards which are so disagreeable in threshing although it is a profitable crop. as nearly beardless as seems possible to obtain, as beardless barleys show a tendency to produce a small percentage of bearded heads; it is about as easy to grow and handle as oats, and is the most Popular Barley grown.

Per lb., postpaid, 15c; F. O. B. Portland.

100 lbs., \$2.75.

Black Hulless Barley-Bearded Best of grains for feeding or fattening stock.

Greater food value than corn.

Black Hulless Barley will grow or Alkali soil where other grains fail. on the dry Sow the Fall or Spring as late as June 15, 75 to 100 lbs. per acre. Will yield as high as 75 bushels to the acre, weighing about 70 lbs. to the measured bushel; does not shatter or shell out easily.

When planted in the Fall its abnormal stooling habit and wide succulent leaves make it ideal for late Fall pasture; yielding a full crop the next sea-Stock prefer and thrive on it.

Per Ib., postpaid, 15c; F. O. B. Portland, 100 lbs., \$3.00.

GRAINS and GRASSES Subject to Market Changes. Write for Prices.

A "CLIPPER" Grain Cleaner improves the quality and increases the yield of any grain crop. When you buy a fanning mill BE SURE YOU GET A "CLIPPER." The mill with the "VERTICAL BLAST" Special Catalog and Full Information on Request.

THE CORN CROP in the Northwest the past season was a splendid one considering the unfavorable weather, and while the early frost, in some sections, injured the grain crop, the use of the silo and cutting for fodder protected the growers from loss and demonstrated that corn is a safe and profitable crop even under adverse conditions.

Our seed crop, of most varieties, is of excellent quality—well matured—and we can safely say that the varieties offered, being acclimated, will be found right for the purposes and conditions for which they are listed.

CULTURE. — Thorough preparation of the soil is necessary for best results, methods of culture being denermined by the different conditions of soil, climate, moisture and previous crops. The ideal soil is a deep warm one with a little sand, well drained and with sufficient humus to hold the moisture.

Deep plowing is always necessary for best results, and the heavy soils on the West side of the Cascades will give best results from Fall plowing, repeating in the Spring before seeding time. A liberal amount of stable manure and thorough tillage will help to offset the cold nights. For best results when planted for grain, plant in hills 42 inches apart, allowing two stalks to the hill. For fodder or silo, three stalks, if the ground is rich. For East of the Cascade Mountains—quoting "Farmer Smith"—"Where rainfall exceeds 12 inches and

For East of the Cascade Mountains—quoting "Farmer Smith"—"Where rainfall exceeds 12 inches and Corn is to follow Wheat, roll the stubble with corrugated roller right after harvest; then after first heavy rains, disc crossways of the rolling. If open weather, plow or disc thirty days later, allowing to lay in the rough until Spring. Ten loads of stable manure put on during the Winter or Fall will prove helpful. In the Spring when ground can be worked, disc and harrow every two weeks until May 1st, then plow deep, discing every day's plowing and harrow, roll or clod-crush to a fine well-packed surface. List 6 inches deep in 42 inch rows, kernels 12 to 14 inches apart in the rows. If Lister is not available, plant at bottom of 6 inch furrow made with a stubble plow. Five days after planting, harrow with slanting spike tooth harrow repeating every week until Corn is 4 to 6 inches high, then continue cultivating until in tassel."

Hartman Yellow Dent Corn

Grown in Oregon by Careful Reselection.

"Hartman Yellow Dent" was chosen by the O.-W. R. & N. Company for free distribution covering two seasons, as being the most promising variety for general introduction in the Northwest, it being an early Corn produced by more than twenty years of careful reselection by Mr. Hartman,

In the Willamette Valley.

The reports from the various sections where the Corn was given a trial have confirmed the judgment of "Farmer Smith," Agriculturist for the O.-W. R. & N. Comprny, and "Hartman" is now considered a standard Dent Corn for grain west of the Cascade Mountains, and is also good for silo, it having the unusual habit of maturing the ears while the stalk remains green, so that It can be cut for fodder or silo when the grain is harvested. Cob is small, ears medium to large, stalk light, allowing close planting. Our seed crop has yielded 65 bushels per acre on light hill land, '76 bushels per acre on bottom land, and 90 bushels per acre on beaver dam. We offer the original stock on the cob or shelled, in limited quantities, but orders should be placed early, as we will probably be sold out before the planting season.

Price, select ears, 20c each; \$2.00 doz. postpald; shelled, by freight or express, 1 lb., 15c: 10 lbs., 90c.

Minnesota King (Dent)—Oregon Grown

Smallest cob and largest grain. The ears are uniformly well filled out. Makes more shelled corp to a given bulk of ears than any other variety. Golden yellow and a good yielder, being a safe corp to plant west of the Cascade Mountains and in Eastern Oregon and Washington below 2,600 feet. Use flint varieties above that altitude.

Oregon Grown, 1 lb., 15c; 10 lbs. 85c. Eastern Seed, 1 lb., 10c; 10 lbs., 65c.

Oregon_Grown

Field Corn

Pride of the North Yellow Dent

Oregon Grown

See Cut

PRIDE of the North has long been the standard Corn recommended by the Agricultural Stations as the best Yellow Dent for Eastern Oregon, Washington and Idaho, and our Oregon-grown seed has given splendid results whenever conditions have been at all favorable, maturing early and yielding heavily, the foliage being luxuriant and of medium height. "Pride of the North" is specially recommended for silo. The ears are large and well filled and of a beautiful golden color.

We can furnish ears or shelled Corn of this splendid variety from our Oregon grown seed.

Oregon Grown, 1 lb., 15c; 10 lbs., 85c Eastern Seed, 1 lb., 10c; 10 lbs., 65e

Minnesota No. 13 Yellow Dent

A variety of great promise, being the earliest of the early Yellow Dent corns and reported to be the heaviest yielding. Producing splendid large ears, closely filled from end to end with bright yellow Producing splendid large ears, kernels. Has rather a thick cob and the shelled grains have a tendency to irregularity. sota No. 13" will average 7 feet high and being a a fine fodder corn, and is specially recommended for ensilage west of the Mountains. Will mature in 90 days under favorable conditions.

1 lb., 15c: 10 lbs., 90e

Oregon Grown Yellow Dent

Thoroughly acclimated seed that has given splendid returns in the Willamette Valley. Matures early and gives a good grain yield; is also a very satisfactory corn for silo.

Price: Ib., 10c; 10 lbs., 75e

Golden Glow-Oregon grown

"Golden Glow" is a well known and very popular yellow Dent corn that produces a large, handsome ear and abundant foliage—a good grain or silo Maturing a little later than Oregon Yellow Dent but earlier in this section than Minnesota 13.

This variety won First Prize at St. Paul, Minn., Corn show last winter.

Price: 151b., 10c; 10 lbs., 75c

Wisconsin White Dent

"Wisconsin White Dent" is a large handsome White Dent, extremely early and matures perfectly. and is the best White Dent Corn for Oregon and Washington. 1 lb., 10c: 10 lbs., 65e

Australian White Flint

A growing test of three seasons has demonstrated the adaptability of this valuable variety to North-western conditions. It is earlier than the well-known "Eight-Row Canada," and is to be preferred on account of its color, productiveness and very 1 lb., 10c; 10 lbs., 60e early ripening.

Champion White Pearl

A large, White Dent variety; very popular with our dairymen on account of the great amount of 1 lb., 10c; 10 lbs., 65e green feed it makes.

CLOVER and ALFALFA SEEDS

Field of Red Clover Alfalfa or Lucerne Clover

AFALFA should be cut just before coming into bloom. The hay is especially valuable for dairy cows. As soon as cut it immediately commences to grow, and during the hottest and driest weather, when other grasses are parched and withered, it remains fresh and green and grows as rapidly as ever. On the low lands it is not an unusual thing to harvest five or six crops of hay from the same field in one season without irrigation, and the same result is obtained on high, dry lands where irrigation is resorted to. It will not succeed on hard clayey soils. Its roots, in seeking moisture, penetrate to incredible depths. The seed should be sown in the Spring, after danger from freezing the young plants is over, or in the Fall, early enough to give it a good stand before frost. Per lb., postpaid, 35c; F. O. B. Portland, 100 lbs., \$19.50

Dry Land Alfalfa

This new Dry Land Alfalfa will produce large, profitable crops of hay and excellent pasture on the high, dry lands of Eastern Oregon, Washington, Idaho and Utah. Dry Land Alfalfa is especially reommended for the hills and plateaux where irrigation is impossible. It comes from the hlghest, drlest alfalfa sectlons, and is very superior seed.

Per lb., postpald, 35c; 100 lbs., \$19.50.

Turkestan Alfalfa

Will produce a luxuriant growth in the driest and hottest sections, without irrigation. It is perfectly hardy and will stand extreme cold in Winter without harm. It yields a very heavy and rich crop of hay and makes a permanent pasture. We have the genuine imported seed.

Per lb., postpald, 35c; 100 lbs., \$20.50.

Write for prices on 100 lbs. or ton lots. They are always subject to market changes. See page 42 Single pound prices postpaid, for larger lots add postage at zone rate.

Clovers

White Dutch Clover

(Trifolium Repens.)

A small variety, having a white blossom. Of a vining nature, spreading rapidly. Superior for pasture and unsurpassed for the production of honey. It also makes a beautiful lawn when mixed with Blue Grass. Per Ib., postpald, choice seed, 65c; fancy, 75c; 10 lbs., F. O. B. Portland, choice, \$5.60; fancy, \$6.25.

Red Clover

(Trifolium Pratense.)

The standard Clover for all purposes. Hardy and succeeds well on any good soil. Makes superior hay—especially mixed with Timothy—either for dairy cows or for general use. Per lb., postpald; 35c; 100 lbs., F. O. B. Portland, \$19.50; fancy, \$20.00; Dlamond fancy, \$21.00.

Mammoth Red Clover

Grows very large and is used almost exclusively for plowing under for manure. Per lb., 35c, post-paid; F. O. B. Portland, 100 lbs., \$21.00.

Bokhara Sweet or Honey Clover

(Melilotus Alba.)

A rapid-growing, white-flowered sort; excellent for bees. Sow 10 pounds per acre. Per lb., post-pald, 35c; F. O. B. Portland, 100 lbs., \$21.50.

Crimson or Scarlet Clover

(Trifolium Incarnatum.)

Highly recommended for pasture and fertilizing purposes. It is a thrifty annual, growing from twenty to thirty inches high. It germinates quickly, grows rapidly, and stools abundantly. Cut for hay when in full bloom. Planted in the Fall can be plowed under after blooming in the Spring and be followed with barley or potatoes. Per Ib., postpald, 20c; F. O. B. Portland, 100 lbs., \$17.50.

Alsike or Swedish Clover

(Trifolium Hybridum.)

A perfectly hardy perennial variety which is rapidly growing in popular favor. Excellent for hay and pasture. Valuable for bees. Resists both drought and excessive moisture. The hay of this variety is greatly preferred by some to that of Red Clover, for the reason that it is generally finer, brighter and not so dusty, making it better for horses. Per Ib., postpald, 35c; F. O. B. Portland, 100 lbs., \$19.50; 1ancy, 100 lbs., \$20.50.

Esparsette or Sainfoin

(Onobrychis Sativa.)

A deep rooting, perennial legume, extensively cultivated in dry, calcareous soils, which are too barren for Clover or Alfalfa. Sow 50 pounds per acre. Per Ib., postpald, 30c; F. O. B. Portland, 100 lbs., \$17.00.

FERTILIZE WITH

RESTORE THE NITROGEN to your worn out soil and inoculate your new ground with fresh, virile, nitrogen-fixing bacteria. YOU CAN DO IT WITH

TRADE

MARK

A pure culture of the most active nitrogen gathering bacteria.

NITROGEN is the most important and expensive plant food. The air is four-fifths nitrogenthe soil is full of air-but plants cannot absorb it without the aid of nitrogen gathering bacteria.

FARMOGERM makes this vast storehouse of nitrogen quickly available. A one-acre packet costing \$1.50 used on a leguminous crop will gather and store nitrogen equivalent to 1000 pounds of nitrate of soda and at the same time greatly increase the growing crop.

Easily applied by sprinkling the seed BEFORE PLANTING.

SEE THAT AIR TUBE?

It Supplies Fresh Nitrogen Without which the cultures will not live.

When put up in sealed bottles they soon lose their vitality, becoming inactive.

FARMOGERM is guaranteed to retain its original vitality for two years, and is the only preparation of its kind that is not sealed.

LOOK FOR THE **GLASS TUBE** "It Keeps Them Alive."

To insure a stand - Increase the yield—Build up your soil—

Always inoculate seeds of

CLOVERS - ALFALFA -PEAS - BEANS - VETCH -COW PEAS and SOJA BEANS with FARMOGERM.

An eminent authority states, "I would as soon think of preparing an alfalfa field without seed as to sow the seed without inoculation." (See Farmers' Bulletin No. 257 U. S. Dept. of Agriculture.)

FARMOGERM is prepared for Alfalfa, all Clovers, Canada Field Peas, Cow Peas.
Garden Peas and Beans, Soja Beans, Vetches and Sweet Peas.

Postpaid—Garden Size, ¼ acre, 50c; 1 acre, \$1.50; 5 acres, \$5.00 Special Sweet Pea, trial size 25c; Regular size 50c.

When ordering Farmogerm be sure to state just what you want to inoculate

NEW-ALL CROP FARMOGERM

A Combination of Beneficial Nitrogen Gathering Bacteria for all crops

For Use on FIELD CROPS FRUIT CROPS VEGETABLES **FLOWERS**

(PROCESS PATENTED)

LLCROP FARMOGERM is a new combination of seed and soil bacteria, containing 37 varieties, the combination being beneficial for all crops, and is the most recent bacteriological product offered by the famous scientist, Dr. G. H. Earp-Thomas, who has successfully segregated the good and useful bacteria and developed the cultures which are offered in a dry vehicle that will keep them active and virile for two years

Other legume cultures in a dry medium are guaranteed for but six months, and we know of no other culture that is recommended as being directly beneficial to all crops.

Allcrop Farmogerm - Increases the yield of any crop and enriches the soil; supplies the growing plant and increases the nitrogen in the soil, improving the quality of the crop. Aids decomposition of soi: particles: hastens decayed organic matter, making plant food more available.

Price, 1 acre, ½ lb. can, \$1.00; 5 acres, 2 lb. can, \$4.00

IAMOND QUALITY GRASS SEEDS are the choicest new crop seeds, recleaned and tested for purity and germination, and only those stocks that grade above the established standards are offered to our customers.

Our Special Mixtures have been carefully worked out by the tests and observations of practical experts familiar with the requirements and conditions to be met, and will give the best results possible to obtain for the uses for which they are recommended.

"Diamond" Fancy Lawn Mixture
O have a good lawn the soil must be fine and rich, and well leveled. Then the best seed obtainable should be used. Plant any time from September until late Spring, depending upon the weather and soil conditions. Raking in the seed is advisable, and rolling greatly improves the turf. In watering your lawn soak it deeply and not too often as light watering every day brings the roots close to the surface. where they quickly burn or dry out. You must not expect to make a fine lawn with cheap seed. The best lawn grass mixture will cost more at first than the poorer substitute, but it will be found much cheaper and more satisfactory in the end. Our "Diamond Quality" Fancy Mixed Grass Seed is prepared from the choicest recleaned Grass Seeds that have been carefully selected for their fineness and deep rooting. close growing habits and seasonable qualities, producing an ideal dense, velvety turf of lasting quality

that remains green throughout the year. Sow one pound to 400 square feet, 10 to 15 pounds to a 50-foot lot.

Growing tests have proved our "Diamond Quality" Lawn Grass to be superior to any other mixture for our Western soils and climate; it is also free from chaff and foul seeds, weighing 23 pounds to the meas-

ured bushel. This is a guarantee of clean, plump seeds, as cheap chaff seed is very light.

SEASIDE LAWN MIXTURE-A special mixture is required to meet the conditions on or near the coast, and this we call our "Seaside" Mixture. If your ground is very light or sandy. put on three or four inches of top soil to make a seed bed. After the grass is once up, the roots will penetrate the lower soil. Give plenty of water and an occasional dressing of our Lawn Fertilizer.

Single lb., postpaid, 35c; not prepaid, 25c; 100 lbs., \$23.50.

IAMOND TENNIS COURT MIXTURE.— DIAMOND For those who prefer a grass court, our Tennis-Court Mixture will give the best results possible as it is made up of fine, close-growing, heavilyrooted grasses that make a dense and lasting turf Single lb., postpald. 40c; not prepaid, 30c: 100 lbs., \$28.00.

Single lb., postpaid, 45c; not prepaid, lb., 35c; 10 lbs., \$3.25. ecial mix- FINE MIXED LAWN GRASS.—For use where a temporary lawn must be quickly prepared. and if kept closely cut will be lasting and have a handsome appearance. A good, clean mixture. 1 lb., postp'd, 35c; not prep'd, 10 lbs., \$2.20 DIAMOND SHADY LAWN MIXTURE.—Under

trees, on the north side, and between houses, or in any shaded place, our "Shady Lawn" will give splendid satisfaction. But in seeding such places It is best to dig the ground up well and treat it with a little ground lime-rock, or air-slaked lime (using 5 or 6 pounds to 100 square feet), as ground that does not receive the sunlight is often soured An occasional application of our Lawn Fertilizer will stimulate the growth and improve the color.

Single lb., postp'd. 40c; not prep'd, 30c; 100 lbs., \$27.00.

GOLF MIXTURES

UR GOLF MIXTURES are prepared for the special purposes for which they are intended and are so blended as to give a tough, lasting, and evergreen turf that will stand wear and rough usage.

We have had splendid success in handling the difficult problems involved in making and maintaining large plantings, and are always ready to aid in the solving of your special planting problems.

PUTTING GREEN MIXTURE.

Single lb., postp'd, 40c; not prep'd, 30c; 100 lbs., \$29.00.

TEE-ING GROUND MIXTURE.-Single lb., postp'd, 45c; not prep'd, 35c; 100 lbs., \$29.00.

DIAMOND FAIR GREEN MIXTURES.—The problems to be met in plantings of this character, covering wide areas where the soil is not always of the best, require special study, and the mixtures must be varied to suit the conditions and requirements. Call or write. Your inquiries will have careful attention and we can save you any unnecessary expense.

SPECIAL SHADY LAWN MIXTURE GROWING UNDER THE FIR TREES at HOLLIDAY PARK, Portland, Ore. See inside back cover.

"Diamond Quality"

GRASS SEEDS

Grass Seed Prices subject to change without notice. See note top of page 42.

Special Pasture Mixtures

A mixture of Grasses and Clovers, prepared especially for good, loamy soils, that will give satisfaction as a permanent pasture, or for mowing for mixed hay. For pasture, sow 20 pounds per acre. Price, postpaid, 35c per lb. By freight or ex-press, 10 lbs., 24c per lb.; 15 to 50 lbs.. 23c per lb.; 100 lbs., \$22.00.

No. 3. For Light Sandy Soll.

An extra fine mixture for sandy or light soils. This will make a good, strong turf, that under ordinary circumstances should last for many years. Sow 20 pounds per acre.

Price, postpaid, 40c per lb. By freight or express, 10 lbs., 28c per lb.; 15 to 50 lbs., 27c per lb.: 100 lbs., \$26.00.

No. 4. For Dry Land.

Mixed especially for the regions between the Cascades and Rocky Mountains, and on good, common wheat land. Try this mixture, as we believe that it will give you best possible results. Sow 20 pounds per acre.

Price, postpaid, 35c per lb. By freight or express, 10 lbs., 24c per lb.; 15 to 50 lbs., 23c per lb.; 100 lbs., \$22.00.

No. 8. For Arld or Alkali Land.

Particularly for arid alkali lands. This mixture is composed of varieties that have proven to be the Sow 20 pounds per best for the soils mentioned.

Price, postpald, 35c per lb. By freight or express, 10 lbs., 26c per lb.; 15 to 50 lbs., 251/2c

per lb.: 100 lbs., \$25.00.

No. 9. For Sowing in Shady Places or Among Growing Trees.

This is a mixture of grasses especially suitable for sowing in wooded places, being made up of varieties that are superior for such a purpose.

Price, Ib., 35c, postpaid; by freight or express, 10 lbs., 24c per lb: 15 to 50 lbs., 23c per lb.; 100 lbs., \$22.00.

No. 10. Hay and Pasture Mixture for Dry Hill Land.

Especially suited to the dry sections, such as parts of Southern Oregon, Eastern Oregon, Eastern Washington, and Idaho. This mixture is made up of varieties that can endure a great change of temperature from heat to cold, and at the same time will make a splendid mixed hay.

Price, Ib., 35c, postpaid; by freight or express, 10 lbs., 25c per lb.; 15 to 50 lbs., 24c per lb.; 100 lbs., \$23.00.

No. 11. For Grazing Purposes.

This is a mixture of grasses only, being made up for the benefit of those who wish a mixture without Clover, and will make a fine permanent pasture. but is not intended for hav

Price, lb., \$5c, postpaid; by freight or express, 10 lbs., 23c per lb.; 15 to 50 lbs., 22c per lb.; 100 lbs., \$21.00.

No. 12. For Burned-Over Bottom Land, or Land Inclined to be Rather Damp.

This is a mixture that will do well either for hay or for permanent pasture on land that is too wet for many of the grasses and clovers.

Price, Ib., 30c, postpaid; by freight or express, 10 lbs., 20c per lb.; 15 to 50 lbs., 19c per lb.; 100 lbs., \$18.00.

MIXTURES FOR BURNED-OVER LAND .- In grading and cleaning grasses and clovers, we frequently find combinations that are difficult of separation, and while the seeds are often of excellent germination and quality, they cannot profitably be separated and cleaned, so we blend them to produce pasture mixtures suitable for sowing on burns and logged-off land, which at the price are splendid values and very economical for such purposes. Price, 100 lbs., \$9.00

Crested Dogs Tail

(Cynosurus Christatus.)

perennial grass with short, narrow leaves; valuable for lawns or pastures on dry, light land; makes excellent sheep pasturage. Use 20 pounds Use 20 pounds per acre if sown alone.

Per 1b., 50c, postpaid; 10 lbs., \$4.00

Canadian Blue Grass

(Poa Compressa.)

Recommended in all pasture mixtures on dry soil; thrives well on clay or hard trodden and poor Sow 28 pounds per acre.

Per ib., 20c, postpaid; 100 lbs., \$16.00

English Rye Grass

(Lolium Perenne.)

A strong-growing, hardy perennial grass, noted for its nutritive qualities. It is equally valuable for both grazing and hay. Forty pounds per acre. For Lawns this is used and recommended by many gardeners. If sown thickly, it makes a fine

lawn, and for large grounds and parks it is very successful.

Per ib., 25c, postpaid; 100 lbs., \$11.00

Kentucky Blue Grass

(Poa Pratensis.)

One of the best grasses for permanent pasture furnishing a constant supply of the most nutritious feed during the greater part of the year Sow 28 pounds per acre.

For Lawns.—Blue Grass is used very extensively for lawns and is found in all lawn grass mixtures. Sow 1 lb., to 400 sq. feet if used alone.

Fancy, per lb., 30c, postpald; 100 lbs., \$15.50 DIAMOND FANCY, per 100 lbs.. \$18.50

Bermuda Grass

(Cynodon Dactylon.)

Suitable only for climates where the Winters are not below the freezing point. It stands the hottest and driest season. Sow six pounds per acre Per lb., 75c, postpaid; 10 lbs., \$6.00

Red or Creeping Fescue

(Festuca Rubra.)

Forms a close turf and is valuable for lawn and golf mixtures; thrives in sandy soils and along the (14 lbs. to the bushel.)

Per lb., 50c, postpaid; 10 lbs., \$4.00

GRASS SEED — Continued

Grass Seed prices subject to change without notice. See page 42. Single pound prices postpaid, for larger lots add postage at zone rate.

Creeping Bent Grass (Agrostis Stolonifera.)

Well adapted for sandy pastures near the Coast, and good for pasture on low lands. If sown alone, use 25 pounds per acre. Excellent for lawns. 12 to 15 pounds per 50-foot lot.

Per Ib., 75c, postpaid; 10 lbs., \$6.50

Rhode Island Bent

(Agrostis Canina.)
Resembles Red Top. Makes a close sod; valuable for permanent pastures and meadows. Twentyeight pounds per acre. For lawns, use 12 to 15 pounds per 50-foot lot. Gives good results.

Per ib., 65c, postpaid; 10 lbs. \$5.50

Italian Rye

(Lolium Italicum.)

A quick-growing grass, attaining a height of 2 1/2 to 4 feet; very desirable for temporary meadows or pastures (will last from two to six years). best on soils that are slightly moist, and will even stand considerable overflow. Grows easily bears an abundance of foilage that makes the best and sweetest hay imaginable. Sow 40 pounds per Per lb., 25c, postpald; 100 lbs., \$12.50 acre.

Sweet Vernal

(Anthoxanthum Odoratum.)

Valuable to put in pasture mixtures and lawn grass on account of its earliness and its delightful fragrance when in bloom. Thrives under all growing conditions, but is only recommended for use in mixtures. If alone use 28 lbs. per acre.

ANNUAL, per lb., 45c, postpald; 100 lbs., \$33.00 PERENNIAL, lb., 70c, postp'd; 100 lbs., \$50.00

Tall Fescue

(Festuca Elatior.)

Succeeds best in moist alluvial and strong clayey soils; is very productive and lasting; valuable for permanent pasture, is relished by stock and on rich land makes fine hay—height 3 to 4 feet; 22 lbs. bu.
Per lb., 65c, postpald; 10 lbs., \$5.00

Wood Meadow Grass

(Poa Nemoralis.)

Thrives in shaded situations in woodland parks or lawns where other grasses would not grow. Is early, permanent, hardy, resists heat and cold and makes a good turf, and is good for pasture; 3 lbs. to acre: 19 lbs to bu. Per lb., postpaid, 60c

Timothy

(Phleum Pratense.)

This is the most valuable of all grasses for hay. Thrives best on moist, loamy soil. Sow early in the Spring or Fall. Sow 15 to 20 pounds per acre. Choice, Per ib., 25c, postpaid; 100 lbs., \$8.50 Dia., fancy. lb., 25c, postpaid; 100 lbs., \$9.50

Orchard Grass

(Dactylis Glomerata.) One of the most valuable of all the cultivated grasses, blooming with Red Clover, and making with it admirable hay. As a pasture grass it is more productive than any other, and does best under close feeding. Sow 28 pounds per acre.

Fancy Eastern, per lb., 35c, postpald; 100 lbs..

Imported, Ib., 40c, postpald; 100 lbs., \$24.00

Red Top

(Agrostis Vulgaris.)

A good perennial grass. Generally sown for permanent pastures. Does best on moist or even marshy land. If the ground is not overflow land it is advisable to mix it with Meadow Fescue. Orchard Grass or Alsyke Clover. Sow 28 pounds per acre chaff seed; 14 pounds hulled.

CHOICE UNHULLED, per lb., 25c, postpaid; 100 lbs., \$14.00

DIAMOND FANCY HULLED .-- A very superior grade of Red Top that is free from chaff and light Per Ib., 30c, postpald. 100 lbs., \$18.50

Water Meadow Grass

(Poa Aquatica.)

An excellent pasture grass for wet situations, does well in bogs and marshes. Twenty lbs. to acre. Eleven lbs. to bu. Per ib., postpaid, 70c

Fine Leaved Fescue

(Festuca Ovina Tenuifolia.)

Grows well on dry or poor soil and is much used for lawns. Plant 30 lbs. to the acre. (Bu. 14 lbs.)

Per lb., postpald, 65c

Hard Fescue

(Festuca Duriuscula.)

Fine, rather dwarf, justly noted for its drouth resisting qualities. Valuable as a pasture for sheep. Sow 20 pounds per acre.

Per Ib., 45c, postpald; 10 lbs., \$3.25

Sheep's Fescue

(Festuca Ovina.)

Grows freely in high, dry and open pastures. Its chief merit is for sheep pasture. Thirty-five pounds to the acre.

Per 1b., 65c, postpaid; 10 lbs., \$5.50

Meadow Fescue

(Festuca Pratensis.)

Perennial; grows three to four feet high. Roots deep, thus resisting drouth. It succeeds on any ordinary soil; yields a heavy crop of superior hay; one of the best grasses for pastures, being valuable to mix with other kinds. Sown alone, use 40 lbs. per acre. Per lb., 30c, postpaid; 100 lbs., \$18.00

Tall Meadow Oat Grass

(Avena Elatior.)

Often attains a height of three to four feet by the middle of June. Makes splendid hay and thrives on sandy loam, but makes its best growth where there is some clay. Can be fed as a pasture grass, and will generally bear cutting three times. For mixing with Perennial Rye and Alfalfa for sandy soils it is excellent. Sow about 30 to 40 pounds per acre alone or half that amount if mixed with the above varieties.

Per Ib., postpald, 35c; 100 lbs., \$23.50

Cheat Seed

(Bromus Secalinus.)

Cheat yields a good crop of hay, especially on low or moist soil and will stand considerable overflow without harm. It makes an excellent hay for cows or horses, but should be cut before it gets Sow in the Fall or early Spring same as too ripe. oats, and about 100 pounds per acre.

Per lb., 15c, postpald; 100 lbs., \$2.25

Salt Bush

This wonderful forage plant will grow freely in arid and alkali lands that will produce no other vegetation, yielding a marvelously liberal foliage, which is eagerly eaten by all kinds of stock. One pound of seed will plant an acre if evenly scattered over the surface. The seed should be mixed with ten times its weight of sand or ashes to facilitate the distribution. Sow the seed in the Fall or Spring before a rain, if possible, on well pulverized soil, and cover it lightly. If desired, plants may be grown and transplanted when two or three inches high, six to seven feet apart.

Pkt., 5c; oz., 10c; ¼ lb., 40c; lb., \$1.25 postp'd Special price in quantity.

Rough-stalked Meadow Grass

(Poa Trivialis.)

A most valuable grass which flourishes in moist, rich soils. Roots are perennial, but soft; foliage freezes down.

Per lb., 85c, postp'd. Write for prices

Reed Canary Grass

(Phalaris Arundinacea.)

Will Grow on the Wettest Land You Have. A grass that will grow on stiff, wet land, even if the ground is overflowed for a month or six weeks. Makes a good hay if cut early in the season. Sow 10 pounds per acre.

1/4 lb., 35c; lb., 85c, postpaid

Rape, Dwarf Essex

One of the best forage plants, producing immense quantities of green feed when grass and other crops are dried up. Highly recommended by Professor Shaw and other eminent authorities. Has yielded ten tons of green forage per acre with a food value double that of green clover. Excellent pasture for all stock, and fine green feed for chickens. Thrives on all soils and is ready for use in six to eight weeks from time of sowing. Also valuable for plowing under. Sow same as turnips from May until September, or sow with grain. Use four pounds per acre in drills, eight pounds broadcast.

Price, 1b., 25c, postpaid. Frt. or Exp., 10 lbs., \$1.50; 100 lbs., \$13.50.

Rye, For Seed

BEARDLESS RYE .- This splendid variety is extremely hardy, yields heavily and being free from beards, is to be preferred for stock feeding. Can be planted Fall or Spring.

Single pound, postpald, 15c; 100 lbs., \$3.00 COMMON BEARDED RYE .- Planted extensively in both Spring and Fall.

Per Ib., 15c, postpald; 100 lbs., \$2.95 Write for prices in larger lots.

Sunflower

MAMMOTH RUSSIAN .- The largest and most productive variety. It makes one of the very best of foods for poultry; a great egg producer. Per 1/4 lb., 10c; lb., 25c, postpaid; 10 lbs., 70c

Mesquite

(Holcus Lanatus.)

It is usually sown on virgin soil, without cultivation, after the ground has been burned over. Sow about 35 pounds to the acre chaff seed; hulled 15 pounds per acre.

FANCY HULLED Seed, per lb., 30c, postpald: 100 lbs., \$17.00.

Wild Rice—Zizania Aquatica For Planting in Duck Ponds.

And around hunting grounds to furnish food for wild fowl, ducks, geese, etc. Fresh seed supplied Write for information and prices. in season.

Emmer or Speltz

Emmer-Triticum Dicoccum Often Mistakenly Listed as Speitz.

Similar to barley in growth, but produces two grains in a spikelet. A comparatively new and profitable crop, yielding 50 to 100 bushels of grain, or four to six tons good hay per acre. Thrives well on poor soil, and dry weather seems not to affect it. After threshing, the straw makes good feed. Sow in Spring at rate of 75 to 100 pounds per acre. Emmer is often listed and referred to as "Speltz," We offer choice, recleaned seed of the true variety. Price, ib., 15c, postpaid; 100 lbs., \$3.75

"Diamond Quality" High Grade Fertilizers

It is established beyond question that different crops remove from the soil definite amounts of different Fertilizing elements, and it is the aim in manufacturing our "Diamond Quality" Fertilizers to supply these elements in the proportion which the crops require.

We do not make a fertilizer for every crop, as many plants require nearly the same proportion of foods, and though we have named our "mixed fertilizers" after the most important crop for which they are used, they can also be applied equally as well to others, as recommended in our booklet" Pertilizers."

FARM AND FIELD SEEDS—Continued.

Prices Subject To Change Without Notice. See Page 42. Single Lb. Prices Postpaid, for Larger Lots Add Postage at Zone Rates.

Vetches or Tares—Oregon's Greatest Forage Plant

SAND, or Winter Vetches-(Vicia Villosa).-This variety thrives on poor, arid, sandy soils. is sown either in the Fall or early Spring, and is generally mixed with rye, which serves to support the plants. It grows to a height of three or four feet, and can be cut twice; first, as soon as the bloom appears, and afterward for seed. The plant is perfectly hardy and makes a very untritious food. Per lb. postpald, 30c; F. O. B. Portland.

100 lbs., \$18.50.

White Spring or Pearl Vetch

White Pearl Vetch is coming into great favor and is being extensively used for Spring planting as splendid results can be had from sowings made as late as April. The yield being fully equal in every way to that obtainable from common vetch (vicia sativa) and of fully as great feeding value.

The advantage of later Spring planting makes White Pearl Vetch specially desirable and more sure to give returns than common Vetch under many planting conditions, and it has given better results on the light sandy cut-over lands of Washington and Idaho.

Our seed crop yielded 56 bushels to the acre sown with ¼ oats. Per lb., postpaid, 20c; F. O. B. Portland, 100 lbs., \$7.50.

Lentils

Succeed best in dry, sandy soil. A leguminous annual, the seeds of which are valuable for pigeons and are used largely for soups. The leafy stalks make good forage.

Per lb., postpald, 30c; F. O. B. Portland.

10 lbs., \$1.75.

COMMON VETCH-(Vicia Sativa).-One o the best forage plants that can be grown or the Pacific Coast. Often called Fall Vetches the Pacific Coast. Often called It furnishes an abundance of excellent feed, either green or cut and cured for hay. The seed should be mixed with an equal weight of some variety or wheat, oats or rye having a stiff straw, and the mixture sown at the rate of two bushels per acre Vetches weigh 70 pounds per bushel. Sow in the Fall or early Spring.

Per Ib., postpald, 15c; F. O. B. Portland 100 bls., \$4.50.

Field Peas

Field Peas are a very profitable crop and are grown here very extensively. They can be grown alone or with oats. When planted with grain and cut green they make a large amount of very rich feed; also very valuable for enriching the soil it plowed under. The dry peas make excellent hogfeed and are quite fattening. Sow, if alone, 120 pounds to the acre; if with other grain, 60 pounds.

White Canadian

A leading kind; seed almost white; a heavy cropper.

Per Ib., postpald, 20c; F. O. B. Portland. 100 lbs., \$6.00.

Blue Prussian

Very much like the above, except in color. variety is largely sold dried for soup peas.

Per lb., postpald, 20c; F. O. B. Portland. 100 lbs., \$7.00.

Cow Peas

WHIP-POOR-WILL.—Upright, or bush growth, earliest maturing, easily harvested. Per lb., postp'd, 20c; F. O. B. Portland, 10 lbs., 85c; 100 lbs. \$7.28 CLAY.—Of vigorous growth. Excellent for ensilage; can be planted in hills with

corn. Per ib., postp'd, 20c; F. O. B. Portland, 10 lbs., 85c; 100 lbs., \$7.00 NEW ERA.—Early, prollific, of upright growth, also makes good dry fodder. Per lb., postpaid, 20c; F. O. B. Portland, 10 lbs., 85c; 100 lbs., 87.00

Millets

Sow in April, May or June, 12 to 15 lbs. for seed, or 20 to 30 lbs. for hay per acre

GERMAN OR GOLDEN .- An improved variety, yielding a larger crop of seed than the Common Millet. It is also taller than the Common, and yields a heavier crop of hay.

HUNGARIAN.-A dwarf annual Millet. It is finer than the Common or German Millets, but produces a closer stand and yields almost as much per acre as the taller varieties. Superior for hay.

NEW SIBERIAN.—New and wonderfully productive. Extremely hardy, and

about two weeks earlier than the German Millet, growing four feet in height.

COMMON.—A well known variety growing from three to four feet high; has

broad blades and strong stalks.

BROOM CORN MILLET.—Is somewhat variable in character and is divided into several varieties, one of which is sometimes called Hog Millet, as the seed is often used to feed hogs. All of this class are better adapted to produce seed than for pasture.

EARLY FORTUNE MILLET .- Has given astonishing yields of both seed and fodder. It is very early and is claimed to be rust-proof. The fodder can be fed to horses and other stock without injury, even after the seed has formed which cannot be done with safety with most of the millets. The seed is large and of a beautiful red color.

PRICES—All Varieties Single Pound 20c Postpaid.
Write for prices in larger lots—market very unsettled.

GRAIN AND FIELD SEEDS—Continued

Wonderfully productive and of great value as a forage, ensliage or grain crop in dry sections. THE varieties here offered represent the best selections and are highly recommended. are best drilled in—using 3 to 8 lbs. per acre, depending on variety and condition. Plant in the late Spring after the ground is warm. Cultivate often, throwing the earth toward the plants.

Milo Maiza

This is one of the sorghums similar to Kaffir Grows erect, with thick, close-jointed stalk. Height, 4 to 7 feet. Heads are very large, giving a heavy grain yield; is drouth resistant, and succeeds on alkali soil. Plant late when ground is warm, 3 to 6 pounds per acre.

Per ib., postpaid, 20c; 100 ibs., \$6.00

Broom Corn—Dwarf Evergreen Grows from 4 to 5 feet high and makes straw of finest quality, being almost, if not entirely, free from crooked brush.

Per Ib., postpaid, 20c; 100 lbs., \$8.00

SUDAN GRASS

The greatest drouth resisting forage crop.

Sudan Grass was introduced from Egypt in 1909 by the U.S. Dept. of Agriculture, and has given great promise of becoming a valuable addition to our forage grasses, especially in some sections. is believed to be the original

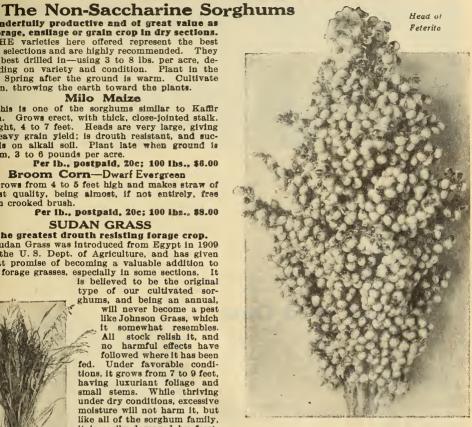

type of our cultivated sorghums, and being an annual, will never become a pest

like Johnson Grass, which somewhat resembles. All stock relish it, and no harmful effects have followed where it has been

Under favorable conditions, it grows from 7 to 9 feet, having luxuriant foliage and small stems. While thriving under dry conditions, excessive moisture will not harm it, but like all of the sorghum family, it is easily damaged by frost. The yield will depend upon the length of the season, a single cutting giving about a ton per acre, and the number of cuttings will depend upon the sea-Where growing conditions are favorable the stubble makes excellent green pasturage. In the South three or four cuttings are not uncommon.

CULTURE .- Plant in cultivated rows, in close drills or broadcast. Cultivated rows 36 inches apart require from 11/2 to 3 pounds of seed per acre, and in arid regions this is the best Where rainfall is method. ample, and it can be grown for hay, sow in drills 18 inches apart, using 6 pounds of seed per acre; for broadcast, using 15 to 20 pounds. Never sow until danger of frost is past and Cut for the ground is warm. hay as soon as fully headed. grown for seed, do not cut until the seed is fully matured, the first cutting being best for this purpose. As Sudan Grass crosses readily with all varieties of cultivated sorghums and the seed resembles Johnson Grass very much, great care should be exercised in securing only pure seed. Lb., 50c, postpaid.

Write for market price on larger lots.

FETERITA

This is the most recent of the non-saccharins sorghums to command the attention of 'dry farmon account of its wonderful yield and drouth resistant qualities, being 20 to 40 days earlier than Kaffir corn, and has given immense crops in the driest seasons without having received a drop of rain. Makes splendid fodder as well as giving a good grain yield. Try Feterita.

Per 1b., postpaid, 25c; 100 lbs., \$7.50

Egyptian Corn

Also Called Jerusalem Corn or Dhoura

One of the non-saccharine sorghums, requiring the same growing conditions. Succeeds well in dry sections. Producing small heads on side shoots up to eight on a stalk, the seed is larger than Kafflr corn. Yield is heavy. Makes fine chicken feed. Plant three pounds per acre.

WHITE, Per ib., postpaid, 20c; 100 lbs., \$6.50

Kaffir Corn

An excellent fodder plant. Grows four to five feet high; upright stalk, with numerous large leaves. Greatly relished by cattle and horses. The seed crop is also heavy, sometimes yielding 60 bushels to the acre. It does best sown in drills three feet apart, six to eight pounds per acre.

Per ib., postpaid, 20c; 10 ibs., 90c

Sugar Cane or Sorghum

EARLY AMBER .- A valuable crop to grow for fodder or ensilage, as it furnishes an immense When fed down while tonnage to the acre. young it makes a rapid second growth.

Price, postpaid, per lb., 20c; 100 lbs., \$6.28

THE production of fine seed oats has always been one of our leading specialties and we con sider them to be the most profitable and satisfactory grain crop, being indispensable to stock and dairymen, and their use as a food is constantly increasing.

Planted in season, oats rarely fail, are easily and cheaply grown, and the valuable new varieties which we offer will double the number of bushels per acre that you would get from common seed oats, which means half the cost of production, or twice the profit.

They will mature in July from Spring sowing, giving quick returns and leaving the soil in

good condition for Fall planting.

Of what other grain crop can so much be said, and what other crop is more necessary and

valuable to the dairy and stock man?

We offer select, recleaned, well-matured seed oats of standard varieties, suitable for this section, and our own varieties, "SHADELAND ECLIPSE" and "SHADELAND CLIMAX," the earliest and most vigorous, heaviest yielding oats ever grown anywhere. (See next page).

Shadeland Seed Oats

S HADELAND OATS are grown especially for planting purposes, and each year typical heads are selected in the field by hand, and from these new seed is grown for revitalizing and perpetuating the type, and maintaining the standard. The Latest Selection from the splendid strain of "SHADE-LAND" Side Oats is "ECLIPSE" an improvement over "Challenge," which in turn took the place of the original type, "Shadeland Wonder," from which famous parent the marvelous "SHADELAND Side Oat ECLIPSE" is the Third Generation by reselection.

New-Hulless Oats

MANY VARIETIES of HULLESS OATS have been tried by the Department of Agriculture, but very few yield well enough to pay the grower.

"SHADELAND" HULLESS like all SHADELAND oats yields heavily. Mr. Nairn reports that from 300 lbs. of seed 7560 lbs. of oats were harvested, and a single pound planted in a test row, 100 yards long, gave 100 lbs. of cleaned oats.

but thresh out clean, the grain being larger than the kernel of common oats and ready for rolling or milling just as they come from the cleaner, retaining all of their richness and flavor—and on "Shadeland Farm" where everybody is Scotch and expert judges of oat porridge Hulless Oats are served twice daily. You can make your own oatmeal on any*gristmill and it will also cook quicker than other oatmeals.

NEW HULLESS OATS. Stool freely, stand up well and will thrive wherever oats can be grown. They are drouth resistant and ripen in about 100 days from seeding, giving about 50 bushels per acre, weighing about 54 lbs. to the measured bushel. Sow at rate of 40 to 50 lbs. to the acre.

Give Shadeland Hulless a Trial.

Price: lb., postpald, 25c; 10 lbs., F.O.B. Portland, \$1.35; 100 lbs., \$12.00.

planting and harvesting an acre of common oats yielding 20 to 50 bushels and our record-breaking "SHADELAND" oats that give from 80 to 135 bushels per acre is about \$1.50; in other words, it costs about as much to plant, care for and harvest oats that yield only half a crop as it does to reap a real harvest.

THINK THIS OVER

Sheaf of Prize Winning SHADELAND OATS

Special Medal and Diploma, Panama-Pacific Exposition, San Francisco, 1916

Tor 14 YEARS "SHADELAND OATS" have never falled to produce a record crop—not small patches under favorable conditions but big average yields throughout entire fields such as the Polk County record of 135 bushels and 10 pounds per acre of Climax, reported by Mr. Nairn as being grown by one of his neighbors. These Oats also hold the record for weight per measured bushel, 48 lbs. (the average yield was figured by the 32 lb. standard). Mr. Scramlin of Macksburg grew 126½ bushels of Eclipse per acre last season over a 14 acre field. The record yield for Lincoln County was grown near Siletz, 125 bushels per acre over a field of 41 acres, by Mr. Raddant. These Oats weighed 44 pounds to the bushel. H. L. Stephens of Coquille grew a crop in 1909 hat ran 135 bushels to the acre; and many reports come to us of yields of 100 bushels per acre and upward.

Shadeland Eclipse—Side Oat—Is a re-selection from our famous "Shadeland Challenge," and is living up to its name by "eclipsing" all competitors, including the parent stock, being equally as vigorous and early and the massive heads are uniformly larger and filled with plump, heavy thin-hulled oats of finest milling quality.

The yield on light dry soil where our seed crops are grown, runs from 75 to 85 bushels per acre and on moist bottom land 125 bushels

per acre is not uncommon.

"SHADELAND ECLIPSE" can be planted Fall or Spring, west of the mountains (Fall plantings should be made on well-drained soil), but in severe climates early Spring planting is best. Matures in 90 to 100 days, and can always be harvested before the Fall rains. Their beautiful bright color and plumpness commanding the top price in the market. Try this grand new side oat.

Price: 3 lbs., 50c, postpaid. Freight or Express, Half Bushel. \$1.00; Bushel, \$1.50; 100 lbs., \$3.75.

Shadeland Climax—Tree Oat—For early Spring planting where seasons are short, in high, dry altitudes, and where quick growth and early maturity are demanded, 'CLIMAX' will give you a bountiful harvest of the fluest oats you ever saw. The white grains are uniformly large, plump and full with a very thin hull and are often borne 3 in a spikelet, which partly accounts for its wonderful yield.

spikelet, which partly accounts for its wonderful yield.

In our trials "SHADELAND CLIMAX" has not been injured by severe early freezing and later drouth, but has stood up, green and vigorous, yielding one hundred bushels per acre on hill land when oat crops throughout the same section were stunted and dried up.

If you live West of the Cascade Mountains you can plant "Cll-max" Fall or Spring, any time the ground is fit, but where the climate

is severe, Spring plantings are best.

Price, postpaid, 1 lb., 20c; 3 lbs., 50c; Frt. or Exp., 1/3 bu., \$1.00; bu., \$1.50; 100 lbs., \$2.75.

enator — A New Garton Side Oat — Senator is highly recommended by the originators for its extreme earliness and great fertility—

and is especially adapted to heavy land.

Report from a dry season: "SENATOR OATS drilled May 14.
on land prepared for clover, had but one or two light rains from planting until harvest. 93 days from planting. Earlier seeding would have filled them even better. They also had several days of hot winds before being bound, but threshed out beautifully, yielding 96 bushels per acre. Seeded on good land this oat will do well, and where oats are liable to lodge SENATOR will stand up—has stiff straw. Note the size of grains and the fine color".—C. D. NAIRN.

For exhibitons the large grains and big heads of SENATOR make

a fine showing.

Postpaid, 3 lbs., 50c; by frt. or exp., ½ bu., \$1.00; bu., \$1.50; 100 lbs., \$3.75.

TO KNOW that you are getting the genuine "SHADELAND"
Oats from the originator, always buy direct from
ur store. We are SOLE distributors and the vitality and true types are
laintained by intelligent, scientific care and selection. Prices are so low
lat you can not afford to risk any other seed oat.

Seed Field of "Shadeland Oats," and Mr. C. D. Nairn, the Grower.

Standard Seed Oats

Choice Recleaned Stock of the following varieties can always be supplied

Swedish Red

A comparatively new tree Oat from Sweden having a soft hull and fine soft straw which is ideal for hay. This is the Oat grown so extensively in Northern California and along the Southern Oregon Coast. Sow in Fall or Winter. Red Oats always bring a good price in the market.

Price, postpaid, 1 ib., 15c; 100 lbs., \$2.76

Black Oats

Black Oats are very hardy and almost proof, thriving on wet land as well as being drouth resistant on light soils-are much used as a hay oat from spring plantings but are best fall seeded for grain.

Price, per lb., postpaid. 15c: 100 lbs., \$2.75, f. v. b. Portland.

Challenge Side Oat

We have a choice lot of this splendid heavy yielding variety suitable for Spring or Fall planting. where the winters are not severe. A vigorous, early maturing oat that will stand up under most any growing condition and give a good yield wherever oats will grow.

Price, per ib., postpaid. 15c: 100 lbs., f. o. b. Portland, \$3.00.

White "Side Oats"

For those who prefer a side oat we offer a fine grade of recleaned white "Side" Spring oats Samples and prices on request, as the market is very uncertain and prices cannot be guaranteed to remain the same as when this catalog is printed.

Price, 1 lb., postpald, 15c; 100 lbs., \$2.50

Gray Winter

This Oat is planted extensively throughout the Northwest as a Fall or Winter Oat. Is well and favorably known, being a good yielder, and the Oats are large and plump.

Price, postpaid, 1 ib., 15c. Frt. or Exp.

100 lbs., \$2.50.

White Seed Oats

We always try to have a selected re-cleaned stock of No. 1 White Seed Oats which we can supply at market prices. Write for samples and prices or the quantity you require, or send in your order You will always get full value for money sent. Price, postpaid, 1 lb., 15c; 100 lbs., \$2.50

Swedish Select

A popular hardy tree oat that can be depended upon to give a good yield, is vigorous and remark ably free from the attack of rust or smut. recleaned seed.

Price, per lb., postpaid, 15c; 100 lbs., l. o. b Portland, \$2.75.

Treat Your Seed with Formaldehyde

A Preventive for Smut in Grain-Scab and Fungus Diseases of Potatoes

Formaldehyde is a clear chemical, resembling water, but has a peculiar odor. It is sold by the pound

t). One pound is sufficient to treat 40 to 50 bushels of oats.

The following method is in general use: To treat 20 bushels of oats requires ½ plnt of Formaldehyde diluted with 5 gallons of water. Spread the oats on a floor and sprinkle with the diluted solution. turn them twice with a scoop shovel. Allow to stand for 12 hours. Then spread to dry. Any quantity car be treated by using the same proportions. Oats thus treated will be entirely free from smut.

Prices, Pint, 40c; Galion Jug. \$2.75; Exp. or Frt., at purchaser's expense; cannot be malled.

OATS ARE A PROFITABLE CROP, easily grown and seldom fail. Prices are high and indications are that they will remain high for some time. Their value as a food makes them in big demand and our "Shadeland" seed will yield you a profitable crop

GRAIN AND FIELD SEEDS—Continued SEED WHEAT

WHEN ready to buy any variety of Seed Wheat, write us for quotations on quantity wanted or send in your order and we will give full value at lowest market price. The following are standard market varieties that are known as the most profitable and best yielding:

SPRING WHEATS

MARQUIS.—Marquis Wheat was produced by a cross of ked Fife and Hard Calcutta after a number of experiments extending over a period of nearly twenty years. It differs from the parent stock, Red Fife, inasmuch as it has a heavier head, shorter straw, and the grain is a little darker, more flinty and very heavy, weighing about 65 pounds to the measured bushel. Heads are beardless, chaff smooth.

Marquis was awarded the \$1,000 prize at the New York Agricultural Show, as the best wheat grown on the continents of North or South America; won the \$3,000 prize at the International Dry Farming Congress at Lethbridge, and Sweepstakes at Tulsa, Oklahoma, Dry Farming Congress. It is the earliest, heaviest yielding hard Spring Wheat, of splendid milling and baking quality, a hardy and vigorous grower. Try It.

PRICES: Ib., 15c, postpaid; 100 lbs., \$3.50.

BLUE STEM.—The best known and one of the most profitable Spring varieties for the Northwest. Heads are large and well-filled, stools freely. Grain very hard. Although a Spring variety, can be planted as a Fall Wheat in sections where Winters are mild. The Blue Stem of the Pacific Coast has a white grain and smooth chaff, quite unlike the Velvet Chaff and Red grains of the states East of the Rockies. Better results are had with this Wheat East of the Cascade Mountains, as it has a tendency to lodge in the moist sections on the Coast.

Price, lb., 15c, postpald; 100 lbs., \$3.25 LITTLE CLUB.—This well known variety has stiff, strong, typical club head and does not shatter easily. Has been used as one of the parents of a number of the new Hybrid Wheats. Is a good grower and yields well.

Price, lb., 15c, postpaid; 100 lbs., \$3.25
RED CHAFF.—This important variety may be grown either as a Winter or a Spring grain. Is of good quality grading close to Blue Stem as a milling variety.

Price, lb., 15c, postpald; 100 lbs., \$3.25

WINTER WHEATS

FORTY FOLD.—Forty Fold is referred to as "Gold Coin" in some sections. Is quite early, seed resembling Blue Stem. A Favorite Winter variety in many localities, and in good demand for milling.

Price, lb., 15c, postpaid; 100 lbs. \$3.25

RED RUSSIAN.—This is extensively grown in the Palouse country of Eastern Washington, where conditions are favorable. It grows vigorously, maturing late, and gives a heavy yield of both grain and foliage. It is a superior variety for choking out weeds, growing close and luxuriantly.

Price, lb., 15c, postpaid; 100 lbs., \$3.25

TURKEY RED.—A medium hard Red bearded variety; a heavy yielder and does not shatter out easily. Is very hardy, doing well in cold climates, but in moist sections has a tendency to lodge badly. The grain is hard and of good quality. A good Wheat for the dry sections East of the Cascades.

Price, 1b., 15c, postpaid; 100 lbs., \$3.25

jones winter fife.—Jones fife is grown extensively in the Northwest, being hardy and drouth resistant, and is considered the most valuable Winter Wheat for the dry sections of Eastern Washington and Oregon. A heavy yielder and good grower, in gooddemand for milling.

Price, Ib., 15c, postpald; 100 lbs., \$3.25

AULEATA.—Italian Wheat.—A fine, large hard winter wheat from Tascana, Italy. Said by the Italians to be ideal for making their delicious Italian bread. Also a superior macaroni wheat. Gluten content about 7.59%. Has given heaviest yield in Willamette Valley from February planting

This wheat should prove valuable variety for the northwest.

Price, lb., 15c, postpaid; 100 lbs., \$3.50

PRICES SUBJECT TO MARKET CHANGES

The Clipper Grain and Seed Cleaner

Recommended and used by all State Agricultural Colleges and by the U. S. Department of Agriculture

No work done on the farm brings such large returns as thoroughly preparing the grain and seed by recleaning and grading for planting. This insures an even stand of strong, healthy plants, and a larger yield of a higher grade. The "Clipper" cleaner is especially adapted to this kind of work on account of its ability to separate the small, also the light, dead seed or grain from the perfect seed or grain.

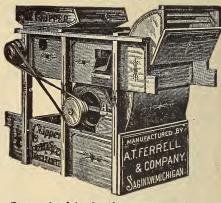

Other mills depend entirely upon screens for this work, and with unsatisfactory results. The "Clipper" screens all straw and foreign matter from the grain before it enters the air shaft, and the "Vertical Blast" does the rest.

Screens are so arranged as to be in plain view and of easy access to the operator while machine is in operation, and a set of 10 go with each mill. These are ample for general work—but special screens can be furnished for any cleaning operation

The "Clipper" is a first-class, inexpensive and

durable mill for general use.

PRICES: No. 1B.—Capacity 40 bu, wheat or 12 bu. of clover per hour. Wt, packed, 200 lbs....\$29.00 No. 2B.—Capacity 20 bu. clover seed per hour.

Guaranteed to do the most perfect work of any Hand Seed Cleaner manutactured.

Diamond Fertilizers

The Base is Bone Meal and Tankage—No Cheap Filler. Every Pound is Good Fertilizer.

IAMOND QUALITY Fertilizers are complete fertilizers of the highest grade and concentration, no inferior ingredients or cheap fillers are used in their prepara-ORTLAND tion. Bone Meal and Tankage forming the base to which is added the necessary Potash, Nitrogen and Phosphoric Acid. Each package is marked plainly, showing >SEED < COMPANY the percentage of available plant food.

SPECIAL FERTILIZER BOOKLET giving complete details and prices of the different fertilizers which we can supply, together with full information for their application, will be sent This booklet is instructive, reliable and of great value to all interested in fertilizers. on request.

Applied in quantities of 1,000 lbs. to a ton per acre, our fertilizers, with intelligent culture will sustain and gradually improve the soil and increase the yield and quality of the product, even though the crop be entirely removed and no other manuring done. The roots, vines, stubble and whatever of weeds or waste there is, all assist in providing the necessary humus. A greater amount is often used to advantage by market gardeners. Complete instructions will be found in our Fertilizer Booklet, sent free. If there is any special information you require, write us; your inquiries will have our prompt and careful attention and our experience may help you.

Being the largest dealers, we carry the most complete stock of fertilizers and fertilizing materials in the Northwest, and having installed modern machinery for regrinding and mixing our "Diamond Quality" Fertilizers, we can make immediate delivery in any quantity, ground to a fineness and blended to a mechanical perfection that make them of superior excellence. Fertilizers that are machine mixed and fined are more thoroughly and evenly blended, are more readily available and give uniformly better results than when mixed by hand.

General and Vegetable Fertilizer

An all-round fertilizer, which can be used on any crop, but is especially adapted for grain and genphosphoric acid, 7.25 per cent; potash, .60 per cent.

10 lbs., 40c; 100 lbs., \$2.30; per ton, \$43.00

Fruit and Onion Fertilizer

This fertilizer is also used for blackberries, raspberries, etc. We sell large quantities for growing the famous Hood River strawberries. Analysis: We sell large quantities for growing Nitrogen, 21/2 per cent; phosphoric acid, 10 per cent; potash, .60 per cent. 10 lbs., 40c; 100 lbs., \$2.40; ton, \$46.00

Odorless Lawn and Rose Fertilizer

Our Diamond Lawn Fertilizer promotes a vigorous, healthy growth, giving the desired dark rich green appearance; can be used at the time the seed is planted and later as a top dressing. One hundred pounds is sufficient for an ordinary city lot, and is far more effective and less objectionable than etable manure. Remember, it contains no weed When used as a top dressing it is best to seeds. make several light applications about two weeks apart.

10 lbs., 50c; 25 lbs., 75c; 50-lb. sack, \$1.25; 100 lbs., \$2.35; ton \$45.00

Sheep Guano

The best natural manure, dried and ground. Concentrated, soluble; quick in action, and free from weed seed. Splendid for vegetables; fine for roses and flowers. Excellent for lawns.

10 lbs., 40c; 25 lbs., 60c; 50 lbs., \$1.00; 100 lbs., \$1.75; ton, \$33.00.

Nitrate of Soda

For immediate results Nitrate of Soda is the very best for stimulating and forcing the growth of plants or any other crop.

Market unsettled--Prices on request.

Land Plaster, or Gypsum

Made from pure gypsum, free from clay or other foreign matter. This is especially valuable for clover crops.

10 lbs., 25c; 100-lb. sack, 90c; ton, \$11.00

Lime Rock-Fine Ground

This is the form of lime recommended by the Use ½ to 1 ton per acre. 100 lbs., \$1.00; ton, \$11.50 Agricultural Dept.

Superphosphate

This is a concentrated form of phosphoric acid, and it is actually the cheapest form in which to buy phosphoric acid. Our present stock contains 17 to 18 per cent available phosphoric acid.

Per lb., 5c; 100 lbs., \$1.40; ton, \$26.00

Bone Meal

Fine ground, is one of the best fertilizers. is the only grade of Bone Meal, and is reduced by improved machinery to an even fineness—nothing is added. This is a very valuable enricher of the soil, and one of the most economical at present prices. 5 lbs., 25c; 10 lbs., 40c; 100 lbs., \$2.50; ton, \$46.00.

Blood Meal

Blood cooked, dried and finely ground, a quick-acting fertilizer, analyzing very rich in effective nitrogen; in fact, the nitrogen of Dried Blood is one of the most effective forms of organic nitrogen known. This also carries some phosphorus; is a strong fertilizer, a little going a long way.
5 lbs., 30c; 10 lbs., 50c; 100-lb. sack, \$3.85

Tankage

Ground meat scraps and bone, dessicated in a vacuum, is very rich in phosphoric acid and nitrogen. Per 100-lb. sack, \$2.10; ton, \$39.00

Fish Guano

Fish cooked, dried and ground is a strong fertilizer, rich in nitrogen, carrying considerable phosphorus and used largely by vegetable growers. We do not recommend this for lawns or city use, as odor is objectionable.

100 lbs., \$2.75; ton, \$50.00

A 100-pound Bag of High Grade Commercial Fertilizer will contain more soluble and available plant food than 4,000 pounds (two tons) of stable manure of average quality. How much ecleaner to handle one 100-pound bag than 2 tons of manure, and there are no weed seeds to worry over. How much easter and

FERTILIZERS—Continued

DIAMOND PLANT FOOD

For Ferns, Palms and House Plants. Clean, Odorless, **Highly Concentrated**

A complete, highly concentrated, powerful fertiliser, clean and educless, wonderfully invigorating to all plants; producing luxuriant foliage and larger and more brilliant flowers. A 25c package will feed a dozen large plants a whole year. Special instructions on each package.

Price: 1/4 lb. pkg., 15c; by Mail, 25c; 1 lb. pkg., 25c; by Mail, 40c

Our fertilizers contain generous supplies of vital plant food. highly concentrated and readily available, small quantities only are needed for the production of the finest crops. THEY ARE QUICK IN ACTION, RELIABLE AND ECONOMICAL.

FARMOGERM is a practical success. A \$1.50 package used on a leguminous crop will produce as much nitrogen as 8 tons of manure. See Page 47

MCWHORTER'S FERTILIZER DRILL

McWhorter Fertilizer Drill No. 21

For the Practical, Superior Distribution of Commercial Fertilizers-Simple in Construction, Easily Understood and Effective in Operation.

This machine needs no defense or praise from us. Wherever own, it is pronounced the best. Has a force feed without fricknown, it is pronounced the best. tion; does not require that degree of dryness in the fertilizer necessary to all other distributors we have seen; is so arranged that the fertilizer can be applied in any manner that may be desired, as the operator has perfect control of the spread and division of same, any change for that purpose requiring only a few seconds.

It will distribute the fertilizer in one or more furrows beside the growing crop or broadcast to any extent up to a uniform spread of over two feet, without removing or adding any part or loosening a bolt, and in any quantity from a few pounds up to forty or more pounds to the hundred yards of row, or from 200 pounds to over a ton to the acre. We call special attention to this ability to spread the fertilizer with this machine. It is a highly important feature and will be appreciated by the thinking farmer. A decidedly wrong thing is to apply the strong fertilizers of the present day without sufficiently spreading and incorporating them with the soil. Shipping weight, 61 pounds. Price, complete, \$13.00

FERTILIZING ELEMENTS

Nitrogen

NITRO GEN is necessary for the production of plant life, and without it there can be no plant rowth; it is a powerful stimulant, and, when present in excess, causes a rapid and excessive, but watery and unnatural growth, which is made at the expense of fruitfulness. Too much nitrogen on wheat shows ts ill-effects in such a rank growth of the plant, and later, of straw, as to be unable to sustain its own weight until the grain is matured; on hops, by great growth of plant and but few blossoms, which mature fewer burrs; on fruit trees by a rapid and sappy growth which produces little fruit.

Leguminous crops (such as clover, beans, peas, etc.) draw their supply of nitrogen principally from he air, and, therefore, an artificial application of nitrogen fertilizer to this class of plants is rarely needed.

Phosphoric Acid

PHOSPHORIC ACID is necessary for the healthy growth of plants, and is essential to the best production of straw and seed. Its deficiency in a soil is shown by the want of vigor in its plant life. To produce its full effect, however, it must be used on a soil already rich in nitrogen, or be associated with nitrogen in the fertilizer; otherwise it will produce a tall, pale and spindling growth of straw with very small increase of grain or fruit. It has a marked effect in hastening maturity and should be used freely on all crops which should be ripened early and is especially useful for increasing ill crops of seed grain.

ACID PHOSPHATE contains large quantities of lime, which is valuable on such soils as would be improved by the use of land plaster, while bone also contains nitrogen, which gives it an additional ralue.

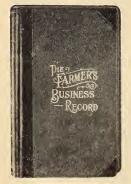

Potash

POTASH is found in all plants, in greater or less quantity, in all soils. It is essential to the ievelopment and growth of the plant. In combination with Nitrogen and Phosphoric Acid, Potash considers to the full and perfect development of plants. Excess of Potash does not show any special effect in the plant, but a weakened growth, a lack of fruitfulness, and especially a slow and unsatisfactory tevelopment of starch and woody fiber, follows its deficiency in the soil.

BOOKS

Books are the inspiration, the authoritative guide, that enable you to command success, and you should have the standard references on the subjects in which you are interested.

FARMER'S BUSINESS RECORD

A simple complete system of business accounting in one convenient book.

Arranged by special rulings and headings so that only the figures need be recorded. Gives a complete record of every transaction. Requires no knowledge of bookkeeping—so simple that any one who can make figures and read can keep this perfect record and know to a cent how much the profit or loss is for the year, and can compare this year's records with last or any previous year or month. This wonderful book will hold your records for twenty years; also contains a fund of priceless information, valuable tables, weights and measures, formulas for stock remedies and foods, forms for contracts and business and legal agreements.

The most simple, complete, systematic method for placing yourself and farm on a business basis.

PRICE: The regular price of this valuable book is \$3.75. By special arrangement, we are able to introduce it to our customers for \$2.50 or \$2.75, postpaid, or will give this complete system as a premium with a \$25.00 order.

RAFFIA

FOR BASKET MAKING

Raffia weaving has become very popular. Baskets, jewel boxes, shopping bags, mats, cushions, slippers and hats are but a part of the many useful articles woven.

In ordering raffia by mail, be sure to add postage.

RAFFIA.—Natural color. PRICE: 1/2 lb., 10c: post-paid, 15c: per lb., 30c.

COLORED RAFFIA.—Any shade, the popular colors being red, green, yellow, orange, brown, black, blue and purple. Per pkg., 15e; per lb., \$1.00.

SAMPLES showing colors of Rama sent for 2c to cover postage.

BASKET MAKING Tells how to use Raffla and Reeds. 25c postp'd

REEDS—For Weaving and Baskets

REEDS are used in the weaving of Baskets, covering Flower Bowls, Vases, etc., and are also useful as a foundation for raffia work baskets and handles.

We have been fortunate in securing a fine stock

and offer the five most useful sizes.

"DIAMOND QUALITY" **FLOWER SEEDS**

FLOWERING plants are enjoyed by everyone, and cut flowers for home use or flowering plants for garden display can easily be grown; their care is a pleasant and healthful diversion, and for the small expense of time and money nothing will return so much pleasure and profit. If you have any planting problems, if you wish to produce special effects or work out color schemes, write us: we will be glad to assist you in every way possible, and our experience is at your service.

医囊膜囊囊膜皮肤 经收收帐 医克克氏氏管 法人,不知识的证据是其实是是有关的,他们或许有什么可以是是这种的是是是是是是是是是是是是是是是是是是是是是是是是是是

CULTURE.—Cultural directions are printed on the back of nearly all packets. Flowers usually succeed best in a sandy loam, made rich with well-rotted manure, which should be made fine and thoroughly mixed with the soil. A soil thus prepared will remain moist and loose, so that flower seeds, which are generally small and delicate, will germinate and grow with vigor.

After the plants are up they require plenty of air and moisture, but they must not be too wet or they will "damp off." When large enough to transplant, put them in boxes or pots, giving them plants of room, then when the ground is warm enough to put them outside each plant will have

plenty of room, then when the ground is warm enough to put them outside, each plant will have a nice clump of roots. But if they are left in the seed bed and are close together, they will be weak and will not thrive.

A common mistake with flower, as well as other seeds, is planting too deep. A good rule is to plant the same depth as the thickness of the seed, and always press the soil down firmly, as this helps the seed to secure a firm hold and also retains the moisture.

A-hotbed or cold frame is very convenient to start seeds in, as the temperature and moisture can be so regulated as to make their germination and rapid growth more certain. Most seeds do well if sown in boxes in a sunny window in the house.

Plants are usually ready to be transplanted when they have made a growth of two inches.

INFORMATION THAT WILL AID IN SELECTION OF FLOWERS.

Annuals bloom and ripen the first year and then they perish. Many annuals in warm climates, or when taken in, or protected during Winter, become perennial, with short lives.

Hardy Annuals, Biennials and Perennials can be sown in the open ground early in the Spring if desired, and Hardy Biennials and Perennials do not require any protection in Winter.

Perennials flower several years in succession.

Blennlals do not generally flower the first year, and are in their perfection the second year.

Half-Hardy Annuals, Biennials and Perennials should not be sown in open ground until settled warm weather, though they can be sown in the house, if desired, early, and afterwards trans-planted. The two latter need to be protected in Winter, or carried over until Spring in cold frames or greenhouses.

For the convenience of our customers we have grouped annuals together—separating them from the Biennials and Perennials, and have arranged a classified list giving color and habit of flowers and plants to aid in selections for special effects. See Page 83.

"Diamond Quality" SWEET PEAS

Sweet Peas Head the list as our most beautiful and popular annual

UR Famous "Diamond Quality" Sweet Peas are selected with critical care and we offer the best productions of the foremost growers, including the latest, most valuable novelties. We conduct careful trials, and, for quality and assortment of varieties, our stocks are unsurpassed. Although we list only those we consider best, we can supply any variety in commerce, and special orders will receive careful attention.

CULTURE.—First and most important, plant as early in the Spring as the conditions will permit. If the ground is well drained earlier flowers can be had from Fall plantings. The ideal soil is cool, moist, and well drained, and should be dug up the previous Fall, manure well worked in, and left to lie in the rough through the winter. In the early Spring work this down enough to plant, which can be done before conditions will permit working of ground that has not been previously prepared. This gives an earlier and better start than if you wait until Spring to work your soil, but the late Spring plantings will often give very satisfactory results in some sections.

Seeds should be sown at the rate of one ounce to fifteen feet. Make a trench about three to four inches deep, planting the seeds in the bottom about two inches deep, pressing the soil down firmly. After the plants are well up, thin to four or five inches apart, and draw the soil around them until the trench is filled above the level. This gives a depth to the roots, preserving the moisture. Keep the ground well worked and water if needed, an occasional thorough soaking being better than a daily sprinkling. Keep the flowers cut close and a pruning of the tips of the vines will also aid in prolonging

the season of bloom and insuring better flowers.

SWEET PEAS Continued

New-EARLY FLOWERING

Long-Season Spencer SWEET PEAS

A Cross of Early GRANDIFLORA and SPENCERS-of fixed color and type

SIX WEEKS EARLIER than the Spencers. these new early-flowering varieties begin to bloom 106 days from planting in the open ground and flower through a long seasonabout 4 months.

New Early-Flowering Spencers are said by the originator to be perfectly fixed as to type and color and should not be confused with the Christmas or Winter-Flowering varieties generally listed. We give originator's descriptions of the 5 varieties we offer:

Early Morning Star

The most distinct and beautiful of its color and class-a deep orange scarlet or flame color standard, with orange pink wings—having about the same shades and brilliancy as "Thomas Stevenson;" is resistant to sunburn and the magnificent flowers are borne 3 and 4 on a stem in the greatest profusion. A-profitable florists variety; is especially attractive under artificial light. Pkts. only—Each 25c

Early Melody

A lovely rose pink on white having the dainty coloring and general appearance of "Countess Spencer," very floriferous, the Countess Spencer," very floriferous, the blooms being mostly fours on fine stems. Pkts. only-Each 25c

Early Spring Maid

Color a light pink on a cream ground; a flower of great beauty and refinement; the large blossoms. 4 on a stem, make this a most attractive and desirable variety.

Pkts. only-Each 25c

Early Snow Flake

The best of the "Early White Seeded Spencers"—a beautiful white for commercial growers. The flowers are very large, beautifully waved and borne in greatest profusion on long stems.

Pkts. only-Each 25c

Early Spring Maid

== "Wonderful Success"=

Sept. 26, 1916.

Dear Sirs: Glad to say have had wonderful success with my Sweet Peas from your seed. Over four months of continuous blooming and excellent size and color, too. Athena M. Edwards.

Early Heather Bell

Very large graceful flower of finest Spencer form, borne 3 and 4 on long, strong stems. Color is a lovely, rich mauve-changing when cut to a beautiful mauve lavender. Valuable as a cut flower and profitable variety for florists

Pkts. only-Each 25c

JOIN THE OREGON SWEET PEA SOCIETY.

Cup—value \$60.00—for the best eight Spencer varieties in vases of ten or more stems each. Only amateurs who are members can compete, so every member has a chance to win. The Society's Exhibitions are one of the big control of the big annual events in Portland, and every lover of Sweet Peas should be a member. Your inquiries addressed to us will be promptly referred to the secretary.

Fifty cents will pay all dues for one year. Send us your application.

1917 DIAMOND COLLECTION

OF OREGON GROWN SWEET PEAS

PRICE; Eight packets-One each, 65c

- record rose in the state of the
- "MARGARET ATLEE".—The most perfect of the Duplex type yet produced. Color is a warm salmon plnk suffused over a cream ground. The cream deepens into a bright buff at base of standard and wings. Flowers are of very large size and are borne almost uniformly four on a stem. Certificate of merit. Pkt., 10c; oz., 35c
- white; of perfect Spencer type; the immense petals gracefully frilled—are a pure white of wonderful substance. King White has the most enthusiastic endorsement ever accorded a sweet pea.

 Pkt., 10c; oz., 35c
- ROYAL PURPLE.—A rare new shade in Sweet Peas. a rich purple, almost a true royal, a color that does not exist in the Grandiflora type. Pkt., 10c

WEDGEWOOD.—A true self—being a beautiful Wedgewood blue; entirely free from the purple shading found in other blue Spencers. Wedgewood is also larger, grows more vigorously, and blooms more freely than other blues. Certificate of merit.

Pkt., 10c

THOMAS STEVENSON.—The most brilliant orange scarlet, standard of deeper color than the wings. The flowers are of the finest Spencer form and generally come four to the stem.

Pkt., 10c; oz., 65c

- vermilion brilliant.—An intense pure scarlet self-color of rare beauty and substance. Absolutely sunproof. vermilion brilliant is the finest flower of its color. A stocky, vigorous, grower, profuse bloomer, the long, strong stems 'carry four perfect flowers. Pkt., 10c; 0z., 65c
- ORCHID.—Extra large flowers borne 3 and 4 on long, strong stems; color a true deep Orchid lavender, a new color in sweet peas—Orchid is vigorous free blooming and was awarded a certificate of merit.

 Pkt., 10c

New Spencers

A Splendid Collection, including the Best of the Recent Novelties

THE new "Spencer" type has lovely waved and fluted flowers of gigantic size, and in exquisite colorings length of stem, and lasting qualities are much superior to the older types. "Spencers," however, are very shy seeders and require much careful selection to develop fixed types. The seed is therefore scarce, and cannot be cheaply produced.

ILLUMINATOR.—A brilliant orange-salmon ground, illuminated with bright cerise pink; a rare and wonderful color combination of great beauty. First class certificate. Pkt., 10c

AMERICA--Spencer.—The largest and finest of its class. Pure satiny white, striped and splashed brilliant crimson; 4 flowers of perfect form borne on long stems.

Pkt., 10c: oz., 35c

APPLE BLOSSOM SPENCER.—A truly giant flower; color standard rose with deeper veining, wlngs light carmine, ground color primrose.

Pkt., 10c; oz., 35c

ASTA OHN.—Lavender, suffused with mauve; of perfect form, largest size, 4 blossoms on long, strong stems; very vigorous. Pkt., 10c; oz., 35c

CONSTANCE OLIVER.—A clear, rich plnk on cream ground; of true Spencer type; best of its color.

Pkt., 10c; oz., 35c

- COUNTESS SPENCER--Pink.—The first Sweet Pea of the Spencer type. Flowers extremely large, beautifully expanded, crumpled and waved. Color silvery white, suffused and tinted with soft shell pink, deeper at the outer edges. Pkt., 10c; oz., 35c
- DAINTY--Spencer.—A pure, glistening white with distinct margining of bright rose pink; comes four blossoms on long stems. Dainty is all its name implies and is the best picotee edge yet produced; very large and wavy. Pkt., 10c; 0z., 35c
- CAPTAIN OF BLUES SPENCER.—A Spencer type of the Captain of Blues Grandiflora. Standard of flowers bright violet-purple, wings lavender blue. Pkt., 10c; oz., 35c
- FLORA NORTON.—Bright blue with just a tinge of purple, fine Spencer form.

- ground, a rare beauty; vigorous and very free blooming; classed as the best pink Spencer by National Sweet Pea Society of England.

 Pkt., 10c; 0z., 35c
- "DUPLEX CREAM".—The standards are large, bold and beautifully curved. A vigorous grower and produces many fours. cream. Color a deep rich Pkt., 10c; oz., 35c
- GEO. HERBERT.—Our own select strain; a bright rosy-carmine, open form, beautifully waved; a magnificent, vigorous Sweet Pea of giant size.

 Pkt., 10c; oz., 35c
- HELEN LEWIS.—A giant flower of perfect form; standard rich crimson orange, wings orange rose; open form, full, wavy. Pkt., 10c; oz., 35c
- KING EDWARD SPENCER.—Bright crimson scarlet, largest size, wavy standard; drooping wings, very long stems; one of the finest bright reds.

 Pkt., 10c; oz., 35c
- MARJORIE WILLIS.—A brilliant rose carmine of the Marie Corelli class and considered a better flower, of the finest Spencer form, the long stems carry four well-placed flowers; one of the best.

 Pkt., 10c; oz., 35c

MAUDE HOLMES--Spencer.—A brilliant sunproof crimson of the largest size. Of true Spencer form, wavy and fluted. Pkt., 10c; oz., 35c

- MRS. ROUTZAHN.—Color, a soft straw tinted with blush pink, shading to apricot and rose at the edges, with a distinct rose margin; of immense size; one of the finest Spencers.

 Pkt., 10c; oz., 35c
- MRS. WALTER WRIGHT.—A distinct bright shade of rosy mauve, extra large, fine flower, waved and ruffled, vigorous and free-flowering, Pkt., 10c; 0z., 35c

Pkt., 10c; oz., 35c

SPENCER SWEET PEAS—Continued

Duplex Type of Sweet Pea.
See "Margaret Atlee" and "Duplex"

OTHELLO SPENCER.—Very deep maroon of largest Spencer type; wings very wavy, large graceful flower; best of its color.

Pkt., 10c; oz., 35c

PARADISE IVORY.—A grand ivory white Spencer of the finest form. Large flower of good substance on long stems. A vigorous, tall grower.

Pkt., 10c; oz., 35c

PRIMROSE SPENCER.—Color. a true primrose.
Very vigorous, free-flowering, excels in beauty of form, length of stem and keeping qualities.

Pkt., 10c; oz., 35c

QUEEN ALEXANDRA--Spencer.—We will all welcome Queen Alexandra in Spencer form. An extra fine intense scarlet, sunproof Sweet Pea. Of large, full. waved form. Free-flowering and vigorous. Pkt., 10c; oz., 35c

SENATOR — Spencer. — Of finest Spencer form and largest size. The coloring is a combination of deep claret and chocolate, striped and flaked on a light heliotrope ground. The coloring, though dark, is brilliant and attractive. A free-flowering, vigorous grower of greatest merit.

Pkt., 10c; 0z., 35c

stirling stent.—Color, a deep salmon suffused with orange. The flowers are of supurb Spencer form, particularly effective by artificial light. First class certificate and silver medal from the National Sweet Pea Society of England.

Pkt., 10c; 0z., 50c

WHITE SPENCER.—A pure white flower of enormous size. beautifully crinkled and fluted, of splendid substance. Pkt., 10c; oz., 50c

To produce a luxuriant dark green velvety lawn, sow DIAMOND FANCY MIXED LAWN GRASS and fertilize with DIAMOND LAWN and ROSE FERTILIZER

Sweet Peas in Mixture

Diamond Mixture

This is the most perfect blend of the finest named varieties it is possible to produce. As formerly, this mixture will contain the novelties of the preceding season, and the addition of the rare Spencer types will make this the grandest mixture of new, large-flowering Sweet Peas we have ever offered. It will delight the most critical; if you are undecided as to the varieties or colors you want, buy the "Diamond Mixture."

Sold in 1-oz. sealed pkts. only, at 15c each; 2 for 25c; 12 for \$1.25. Not sold in bulk.

Extra Mixed

Select standard varieties of the finest colors. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 60c; lb., \$1.00.

Our Superb Mixture True Spencers Only

A splendid mixture, carefully proportioned and blended to produce pleasing and harmonious combinations of color, containing the most beautiful shades and variations of the wonderful Spencer type.

These are not seedlings, but carefully selected named varieties that retain all their purity and brilliance of color.

Pkt., 10c; oz., 30c; 1/4 lb., 85c; ib., \$2.50.

Special Mixtures to Order

If you want to produce any special effect or color scheme, let us know your requirements. We can supply the correct color or mixture.

For Perennial Peas, See Perennial Flower Seeds.

DIAMOND PLANT FOOD =

For Ferns, Palms and House Plants. Clean, Odorless, Highly Concentrated
Produces Luxuriant Foliage---Brilliant and Lasting Flowers. A 25-cent package
will feed a dozen large house plants a whole year.

Price: ½-lb., Pkg., 15 cts. Postpaid 25 cts. 1-lb., Pkg., 25 cts. Postpaid 40 cts.

SWEET PEAS-Continued

"UNWINS"

Splendid New Sweet Peas in this Popular Class

THE "UNWINS" resemble the Spencer type, although being of entirely different origin. They are not quite so large as the Spencers, but of fine form and substance, very vigorous and freeflowering, and always come true. In this respect they are superior and more dependable than Spencers, which often "sport" in the most unaccountable manner. For substance, color and bloom, Unwins are unsurpassed.

PRICE, except where noted, Pkt., 5c; oz., 25c.; ½ lb., 75c.

NORA UNWIN--White.-A grand pure white of the same beauty of form, waved and fluted standard and wings as Gladys Unwin. Award of merit at the trials of the N. S. P. S., Reading, England; one of the finest whites.

ST. GEORGE.-Brilliant orange standard, the large wings a distinct orange carmine; does not burn in the sun; one of the best orange shades,

FRANK DOLBY .- Color, delicate light lavender of great beauty, bold, wavy standard with widely spreading fluted wings.

GLADYS UNWIN--Light Pink.-A large, bold flower, not hooded, but with standard and broad wings, of the new orchid-flower type, this is similar to Countess Spencer, but several shades lighter in its lovely pink color.

GRANDIFLORA TYPE

Select List of Finest Large Flowering Sweet Peas, The Best of Their Color and Type

Prices, unless otherwise stated, 5c per pkt.; 15c per oz.; 40c per 1/4 lb.; \$1.25 per lb., postpaid

Red, Scarlet and Maroon

QUEEN ALEXANDRA.—An intense bright scarlet of grand substance; a bold, robust flower of giant size and finest form, is sunproof, very vigorous and free-flowering.

KING EDWARD VII.—A lovely, intense crimson.
A truly giant flowered variety. The finest crimson to date. Strong stems and growth.

PRINCE OF WALES .- Rose crimson. Fine sort. BLACK KNIGHT .- Large size; a rich, dark claret; almost black; somewhat veined.

Pink - Deep Shades

JANET SCOTT .- A large, grand flower; deep, rich pink.

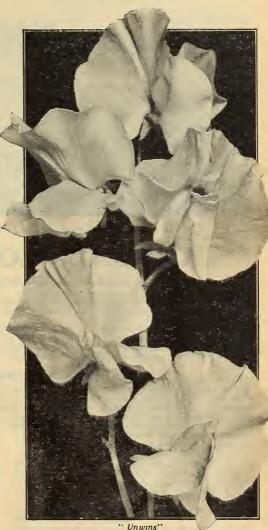

Pink - Light Shades

DAINTY .- Large flowers, white with pink edge. PRIMA DONNA .- A most beautiful bright shade of blush-pink. Flowers of a large size, and finest form.

Blue and White
HELEN PIERCE.—The most beautiful bright shade of true blue mottled on a brilliant pure white ground; 3 or 4 blossoms on a long stem. A grand flower of the largest size; very free and vigorous.

White

DOROTHY ECKFORD .- Pronounced by Sweet Pea experts to be the grandest pure white yet seen of the grandiflora type. Grows an enormous mass of bloom.

Cream or Light Yellow

MRS. COLLIER .- A true primrose of fine form.

Orange and Salmon

MISS WILLMOTT .- Described as an "orange pink" delicately shaded rose. Enormous flowers, borne erect on long, stiff stems.

LADY GRISEL HAMILTON .- Most attractive light lavender shading; flowers of large size.

Blue and Purple

LORD NELSON, or "BRILLIANT BLUE."-A brilliant dark navy blue with tips of wings a lighter blue. Giant flowers, slightly hooded.

Oregon Aster Field - Where Some of Our Stocks Are Grown

ANNUAL FLOWER SEEDS

And Those Generally Used as Such

HARMING effects for every planting purpose can be had at very little expense by the proper planting of Annual Flowers, Vines and Foliage Plants. For classified list showing what is best for various purposes, see page 83.

Annuals bloom the first year, and many of our most popular flowers come in this class-under favorable conditions a few varieties will continue to live longer than one season, but as a rule they perish, and in planting for permanent effects the perennial plants are generally selected, the annuals being used for the first one or two seasons until the perennials become established as all do not bloom the first year.

ASTERS—Oregon Grown Seed

STERS grow to perfection in our mild, cool climate and splendid strains of the best-known sorts have A Start grow to perfection in our mind, you have been developed by careful selection. As fall bloomers for garden or cut flowers, asters are most been developed by careful selection. As fall bloomers for garden or cut flowers, asters are most been developed by careful selection. satisfactory, and the varieties we offer being acclimated can be depended on for best results, rivaling the chrysanthemum in size and beauty. Asters require a rich, moist soil. Seed should be sown inside in March, and plants transplanted to the open ground when the weather is settled and warm. Plants In season-see Plant Dept.

"CREGO GIANT" ASTER .- The "Giant Crego" is distinct in every way, and its magnificent flowers, often 6 inches in diameter, are fully equal to chrysanthemums. They have rare beauty of form and brilliant coloring, are very vigorous, and free flowering; blooms are borne on long stems.

White, Shell Pink, Rose, Purple, Lavender Pkt., 15c; 1/8 oz., \$1.00

PACIFIC BEAUTY .- A rich true lavender, with big fluffy blooms on strong stems; free bloomer and great keeping qualities; originated in Ore-Pkt., 25c

GIANT CW. CRIMSON .- A new velvety crimson of branching habit, upright grower. Excellent for garden decoration and cutting. Shows up well under artificial light and presents a very attractive appearance for an unusually long period in the Fall. Pkt., 10c

ASTER-MUM .-- A selection from "Giant Comet." Of immense size, resembling Chrysanthemums in form, hence the name "Aster-mum." Plants are about two feet high with good stems. A little earlier than "Crego." Three colors.

White, Plnk, Lavender.

Pkt., 10c; three, one of each color, 25c
QUEEN OF THE MARKET.—Best early Aster,
of graceful spreading habit. Two weeks ahead of other varieties.

Rose, White, Dark Blue, Light Blue, Mixed, Pkt., 10c; 1/4 oz., 40c MIKADO" OR ROCHESTER.—Another new type of Aster of great merit. A favorite with florists. Has very long, narrow petals straight at the outside, but toward the center they cross and recross in splendid confusion, giving the bloom a heautiful, fluffy fullness. Mikado is very vigorous, with strong branching habit, producing a blossom on every shoot.

Lavender-Pink, Pkt., 15c; 1/8 oz., \$1.00

SEMPLE'S LATE BRANCHING .- A magnificent strain; flowers large, beautiful, double, and borne on long stems.

White, Rose, Shell Pink, Lavender, Purple, Pkt., 10c; 1/4 oz., 35c Mixed,

LAVENDER GEM .-- An exquisite shade of true lavender, of the comet type; free flowering erect habit; one of the finest yet produced. Pkt., 15c; 1/8 oz., \$1.00

DAYBREAK .- Flowers are full, large and round, borne freely on long stems. Color a dainty shell pink. Very early. Height, 18 inches.

Pkt., 10c; ½ oz., 75c
PURITY.—Same as "Daybreak," excepting color, which is a pure, glistening white.

Pkt., 15c; 1/8 oz., 75c GIANT COMET .- One of the handsomest of the

tall growing sorts; flowers large and beautiful; petals long and twisted. Blue, Light Blue, Rose, Crimson, Dark

Pkt., 10c; 1/4 oz., 50c White, Mixed,

ANNUAL FLOWER SEEDS—Continued

The New Single Wheel Hoe. of the No. 28 combined seeder and wheel hoe. Complete with attachments as illustrated. Weight packed 42 lbs. Price......\$9.00

No. 6 Planet Jr. Combined Hill and Drill Seeder, Wheel Hoe, Cultivator and Plow

What It Will Do .- It drops all garden seeds in hills and sows in drills, with the greatest regularity, in a narrow line, to any exact depth required, covers, rolls down and marks the next row, all at one passage. As a wheel hoe, it hoes, row, an at one passage. As a wheel noe, it noes, cultivates and plows all garden crops, completing a row at every passage, up to 16 inches in width. Price, Complete, \$18.50. Weight, packed, 64 lbs. As a Seeder Only, \$15.25. As a Wheel Hoe Only (No. 36), \$8.50.

No. 4 Planet Jr. Combined Hill and Drill Seeder, Wheel Hoe, Cultivator and Plow

This tool combines in a single convenient implement a capital hill-dropping seeder, a continuous row-seeder, single wheel hoe cultivator and garden plow. No. 4, Price, Complete, \$14.50. Weight, 53 ibs. As a Seeder Only, \$12.00. Holds 2 1/2 Quarts of Seed.

No. 25 Planet Jr. Combined Hill and Drill Seeder and Double Wheel Hoe, Cultivator and Plow. For Market Gardeners, larger capacity than No. 4. 2 ½ Quarts of Seed. Steel Frame.

Price, \$17.50. Weight, packed, 59 ibs.

No. 5 Planet Jr. Hill and Drill Seeder

16 1/2-inch steel wheel. Sheet steel hopper holding 5 quarts. Built on the same lines as No. 3 Drill, only larger.

Price, \$16.75. Weight, packed, 52 lbs.

No. 2 Planet Jr. Drill Seeder

It is similar to No. 1 Planet Jr., Combined Drill, but larger, holding twice as much seed. and having higher wheels and larger roller. Has no cultivating attachment

Price, \$10.25. Holds 3 Quarts. Weight, packed, 41 lbs.

No. 1 Planet Jr. Combined Drill Seeder, Wheel Hoe, Cultivator and Plow

The sowing cylinder is a drum of spring brass set between the driving wheels, with a sliding brass band and cam. In drum and band are corresponding diamond shaped discharge openings, quickly adjusted for any kind of seed. Inside the drum, shields cover the openings, and insure regular sowing with a full hopper or a thimbleful.

Holds 3 Pints of Seed. Weight, packed, 44 ibs. Price, with Tools as shown, \$12.75.

Planet Jr. Single Wheel Hoes

The handles are adjustable in height. he frame is steel, convenient and strong, with uick change device by which to exchange the ools without removing the nuts.

Nos. 16, 17, 17 1/2 and 18 wheels, frames and andles are alike, but the attachments sold with ach vary.

The hoes are the most valuable of all the wheel oe attachments; are oil tempered and polished. Jse the 4-inch for 6, 10 or 12-inch rows; the 6-inch or rows 12 inches and upwards.

lo. 16 Planet Jr. Single Wheel Hoe, Cultivator, Rake and Plow

The No. 16 has 15-inch steel wheel, steel frame, ne pair of 6-inch hoes, three cultivator teeth, one urge garden plow, a 4 and a 7-inch rake, one leaf uard. The plow hoes and cultivator teeth are oil empered. This complete equipment is suitable or every requirement and the Planet Jr. Wheel loes for 1916 rank as the highest type of their Price, \$8.00. Weight, 26 lbs.

The Piows are invaluable; use them with points together for opening furrows for manure, seed, etc.; then exchange sides for covering; use them also for plowing away from or toward the crop, both sides at once.

The cuitivating teeth for deep or shallow work, and for marking out.

Leaf lifters save time and enable fine work to be done close to the row without additional labor. when plants are large or leaves are flat on the ground.

No. 17 Planet Jr. Single Wheel Hoe

You can do more and better hoeing with it in one day than you can do in three days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work. Price, \$7.00. Wt., 23 ibs.

No. 17½ Planet Jr. Single Wheel Hoe
This tool is identical with No. 16, except in
equipment. The pair of 6-inch hoes, three cultivator teeth and leaf lifter which go with it, are all the finest of their kind. Price, \$6.25. Wt., 21 lbs.

No. 18 Single Wheel Hoe

This tool has one pair of 6-inch hoes only-the tools that are constantly useful throughout the season. Other tools can be added as needed. Price, \$5.30. Weight, 20 ibs.

No. 38 Planet Jr. Single Wheel Disc Hoe, Cultivator and Plow

This combination occupies the same position among Single Wheel Hoes as that taken by No. 14 Planet Jr. Double Wheel Disc Hoe among Doubles. Price, complete, \$9.50. Weight, packed, 28 lbs.

Planet Jr. Double Wheel Hoes

No. 11 Planet Jr. Double Wheel Hoe, Cultivator, Plow and Rake

No. 12 Double Wheel Hoe, Custivator and

This tool is identical with No. 11 Wheel Hoe. xcept that it has one pair plows, one pair hoes and wo pair cultivator teeth only, and is sold at a corespondingly less price. Price, \$10.00. Wt., 34 lbs.

The No. 11 is considered the best combined Double and Single Wheel Hoe made, having the largest assortment of useful tools and the frame being adjustable for any depth work. The attachments and their position can be changed in a few seconds. All edge tools are oil tempered—see attachments illustrated—can be used in narrow rows as a single wheel hoe-as a double wheel hoe the arch will straddle plants 20 inches high.

Weight, packed, 39 lbs. Price, with Attachments as in cut, \$12.25.

No. 13 Double Wheel Hoe

This tool is the No. 11, with 6-inch hoes, only, these being the tools that are most generally used. Any or all of the other tools shown with No. 11 may be added at any time.

Price, \$7.00. Weight, 29 lbs.

DOUBLE WHEEL HOES-Continued

No. 14 Planet Jr. Double Wheel Disc Hoe, Cultivator and Plow

This new tool will give excellent satisfaction, is especially pleasing to all who work peat lands. There are three oil tempered adjustable discs on each side.

The frame is steel.

The set of prong cultivator teeth are constructed on entirely new lines, and will be found invaluable in general cultivation.

The plows are the regular Planet, Jr., mold and are continually valuable for furrowing, covering and plowing.

Price, with Attachments, as in cut, \$11.00.

The Three Prong Cultivators are adjusted to rundeeper with the outside tooth protecting the plan roots and giving thorough tillage.

The NEW "PLANET JR." Catalog is the handsomest, best, and most instructive book ever issued on a similar subject. Full of little points that bring profit. Full of true and handsome illustrations. We mall it free to any address on application

Planet Jr. Horse-Hoes

No other cultivating machine is so widely known as the Planet Jr. Combined Horse Hoe and Cultivator, for it is in use throughout the civilized world. It is so strongly built as to witnstand incredible strain, yet it is light and easy to handle. It opens and closes furrows, hoes right up to the plants without danger of injuring, throws dirt to or from the row and throws back from center again.

No. 9 Planet Jr. Horse Hoe and Cultivator With Steel Wheel

Price, \$11.75. Weight, packed, 70 lbs. This admirable tool has a plain wheel instead of lever wheel. It has the high frame, patented hollow steel standard, patent lever Star wheel, patent lever expander, and hollow steel wheel arms.

No. 81. Price, \$11.75 With Steel Wheel Weight, packed, 90 lbs.

No. 81 Planet Jr. Horse Hoe, Cultivator and Hiller Combined

This is the latest and best tool of the kind. Has six 3-inch cultivator teeth, two 6-inch side plows, and a 12-inch furrowing tooth, making an admirable equipment for all widths of cultivation and for hilling crops up to four feet apart.

It has a cultivator tooth central in front, which increases the steadiness of the tool.

12-Tooth Harrow With Steel Wheel

Planet Jr. No. 90 Twelve-Tooth Harrow, Cultivator and Pulverizer

With the Twelve-Tooth Harrow you go as deep or shallow as you like, come up close to row without injuring plants, cut out all the weeds, stir the soil and mellow and fine it as with a garden rake. You widen and narrow as you please between 12 and 32 inches. It's a special favorite with strawberry growers, market gardeners and truckers.

Equipment:
Five 3x8-inch
cultivator
steels. Lever
expander.

The New No. 101 Cultivator

This machine is the "latest word" in design. The lever, instead of standing perpendicular. slants backward between the handles, free from danger of being bent or broken, and prevents injury to crops under cultivation. While the design is one of simplicity, it is very strong and most accurate in its work, and the tool has so few parts that there is no danger of its ever getting out of order.

Price, with wheel, \$8.25; without wheel, \$7.25.

IRON KING SEED DRILL-For Onion Growers

The Iron King Seed Drill is considered by many of the large alon growers of Oregon and Washington to be the most practical drills for sowing onion seed. It is a well made, durable and easy nning machine, accurate and reliable, and with

nning machine, accurate and reliable, and with treful use will last a lifetime. It will save the rice of the machine in sowing a few acres. If you growing onions you cannot afford to be without in. The Iron King can also be set to sow mything from turnips to peas. Price, \$9.25. feight Packed 58 lbs.

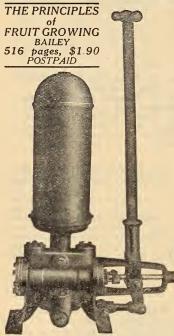

GOULD'S SPRAY PUMPS

We are General Agents for the Gould Sprayers, guaranteed to be the best built, most lasting and of the highest efficiency. They are the recognized standard.

Every grower of fruit, berries, or flowers should have a good spray pump of some kind, one suited to the work that is to be done. If you want to get the best results, you must spray and spray often. Re member, a person derives the same satisfaction from using a good spray pump that he does from using a good article of any other kind; so when you buy, get one of the following up-to-date and reliable outfits

ADMIRAL (Fig. 1608).

Gould's "ADMIRAL" Double Acting Sprayer

For Large Orchards, Parks, Groves, Etc.,--Very Powerful.

The "Admiral" is double acting and produces a steady stream at the nozzle, is built for continuous hard work and high pressure Especially designed for large orchards, and will meet every requirement. The brass cylinder lining is of heavy seamless tubing, with a cast bronze cylinder head, and can be easily removed, as shown in the engraving. This is an important feature, as the gritty nature of many of the spray mixtures has a tendency to cut the cylinder lining, and when it is badly worn it can be replaced at small cost. The valves are all brass, and each one in a separate valve box. They are easily reached by removing the bronze valve box covers. The brass piston rod is outside guided, making a perfectly straight thrust through the stuffing box, which is outside packed.

The removable malleable fron lever is long and powerful, and with the large air chamber a high pressure can be easily maintained. Suction can be taken from either side of the pump, and there are two discharge openings fitted for ½-inch hose. When ordered without hose or nozzle, both discharges have half couplings for ½-inch hose and a brass strainer.

This Sprayer is of sufficient capacity to supply, if necessary, four leads of hose, or two leads, each with two, three or four nozzles, and will be found fully as serviceable as a power sprayer for orchards not large enough to warrant the purchase of a power outfit.

This same pump fitted with a pitman in place of lever for connection to gasoline engine.

Outht A.—Pump only, with strainer and suction hose coupling \$30.00
Outht B.—Pump with 8 feet suction hose and strainer...... 32.75

Outht C.—Pump with 8 feet suction hose, two 25-foot leads best ½-inch hose, two 8-foot bamboo extensions, with

SPRAY PUMPS AND SPRAYERS - Continued

Monarch Two-Cylinder Spray Pump

Fig. 1506.—Monarch.—This pump has many advantages, and we believe it is the best of the large pumps. The main advantages are: First, the long lever, which can be shifted to pull or push, or to lift or drop, and can be changed by the operator any time he desires a relief; second, pump stands outside of the barrel, and all parts can be easily looked after; third, cylinders are perpendicular, and any grit will not lie against the plunger, to wear it or the packing out, as in the case with the horizontal cylinders; fourth, there are no valves in the plungers; the packing is on the outside, and can be tightened any time, without taking anything to pieces; fifth, the four brass valves (each one by itself and under a separate cap), can be reached by merely unscrewing the cap, and without disturbing the rest of the pump.

Outht A, pump only, Including strainer and hose connection, \$24.25

8-foot bamboo extension, Globe valve and nozzle..... For pressure gauge, add \$2.00.

Always empty remaining solution, and pump through some clean water after using. Clean thoroughly before putting away at end of season.

Never leave sprayers containing liquid where they will freeze; if the cylinders are iron they are apt to crack and if brass they will expand.

Spreads and Penetrates

An inexperienced or careless man can do a thorough job with Scalecide where he would fail to get a good distribution with Lime and Sulphur. Page 99.

We recommend the use of a pressure gauge on all large pumps, as it accurately tells the force of spray when delivered.

Gould's Pomona-Our Leading Barrel Pump

Flg. 1100.-"Pomona" Spray Pump has won for itself an enviable reputation. We unhesitatingly offer it as the best orchard spray pump for mounting in a barrel. It has great power and capacity. Briefly stated, other points of superiority are: No. leather packings, consequently no hardened and useless valves. All working parts bronze, including plunger, gland, valves, valve , etc. Plunger is outside packed. Valves are easily accessi-Air chamber is very large and of steel, free from imperfecstroke, three, four or five inches. The agitator, as shown in the cut, is operated by the stroke of the handle, so whenever any liquid is pumped it is thoroughly agitated. Pump is held securely by small anchor located at bottom of barrel, and by adjustable clamp plate at the top. New plate admits insertion or withdrawal from barrel without removing the agitator.

Outfit A.—Pump only...... \$15.00

Fig. 13. Caldwell Bands.

Doz., postpaid, 1/2-inch, 25c; 3/4-inch, 30c

Gem Hose Nozzle. One of the best for yard use. Weight 1 lb. Price, 40c

Fig. 25. Bamboo Extension. Has iron pipe inside of bamboo, threaded for nozzles and stopcock. Price, with stopcock (Fig. 54)—

Without stopcock deduct 60c

Fig. 54. Stopcock. Weight 1/2 lb. Price, 65c

Fig. 18. Hose Coupling. $2\frac{1}{2}$ -inch shank, for heavy pressure spraying.

For ½-inch hose, price, pair, 65c, postpaid

Hose Couplings, for garden hose, ½-inch or ¾-inch, complete. Price, 15c; postpaid, 25c

Hose Washers. ½-inch, rubber. Doz., 10c C. B. G. Lawn Sprinkler. Wt. 2 lbs. Price, 35c

Skinner Sprinkling System

SKINNER SYSTEM PORTABLE SPRINKLERS

LAWN MIST SPRINKLER—waters grass on really scientific principles—flower beds and borders too. The water falls as a fine soaking mist—as evenly as rain itself, yet so gently that it does not knock off the most delicate flower petals, and does not pack the ground. This time let's settle your lawn sprinkling troubles for good. Simple, durable, no moving parts, waters uniformly, distributes a fine mist, easily moved, built in sections which can be used singly or together.

LAWN MIST--Fifteen Foot Section waters twenty feet wide by eighteen feet. Price, \$9.85

PEACOCK--Twelve and a half foot Section waters sixty feet wide by fifteen feet, \$12.50

Flexible Connections between two Sections used together. LAWN MIST.... Each, \$1.25 PEACOCK......Each, 1.25

Portable Sprinklers on Stand
LAWN MIST JR. on stand instead of wheels.

12½ feet.

Price, \$6.00

BORDER AND SHRUBBERY SPRINKLER, lawn mist type watering on one side only. 15 feet. Price, \$11.25

PEACOCK JR. on stand instead of wheels. 8 feet. Price, \$7.00

BORDER SPRINKLER JR. on stand, a very popular sprinkler. 9 feet. Price, \$6.00

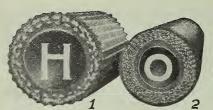

COMPLETE GARDEN SPRINKLING LINES

Single Sprinkling Line as shown above, but fitted with special quick acting couplings so that it can be easily put together or moved. Sold by the foot. Just the thing for a garden or flower garden. Complete, except posts to support it. Waters a strip 50 to 60 feet in width.

No. 3—Pomona

No. 4—Hood

For Spray Pumps and Gardens.

THIS season we are offering our customers a very complete and reliable line of spray and garden hose. We buy in very large quantities, direct from the manufacturers, which places us in a position to quote the following very low prices. Most of the brands we offer are manufactured especially for us, and can be obtained nowhere else

NOTE.—All our hose, excepting spray, is furnished in 50-foot lengths, and comes coupled ready for use. We will cut any of these hose in 25-foot lengths at an additional cost of 25c for couplings. We will cut ½-inch Pomona and Monarch Spray Hose in any length desired, at an extra cost of 65c for spray couplings in less than 50-foot lengths.

MONARCH SPRAY HOSE.—The Monarch, a new spray hose, is even a better grade than our well-known "Pomona." It is absolutely the best hose we can buy; the rubber is of exceptionally good quality and is very heavy; and we do not hesitate to recommend it to orchardmen, who must have a very high-grade and strong spray hose.

MONARCH SPECIAL SPRAY. - 1/2-incb

Pomona SPRAY HOSE.—Our well known Pomona is the best hose which can be bought at a moderate price. It has stood the test of time and hard usage, and has always proved good.

Price, ½-in., per it., 12½c
SUCTION HOSE.—This is an excellent grade of
suction hose, and is what we furnish with our
regular pump outfit.

Per ft., 3/-in., 27c; 1-in., 30c; 1 1/4-in., 35c

AJAX SPRAY HOSE .- 38-inch only.

Price, per ft., 10c
CORRUGATED GARDEN HOSE.—A new process, corrugated rubber hose, that will not kink
or break. Especially recommended for florists
and gardeners who use hose continuously.

Price, per ft., ½-in., 21c: ¾-in., 25c

"HOOD" GARDEN HOSE.—This is an excellent grade of garden hose. It is made with four heavy plies of canvas, and with good thick inside tubing. We have no hesitancy in recommending this for ordinary garden use.

Price, 1/2-in., per ft., 10c

ST. HELENS GARDEN HOSE.—This is a good grade of garden hose of moderate price, and where a hose of medium price is wanted it will give excellent satisfaction.

Price, 1/2-in., per ft., 8c

SPRAYING to be effective MUST BE WELL DONE-

"How to Spray—When to Spray—What Sprayer to Use" is a valuable and interesting book that tells all about sprays and sprayers. We will mall this book to you free on request.

SPRAYS, INSECTICIDES, POWDERS and WASHES

THE great improvement in Sulphur and Arsenate of Lead Sprays and methods of manufacture have not only reduced their cost and the risk and expense of preparing and using them but have also increased their efficiency, and it is now possible to secure a dependable and uniform product of a known strength that is easy to use and that will give profitable and satisfactory

SPRA-SULPHUR-Dry

SPRA-SULPHUR is a granular compound that quickly dissolves in cold or hot water-stays in solution-will not clog or cut nozzles and is a superior and efficient form of sulphur for destroying SAN JOSE and other SCALE INSECTS and all FUNGUS diseases that can be controlled in the dormant season, and as a SUMMER SPRAY for APPLE SCAB, APHIS LARVAE, MILDEW and other Fungus troubles. The lime in Lime-Sulphur causes the solution to quickly form a crust, on striking the tree or scale which arrests its action. Spra-Sulphur contains no lime. does not crust, but spreads and penetrates.

100 pounds equals a 600 pound barrel of Lime-Sulphur Solution Costs less and does better work, no leaky barrels, no waste, keeps indefinitely and you pay no freight on water.

SPRA-SULPHUR is packed in airtight, friction-top tins and should be kept tightly covered until ready to use, as it is so readily soluble that if exposed to the air it will attract sufficient moisture to dissolve it. But if kept sealed will keep indefinitely.

FOR WINTER SPRAYING when trees are dormant, use 10 pounds of SPRA-SULPHUR to 50 gallons of water. For control of Scale and Fungus diseases.

FOR SUMMER SPRAYING, when trees are in leaf, to control Apple Scab, Aphis Larvae, Mildew, etc., use 1 ½ pounds to 50 gallons of water.

When ARSENATE of LEAD is added for codling moth and all chewing insects make your sulphur solution first, then add Arsenate of Lead, "CORONA DRY POWDERED" ¾ of a pound to 50 gallons of solution. If paste form is used, 1½ pounds to 50 gallons is needed.

Prices: 1 pound 20 cents 5 pounds 75 cents 10 pounds \$1.25 25 pounds 2.50 50 pounds \$4.00 100 pounds 7.50

Spra-Sulphur is not as harmful to your skin nor as corrosive as lime-sulphur

Spra-Sulphur is manufactured in Oregon under the original patents (granted to Chas. E. Hite, filed in 1910 and recently reissued) covering the exclusive right to the use of all fixed alkalies such as soda ash (sodium carbonate) and all similar compounds, with sulphur in the manufacturing of strau materials.

Scalecide

The best miscible oil spray for San Jose scale and soft-bodied, sucking insects. Also contains a bowerful fungicide, which will control fungus diseases that are controllable in the dormant season.

This assertion is not based on a single test on ten or a dozen trees, but on actual work in great commercial orchards, where thousands of gallons of spray were used. "Scalecide" is a petroleum oil that mixes readily with cold water in any proporthat mixes readily with cold water in any proportion, and stays mixed. It is not necessary to use an extra tank or barrel, and no hot water should be used. Prepared by adding one gallon of "Scalecide" for every fifteen or twenty gallons of water, right into your spray tank. No crude oil is used in the manufacture of "Scalecide," all the light and heavy oils that might prove injurious being removed—but all of the soluble subjury is removed-but all of the soluble sulphur is retained; this has the insecticidal value. That "Scalecide" is a satisfactory and dependable remedy for San Jose Scale is attested by the records of some of the largest commercial orchards in the United States.

Free sample and full information on request.

PRICE per qt., 40c; gal., \$1.25; 5 gals., \$4.50; 10 gals., \$8.75; 50-gal. bbl., \$37.50.

Diamond Lime and Sulphur Solution

For San Jose Scale.

You can not afford to risk a cheap open kettle product. Be safe. Use the best.

Diamond Lime and Sulphur Solution is prepared in pressure tanks by steam, and is always uniform

and of the highest efficiency.

The "Lime and Sulphur" Solution for San Jose
Scale is endorsed by experimental stations and state horticultural societies of all the fruit-growing states as the standard preparation for exterminating

San Jose Scale on all deciduous trees.

Our Lime and Sulphur Solution tests 30 Baume Scale, is made of the purest and best quality of Sublimed Sulphur and of Lime, is a clear, deep cherry colored liquid, free from sediment, and is all ready to mix just as you get it. Merely add 11 gallons of water with each gallon of the Lime and Sulphur Solution. There is no sediment to clog the sprayers. No boiling to be done, which saves fuel, time, labor and annoyance. It is always alike and uniform in strength and results.

Price, 1 qt., 25c; 1 gal., 50c; 5 gals., \$1.65; 10 gals., \$3.20; 50-gal. bbl., \$8.50.

DRONA" Arsenate of Lead

Contains only ARSENIC and LEAD OXIDES. NO FILLERS

"CORONA" carries the highest possible percentage of arsenic oxide-33%-and is always uniform.

Mixes Quickly and Easily. Stays Mixed Longer and Sticks better to leaves, branches and fruit than Any Other Arsenate.

No sediment-No lumps-No waste-Never clogs nozzle

"CORONA" Dry Powdered Arsenate is a Light, Fluffy Powder that cannot freeze, dry out, cake or loose its strength—is always uniform and requires only I pound to 50 gallons of water. Efficient, Economical and Convenient. Highest Percentage of Killing Power.

PRICES: ½ lb. 25c; 1 lb. 40c; 5 lbs. \$1.75; 10 lbs. \$3.00; 25 lbs. \$6.75; 50 lbs. \$12.50; 100 lbs. \$24.50; 200 lbs. \$47.00

At HOOD RIVER—where the famous "Hood River Apples" grow The Apple Growers' Association have ordered their

Third Car of "CORONA ARSENATE of LEAD"

For the reason that Corona has given them better satisfaction than other arsenate preparations

= Lime-Sulphur Solution Combined With Arsenate of Lead for Summer Spray =

We have found in our experience that the combination of Lime-Sulphur solution with Arsenate of Lead for summer spray for apples and pears has given splendid satisfaction used in the following manner:

 ${f 50}$ gallons of Arsenate of Lead solution should be prepared and to this add $11\!\!/_2$ gallons of Lime-Sulphur solution, standard strength (30 degrees Baume). First application should be made when the calyx falls; the second when the apples are about the size of walnuts; third, during the month of August.

Preparation should be used as soon as mixed and not allowed to stand for any great length of time.

While some growers express a preference for special brands of Lead, in my experience any of the standard brands can be used according to the above method of application.
(Signed) J. E. STANSBERRY, State Inspector.

DIAMOND SPRA-OIL

SPRA-OIL is a miscible oil spray manufactured at Hood River, Ore., and has been used by the big commercial orchards in that section with the greatest success, especially in spraying for leaf roller.

As a WINTER SPRAY:

For San Jose Scale, Pear Scylla, Leaf Roller, Woolly Aphis, use one gallon of Spra-Oil to 15 or 16 gallons of water.

As a SUMMER SPRAY:

Very efficient for young San Jose Scale and certain Aphis, when diluted with 50 to 100 gallons of water to one gallon of Spra-Oil—depending on the foliage, which, if very tender, should be sprayed with a weaker solution than 1 to 50.

Directions for Diluting:

Shake and stir well while in the original package; after this, mix with one part of water to one part of Spra-Oil, which will readily emulsify to a creamy consistency. When this is thoroughly mixed, put it in the spray tank and it will stay in suspension.

Price, qt., 35c; gal., 90c; 5 gals., \$3.00; 10 gals., \$5.50; bbl., \$17.00

Tree Tanglefoot

For caterpillars, moths and worms. Protects against all climbing insects. One pound makes a band 9 feet long.

Price, 1 lb., 35c; 3 lbs., \$1.00; 10 lbs., \$3.00; 20 lbs., \$5.50.

Portland Seed Company's

APHISCIDE

Our Best Summer Spray for Roses

A clean, efficient spray for aphis, thrip, and kindred insects on plants of any kind. Specially fine for house plants, as it has no offensive odor and will not injure or stain the plants.

Price, qt., 25c; wt., 3 lbs., gal., 60c

Knoxweed

A single application of Knoxweed kills Plantain, Thistle or any Noxious Weed-Top and Root. Sold under a positive guarantee

Price, Dropper can, 50c; 1/2 gal., \$1.50; gal., \$2.50.

"CORONA DRY"

The Universal Insecticide

"CORONA DRY" is a chemically pure arsenate of lead, containing one-third arsenic—the most effective poison known for leaf eating insects—and is closely combined with the pure lead in such a way as to leave no free arsenic to burn foliage.

A safe, inexpensive, easily applied and efficient remedy for all chewing garden pests—and for use on fruit trees, berry bushes and plants that will insure perfect fruit and clean vegetables.

PRICE ½ lb. 1 lb. 5 lbs. 10 lbs. \$1.75 \$3.00

Also in 25, 50, 100 and 200 lb. pkgs.

"CORONA DRY" is best applied with the new CORONA HAND DUSTER, specially made for doing rapid and effective work over large areas of trees, vines, bushes and plants; but for small yards or gardens with no trees, a less expensive duster or powder gun will do the work.

CORONA SULPHUR-For use with Corona Arsenate

CORONA DUSTING SULPHUR is a highly refined pure sulphur reduced to an impalpable powder specially for dusting purposes. The use of this finely powdered sulphur in the summer season for fungus diseases of fruit and vegetables is equally as effective as Lime-Sulphur; is more easily applied and there are no harmful results as it is a pure, non-poisonous sulphur.

Price, ½ lb., 10c; 1 lb., 18c; 5 lbs., 75c; 10 lbs., \$1.20; 100 lbs., \$10.00

CORONA DRY AND CORONA DUSTING SULPHUR — Mixed in equal parts by measure, is a complete and satisfactory summer spray for insect pests and fungus diseases; more easily, quickly and effectively applied than other sprays, and is much more economical.

Write for the Corona booklet "Garden Pests and Their Control," of great value to all growers

Cut Worm Food

Use a teaspoonful to a plant or hill.

Cut worms are very fond of this special preparation which is eagerly eaten by them in preference to the plants. A careful test proved 95% of the applications effective on Melons, Cucumbers, Cabbage, Cauliflower, Squash, Tomato and Flowering Plants. Easily applied by sprinkling around the plants and will not injure them in any way.

Price, 1-lb. pkg., 25c

BLUE LABEL SLUG DESTROYER

Kills slugs and keeps them away from young plants. Not harmful to delicate foliage.

For Sweet Peas, Pansies and all garden truck sprinkle lightly on and aroundtheplant.

Price, 25c

DIAMOND QUALITY ROSES are large, sturdy, two-year-old, field-grown roses that will give you splendid flowers the first season. They are true to name and our list includes the best of the well known popular varieties, the most meritorious of recent novelties and the Gold Medal roses of famous European growers.

OUR ROSE ORDER entrusted to us will insure careful selection and no substitution. do not find what you want in this catalog write us. Our excellent connections with the great

centers of production enable us to supply any variety in commerce.

Abbreviations

T .- TEA-One of the best classes of roses, and truly ever blooming. They are hardy in this section, frequently wintering without any protection, although during our coolest weather and in cold sections they should be protected with a covering of fir boughs, straw or burlap.

H. P .- HYBRID PERPETUAL-The hardiest of all roses, vigorous in growth and easy of culture, producing large flowers, fine in form and

fragrance.

H. T .- HYBRID TEA-Most of these are as free flowering and as constant bloomers as the teas, and are hardier, but, as a rule, not so hardy as the H. P.'s. Many of our best roses are in this

Other abbreviations that are often used are: S.—Single; H. B.—Hybrid Briar; Wichurlana; N.— Noisette; Poly Poly. anthus; Pern.-Pernetiana; A. B.-Austrian Briar.

PLANTING AND CARE

In our favored section, roses attain a perfection seldom equaled, but you cannot expect them to thrive and bloom unless you care for them. We offer the following simple suggestions.

SOIL—Any good, well-drained garden soil, enriched with fertilizer, will give excellent results. If heavy clay soil mulch well with burnt earth and manure, rotted sod or leaf mold.

FERTILIZER-Our odorless fertilizer, Bone Meal, Tankage of Blood, will give excellent results and should always be applied after the plants start their growth.

WATERING-When setting out, water regularly until roots are well set; then about once a week unless the ground is very dry; in such cases more often. Do not get the foliage wet after a hot day. This causes mildew. FINALLY-Keep the surface well worked around the plants. This is as necessary as water or fertilizer. When planting cut back freely, and the bush will recover quickly.

SHIPPING-We always send all our two-year-old rose bushes charges collect by express or freight packing them so they will carry safely even though they should be on the road for two weeks or more.

If necessary, we can send small two-year-old bushes by mail at an additional cost of 7c each to cover postage, but in such cases we always prune the tops and roots ready for planting.

PRICES.—35c roses, \$3.00 doz.; 40c roses, \$4.00 doz.; 50c roses, \$5.00 doz.; 60c roses, \$6.00 doz., 75c roses, \$8.00 doz.; \$1.00 roses, \$10.00 doz.

OREGON GROWN ROSES Are ready for Fall delivery in October—Imported

Roses should reach us in late November and December. Most all stock offered for Fall delivery is budded 2-year Field Grown Roses, as many varieties do not give good results grown on their own roots. But for those who prefer "own root" Roses we can secure most varieties.

We offer a splendid assortment of popular roses and the best of the new ones, and can secure any variety in commerce, TRUE to NAME.

EW GOLD MEDAL COLLECTION for 1917

Magnificent new roses direct from famous Irish and European Producers, together with the best offerings of our American Growers. Many of the better known roses and some of the newer ones are grown in Oregon and dug and packed as ordered.

Young plants 20 cents each, except sorts marked \star which are supplied only in two-year-old.

PRINCESS MARY-(S.) A free blooming, sweet scented rose of deep crimson-scarlet with prominent yellow stamens. Buds long and pointed on stiff stems. Undoubtedly the largest and finest single rose yet produced Each, \$1.25 Each, \$1.25

*New Los Angeles

THIS grand new American Rose is offered as the most valuable and useful introduction of recent years. The foliage is a rich luxuriant glossy green, proof against mildew and fun-

gus attacks, the canes are strong. growth vigorous and each shoot bears a glorious, perfect rose of exquisite form and rare beauty of coloring, described by the originator as "a luminous flame pink toned with coral and shaded with translucent gold at the base of the petals."

The fragrance equals in intensity the finest Marechal Neil; the wonderful beauty and form of the buds, long pointed and lasting, and the fact that open flowers will keep for five or six days after cutting make "Los Angeles" a most valuable cut flower and decorative rose. The flowers are very large, petals of good substance, firm and lasting and the beauty of coloring does not fade, they are borne profusely from early summer until late autumn,

the strong shoots often attaining a growth of four or five feet. When the flowers are cut from these shoots the plants throw side shoots which flower freely, and under the most severe tests of weather "Los Angeles" maintains its healthy growth, vigor and blooming qualities. We urge you to give this grand new garden and exhibition rose a solution old field grown plants only.

Each, \$2.00 and exhibition rose a trial. Two-vear-

*OPHELIA See Cut Page 104

(H. T.) This wonderful new and delightful rose, with orange salmon buds, the gracefully reflexed petals, shading to dainty pink, the open flowers of great refinement and rare and lasting beauty need only be known to rank as a leader among our finest garden roses. The foliage is clean, dark and leathery-the growth vigorous and free, producing long canes, every one crowned with a perfect flower. Blooms early and continuously. "Ophelia" should have a place in every rose garden. Ea. 75c

NATIONAL EMBLEM—(H. T.) A most perfect garden and cut flower rose, having long pointed buds carried on strong wiry stems. Flowers are well formed, of beautiful dark crimson overlaid velvety crimson, shading to vermilion towards the edges. Foliage, glossy and not susceptible to mildew. Profuse bloomer and sweet scented. Each, \$1.25

OLD GOLD-(H. T.) A splendid garden rose of vivid reddish orange color with coppery red and coppery apricot shadings. Flowers are medium size and moderately full. Fine for Each, 60c bedding.

QUEEN MARY-(H. T.) Vigorous, free branching growth, a bedding and garden rose of great beauty and refinement, flowers medium size and fine form, color lemon chrome, bordered at the edge with pure, deep carmine; affording a most delightful contrast. Each, 75c

RED LETTER DAY-(H. T.) An exceedingly beautiful semi-double rose of velvety brilliant scarlet crimson. Flowers are medium size, curiously cactus-shaped and do not blue or burn. Its vigorous erect growth and free blooming qualities combined with the splended flowers make this one of the most attractive decorative and bedding roses yet produced.

Beautiful Roses of Recent Introduction

The following are the recent novelties and Gold Medal roses that have proven their merit and are now becoming generally in great demand.

Fine 2-year Dormant Plants 50c; \$5.00 per doz. unless otherwise priced. Young plants 20c each, except sorts marked * which are supplied only in 2-year-old.

BRITISH QUEEN-(H. T.) Pure white large, full flowers of exquisite form, opening freely in all weathers; promises to be one of the best white bedding and cutting. for

*COUNTESS OF SHAFTESBURY—(H. T.) A splendid new pink of the most ideal type of Hybrid Tea; flowers are large, perfect in form

and produced in the greatest profusion. color is a bright, silvery carmine, mottled and flushed shell pink, giving a picotee effect; a fine exhibition rose, being a Gold Medal winner.
UCHESS OF WELLINGTON—(H. P.)

tense saffron yellow stained with rich crimson which, as the flower develops, becomes deep coppery saffron yellow. Delightfully fragrant.

EDITH PART-(H. T.) Free branching growth, flowers of good substance; rich red with a suffusion of deep salmon and coppery yellow, fine garden and exhibition Rose.

EDWARD MAWLEY—(H. T.) Flowers large and full, of finest form, with beautiful, long pointed buds; color deep, rich, velvety crimson which does not fade; flowers keep well when cut.

GEORGE DICKSON - (H. T.) Very strong and vigorous, upright growth, flowers of the largest size; perfect in shape and unique in color, being a velvety blackish crimson, with the back of the petals heavily veined with pure crimson maroon. Delightfully scented. Each, 60c

LOUISE CATHERINE BRESLAU - (H. T.) Coral red, shaded chrome yellow, opening to a large full flower of shrimp pink, shaded coppery orange, free and constant

★JULIET — (H. B.) A magnificent new rose color being a wonderful combination of old gold on the outside of petals and a rich, rosy red on the inside. Flowers are large, full and delightfully scented. Foliage is luxuriant and beautiful.

LADY HILLINGDON—(T.) Deep apricot yellow, long and pointed bud, a fine forcing or garden rose, excellent for cutting. Flowers are of a good substance, very lasting and foliage hand-some and luxuriant. Lady Hillingdon is considered the best decorative rose in its class.

LADY ALICE STANLEY-(H. T.) This grand new gold medal rose is large, very full and of splendid substance; petals shell shaped, pointed giving perfect form to the flowers, which are a lovely, deep coral, inside pale flesh; deliciously fraggrant and are very leaving fragrant and are very lasting. A free grower and a profuse and constant bloomer.

LYON — (Pernetiana.) Lyon is a beautiful shrimp pink with salmon and chrome yellow shadings. Large, coral red buds, beautifully formed; full, globular flowers of rare beauty; a continuous and free bloomer.

MELODY-(H. T.) Intense deep saffron yellow with primrose edges. Blooms are of medium very fragrant and freely produced. An excellent bedding and forcing variety.

MRS. AARON WARD-(T.) One of the most delightful roses of recent years in a color that catches the eye at once—a deep golden orange color shading out to lemon or creamy yellow at the edge of the petals.

*MRS. CHAS. E. ALLAN-(H. T.) A delightful garden rose of a delicate and novel coloring, opening a pale orange and changing to ochre as the flower opens. Buds are long, pointed, and flowers are full on good stems, flowers freely every shoot producing a bloom. A vigorous grower and one of the finest garden roses.

MADAME MELANIE SOUPERT -Splendid new orange yellow shaded pink; beautiful, long-pointed buds, large size, free blooming; a strong, upright grower; best of its color.

MARQUIS DE SINETY—(H. T.) Deep saffron yellow, flushed reddish copper. Flower large, beautiful dark foliage.

MRS. CORNWALLIS WEST—(H. T.) Growth very vigorous and erect, producing freely, large full flowers. Color, rosy shell pink changing to pure white with age. Fine for exhibition.

MRS. DAVID MCKEE-(H. T.) Creamy yellow, large, full, freely and continuously produced.

MRS. FOLEY HOBBS-(T.) A veritable giant among Tea Roses. Color, delicate ivory white, delicately tinged pink on edge of petals, deliciously scented; a great bedding rose. Each, 60c

*MRS. E. J. HOLLAND-(H. T.) Deep salmon rose, shading lighter as the flower expands, large, full, free blooming good garden and bedding rose.

★RAYON D'OR -- (Pern.) Flowers large, full, open freely. Buds long, pointed, of deep orange cadmium smeared claret, opening to a rich sunflower yellow, which does not fade. Foliage is deep, glossy green; and free from the attack of mildew. This splendid new rose is a cross between Melaine Soupert and Soliel D'Or.

SUNBURST—(H. T.) Flowers large, full and of most beautiful form, with long pointed buds, color a superb Cadmium yellow with orange yellow center. The foliage is a handsome bronze green; a vigorous grower and good both as a forcing and garden rose

Single Roses

2-vear-old plants only

AUSTRIAN COPPER-(A. B. Single) A beautiful single rose of the Austrian Briar class. bright reddish copper. Very striking.

Each, 50c

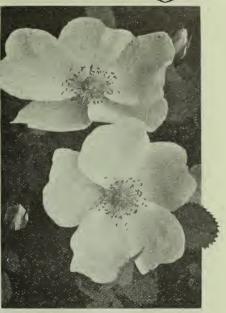

rish simplicity—(8.) Almost single, purewhite and of immense size. The great size and substance of the petals which are slightly cupped and the golden yellow anthers may readily bring to mind the comparison to a huge water lily. Vigorous grower with handsome deep green Each, 50c foliage.

IRISH FIREFLAME—(S.) A dainty new single rose, buds hold their shape a long time. Color, deep orange splashed crimson, changing to flery orange crimson, distinct and a valuable decor-Each, 60c

IRISH ELEGANCE-(S.) Large, single, golden bronze flowers of great beauty, free and constant bloomer, with deep bronze foliage; a fine buttonhole rose. These single roses make a charming garden display, blooming profusely, and are also splendid for exhibition. Each, 40c

make splendid and appropriate gifts for your garden loving friends. See Book List, pages 62-64.

Grand Garden Roses

These splendid free blooming Roses are newer varieties that are becoming more plentiful and can be offered at a very low price. In this list you will find many famous prize winners and some of the most beautiful and popular roses.

Price: Young Plants 20 cents each; 3 for 50 cents; Two-year-old Plants 40 cents each. unless otherwise priced.

DOROTHY PAGE ROBERTS-(H. T.) Coppery pink, suffused with apricot yellow, very free and perpetual, a delightful garden rose.

FARBEN KOENIGIN—(H. T.) Imperial pink, reverse of petals carmine, very free and perpetual, good bedding rose.

HARRY KIRK-(H. T.) A splendid rose of deep sulphur-yellow color passing to a lighter shade at the edge of petals. Buds long and elegant. Blooms freely and continuously; is of robust growth and free branching habit.

HEINRICH MUNCH-(H. P.) "Pink Frau Karl Druschki." Color, soft pink, very large and full

JONKHEER J. L. MOCK-(H. T.) A magnificent and unique rose. Inside of petals red, outside silvery blush white. Of fine form, good substance and largest size. A strong, rapid grower.

JOSEPH HILL-(H. T.) Salmon pink shaded Outside petals yellow suffused copper, a large, free blooming rose of elegant form.

KILLARNEY QUEEN - A sport from the well known Killarney but a much more robust grower, producing fine, large, nice formed buds of a deep rich rose color, lightened towards edge of petals. Very strong growing, remarkably strong canes of great length. A fine garden rose.

LADY ROBERTS-(T.) Rich apricot, base of petals coppery red, edges of petals shaded orange, bud long and pointed; very beautiful.

LE PROGRESS—(H. T.) Nankeen yellow, opening to saffron yellow; large, full and cupped. opening freely; a grand rose, always in flower.

MILADY—A splendid forcing and garden rose, producing large, well-formed flowers, carried on stiff erect stems. Color is a beautiful red, closely resembling "Richmond", but is more vigorous in growth.

MILDRED GRANT—(H. P.) Delicate pale pink, shading to silvery white in center; grand giant variety of rare beauty; perfectly formed, pointed

buds; full flowers of fine substance.

MRS. DAVID JARDINE—(H. T.) Delightful shade of bright, rosy pink, shading in outer petals

to salmon pink; large, highly perfumed.

MADAME PHILLIPPE RIVOIRE — Beautiful apricot yellow and Nankeen yellow center, reverse of petals carmine; large, full and globular.

MAD. RAVARY—(H. T.) Beautiful clear orange yellow. Long pointed buds; flowers of fine form.

WILLIAM A. RICHARDSON-Color, rich coppery yellow, flushed with carmine; a very beautiful variety, having few equals.

THE POPULAR RAMBLER ROSES

The Rambler Roses are strong, vigorous climbers, growing ten to twelve feet high in one season, bear immense clusters of beautiful, fragrant flowers. They

Price: Young plants, 15c each; 4 sorts for 50c; two-year-old plants, 35c each

FLOWER OF FAIRFIELD-Ever-blooming crimson rambler, brilliant crimson, base of petals white, a great improvement over the old type.

PHILADELPHIA RAMBLER-Animproved type of the favorite Crimson Rambler; color, deeper, more brilliant and lasting; much earlier than the old type; vigorous, luxuriant foliage, not so susceptible to mildew.

VEILCHENBLAU (Blue Rambler)-A seedling from Orimson Rambler with semi-double flowers produced in very large trusses. The flowers first open pink, but quickly change to a violet, or

steel blue.

DOROTHY PERKINS-Polyanthus type; color a beautiful bright shell pink; flowers large, very double; petals prettily crinkled; blooms in large clusters of 30 to 40; a splendid keeper.

RED DOROTHY PERKINS-In this grand new sort we have a fine crimson rambler, but with the glossy green foliage of Dorothy Perkins, therefore never troubled with mildew. Flowers very double, in immense lasting clusters.

TAUSENDSCHON-A lovely shade of soft pink, free blooming; a vigorous climber with splendid

foliage

YELLOW RAMBLER-Same type and growth as Crimson Rambler, except for color, which is a pure, bright yellow.

LADY GAY—Cherry pink, fading to softer tones.

Closely resembles Dorothy Perkins although flowers are slightly larger.

WHITE DOROTHY—As its name indicates, it is a sport from Dorothy Perkins, possessing all the fine qualities of that grand variety, but having pure, snow white flowers.

Moss Roses

These old fashioned Roses are coming into favor and we offer the following as best of their colors. Price, each 35c; dozen \$3.00

BLANCHE MOREAU-Flowers pure white, large, sweetly perfumed. Best white Moss Rose.

CHAPEAU DE NAPOLEON-Splendid rich red. best of its color.

CRESTED MOSS-Bright rose, light edging, well mossed

EUGENE GUINOISSEAU-Beautiful dark red.

GLOIRE OF MOSSES-Bright pink flowers, delightfully fragrant. One of the most popular mosses.

SALET—Color, lovely satin rose; very full and of great beauty; one of the best.

"How to Grow Roses"

A little book for Rose lovers

Free on Request

Standard, or Tree Roses

PRICE: Tree or Standard Roses, \$1.00 to \$1.50 each, according to size of head.

Tree roses are budded, or grafted on hardy rose stocks about four feet high. They soon make good sized heads, forming a small tree; especially desirable for planting as single specimens, in backgrounds or rows along walks or driveways.

Order any color or varlety you wish and we will send it or give you as good a substitute as possible. We aim to have the following var-

ieties in stock:

Foster Rose Tubes

For Rosarians and Cut Flower Exhibitors

FOR SHOWING ROSES

The Foster Exhibition tubes with adjustable clips, enable you to transfer flowers from one position to another without disturbing their arrangement. A wire holds the flower firmly in any desired position. Tubes afford an ample supply of water close to the rose. Used at all English shows.

Price, each, 25c; doz., \$2.75

NOTE.—At above prices we will pack the pots carefully, but buyer must pay freight or express charges. We buy in carload lots and the wholesale trade, florists and nurserymen, are requested to send for special prices, stating number wanted.

Ornamental Climbing Vines

Clematis

Clematis is one of the most beautiful and useful climbers, the several varieties adapting themselves to every requirement. Their magnificent flowers, borne in great profusion in beautiful shades of lavenders, purples, reds and white, make them especially attractive. Clematis requires a rich loamy soil, but manure should not touch the roots. Cut out the weak and surplus branches in the spring, and tie the vine up well to its support. We offer the best of the hardy large flowering varieties.

DUCHESS OF EDINBURGH .- Double, white.

LAWSONIANA .- Light blue.

VILLE DE LYON.-Red.

RAMONA.-Beautiful lavender, best of its color. MONTANA .- White, anemone-like flowers, May to July; very hardy, rapid grower.

HENRYI.—Fine, large, creamy white flowers; a strong grower and very hardy.

ACKMANII.-Intense violet purple, with a rich velvety appearance; distinctly veined. The most popular and finest Clematis we have.

MAD. ED. ANDRE .- A beautiful new variety; flowers red, large and abundant.

Choice plants of above sorts, each, 60c Large plants, each, 75c to \$1.00, postpaid

CLEMATIS PANICULATA .- A strong, rapid and vigorous grower; it produces sheets of medium-sized, pure white flowers of the most pleasing fragrance; it is perfectly hardy and well adapted for covering trellises or fences. Choice plants, each, 35c to 40c; large, 50c

to 60c.

Honeysuckle

BELGIAN.—Flowers yellow, blotched with red above; blooms all summer, fragrant. Each, 50c

JAPANESE.—Evergreen; fragrant flowers, white changing to yellow. Each. 35c

HALL'S .- Evergreen, very popular; white turning to yellow. Each, 50c

Jasmine

JASMINE NUDIFLORUM.—Branches drooping, enveloped with bright yellow flowers before leaves appear.

GARDENIA FLOWERED, CAPE JASMINE.-Free-blooming, pure white flowers, star shaped; foliage delicate; evergreen. Each, 50c

English Ivy

Large, thick, shining, leathery leaves; evergreen. Each, 25c

"Diamond" Fancy Lawn Mixture

Growing tests have proved our "Diamond Quality" Lawn Grass to give satisfactory and permanent results, being specially prepared for our Western soils and climate, and will produce an evergreen velvety turf; it is free from chaff and foul seeds, weighing 23 pounds to the measured bushel. This is a guarantee of clean, plump seeds, as cheap chaff seed is very light.

Price, per lb., postpaid, 45c; freight or express, not prepaid, per lb., 35c; 10 lbs., \$3.25 Sow one pound to 400 square feet, 10 to 15 pounds to a 50-foot lot.

field test

before they are offered for sale.

THE SELECTION OF DAHLIAS only those varieties of known merit should be considered. The great Dahlia Specialists of Europe and America have set a high standard, established by their years of comparative trials and you will have greater satisfaction and better values from their tested varieties which we offer, and which have been officially recognized, than you can possibly obtain from untried varieties of doubtful origin.

OUR TRIALS ARE VERY EXTENSIVE and are conducted by a practical Dahlia expert of wide experience. All tests are made in the field without irrigation and the Dahlias we list represent the "survival of the fittest," the best of the standard varieties and meritorious novelties of the most famous producers. varieties that are recognized the world over. They are true to name, erect bloomers and good keepers.

Group of Cactus Dahlias

IT IS IMPORTANT that your Dahlias be recognized varieties and true to name. If not, you cannot hope to exhibit them successfully.

CULTURE

AHLIAS will grow to perfection in any good garden soil, preferably one that contains a little sand. Plant as soon as the frost is gone and the ground warm, cutting the tuber to a single strong eye, and placing it on its side at a depth of about 6 inches, in ground that has been previously well cultivated. An excellent way to start Dahlias is to sprout the tubers in a green house and set out the rooted plants. These are generally believed to give more and better flowers, but is more trouble than planting the bulbs. Rows should be four feet apart, plants is inches to 3 feet apart in the row, depending on whether planted for a hedge or for specimen plants. Cultivate thoroughly until ready to bloom, then deep tillage must cease and only the surface be lightly stirred, as deep cultivation at this time is fatal to blooming. Tall varieties should be staked.

If you use commercial fertilizer, do not apply until the plant starts growth, then work it into the top soil, 5 or 6 inches from the plant. Bone meal is an excellent fertilizer for Dahlias but must be applied early, as it is slow in action. When the plant is well up, say 6 to 10 inches, pinch off the top, leaving 2 or 3 joints. This will cause it to branch out into a more sturdy, bushy growth. Water freely.

REMEMBER WE CAN SUPPLY ANY VARIETY IN COMMERCE, GROWING MANY THAT WE DO NOT LIST. IF WE DO NOT have what you want, we can get it for you, true to name.

FINEST CACTUS DAHLIAS

FROM comparative tests in the field we have selected the following as being the best of their types and color. This list contains many of the newest Dahlias as well as the best of the older ones.

The two splendid new Dahlias, "Kalif" and "Garibaldi," should be in every collection.

Each, 20c WHITE ASTER .- ("Guiding Star.") graceful, pure white flower with tips of petals cleft, giving a fringed effect. Ench. 20c

GLADIOLI

E ACH SEASON adds to the list of magnificent, new and improved Gladioli, and the great beauty and attractiveness of Their exquisite coloring, vigor, ease of cultivation and freedom from insect pests and diseases are making them universal favorites that should have a place in every garden. They grow to perfection in any good garden soil, requiring little moisture, and come into bloom at a season when there are few other flowers. Once planted, they can be increased rapidly.

CULTURE .- Gladioli may be planted as early as the ground can be worked or as late as June. A sunny situation is preferred. Plant to a depth of 3 to 6 inches, depending on the size of the bulb. Largest bulbs are not always best, as some varieties do not produce large bulbs. Any garden soil will give satisfactory results, but if well enriched, cultivated and freely watered when bulbs first show, Gladioli will amply repay you for this additional care. If cut when the first bud opens and put in water, the flowers will open perfectly, keep for many days,

and the coloring is richer, and more delicate, than if left

to open on the plant.

12 Beautiful New Gladioli

SPECIAL (for trial).-Entire Collection, 12 Bulbs, \$1.60, postpaid.

EUROPA .- Snow white without a trace of color or shading, the most sensational flower of its class ever produced. Special awards at every European show where exhibited. A grand flower of great beauty and sub-Each, 20c; doz., \$2.00

CANNAS

WE are extensive growers of Cannas, and the following sorts are newer and better types that will give best results in our climate. Cannas require a rich, moist soil and should not be planted until all danger of frost is past. They are quick growers and the new flowering sorts bloom continuously until frost. Inexpensive, these charming ornamental plants produce rich tropical effects that cannot be excelled, and the grand new varieties offered are equally valuable for the beauty of their bloom. Let us know your requirements. We can supply the correct variety.

- Prices, except where noted: Bulbs or plants in season, each, 20c; dozen, \$2.00, postpald.
- ALICE ROOSEVELT.—Deep crimson, compact green foliage; similar and superior to Alphonse Bouvier. Height 4 to 5 feet.
- CARL LUTZ.—New. A splendid bright rich yellow of finest form; foliage leathery and luxuriant. A fine upright grower and profuse bloomer. Height, 3 ½ feet.
- DR. NANSEN.—Dwarf yellow Canna with green foliage. Used extensively for bordering larger beds, its height being about two and one-half feet.
- **FEURMEER.**—A magnificent clear bright red, flowers and spikes of large size and freely produced; foliage deep green. Height, about 5 feet. One of the very finest reds.
- FIREBIRD.—New. Considered the best redflowered, green-leaved Canna. Flowers are flery, bright red, borne in immense trusses. Very effective when planted in large beds, tubs or singlespecimens. Height 4ft. Each, 75c; doz., \$8.00
- FLORENCE VAUGHAN.—We offer a new seedling of this most famous canna that is a distinct improvement in growth, vigor and bloom; the color and markings are about the same only more brilliant and beautiful; a deep, bright yellow mottled and marked with bright red. Green foliage. Height, 4 to 5 feet.
- GUSTAV GUMPPER.—A rich, clear golden yellow—best of its color—of splendid form and habit—the large flowers are freely borne and are well above the foliage. Height, 3 to 4 feet.
- HUNGARIA.—A beautiful soft rose pink—flowers in large trusses, early, freely, continuously one of the most refined and attractive cannas ever introduced. Height, 3 ½ feet.
- KING HUMBERT.—The mammoth flowers, in heavy trusses, are a brilliant orange-scarlet, with bright red markings, foliage is broad and massive and of a rich coppery bronze with brownish green markings; 5 to 6 feet.
- LOUISIANA. Foliage luxuriant, green-edged bronze. Flowers brilliant scarlet. One of the grandest, most attractive and satisfactory of the Giant Orchid flowering Cannas. Height, 6 to 7 ft

- METEOR.—Considered one of the best reds, being a deep dazzling crimson. Exceptionally free bloomer. Green foliage. Five feet,
- MRS. ALFRED F. CONARD.—Flowers are a superb salmon pink of large size borne very freely and continuously on large, erect spikes; very luxuriant green foliage; height about 4 feet.
- MT. BLANC.—A compact vigorous grower, producing a massive spike of large, pure white flowers carried well above the glossy green foliage.
- OLYMPIC.—A new color effect in Cannas, being a rich oriental red with center flamed a lighter shade and dappled carmine. The individual flowers are of largest size and produced in immense clusters. Height 5 feet.
- PORTLAND.—New.—A magnificent "Testout" pink with salmon suffusion. The luxuriant green foliage and profusion of large shapely flowers together with its vigor and hardiness make "Portland" the most attractive and useful Canna for the Northwest. Portland is a cross between Mrs. Alfred Conard and Venus and was named in honor of our City by the originator.

 Each, 25c; Dox., \$2.56
- STUTTGARTIA.—The large flowers are brilliant orange-scarlet with bright yellow band and markings. Flower spikes strong and erect above the foliage which is broad leaved, dark green and very luxuriant. Height 4 to 5 feet.
- WABASH.—Sometimes called the "Bronze leaved Rosea Gigantea." The immense carmine-pink flowers combined with the deep purple-brown foliage makes this an especially attractive variety. Height 4 feet.
- WINTZER'S COLOSSAL. This is without doubt the largest flowering Canna, the blooms measuring 8 inches across. The flowers are an intense vivid scarlet of the orchid flowering type, retaining their brilliancy under the hot sun. Foliage green. Height 5 to 6 feet.

Each, 25c; doz., \$2.50

Perennial Border and Bedding Plants

A select list of Border and Bedding plants, beautiful and useful varieties that are easily grown. Fine, large, well-rooted specimens that can be safely packed and promptly delivered in perfect condition. VARIEGATED .- Rich, creamy markings, \$1.50 up

RUBBER PLANT

FICUS ELASTICA.—This is certainly one of the best plants grown for decorative purposes; it succeeds well with ordinary treatment.

Large plants, each, \$1.00 to \$1.50 up

Single Tuberous Begonia

BEGONIAS—Tuberous Rooted

FROM their early first blooming until cut down by frost, Tuberous Begonias display a mass of most gorgeous and brilliant coloring. They are distinct and unique, in wonderful shades of yellow bronze, white, reds, pinks, with thick waxy petals and grand ornamental foliage, never failing to excite the wonder and admiration of all who see them.

CULTURE.—The soil should be rich in leaf mould, or well-rotted manure, a little sand being beneficial. Start the bulbs inside in the early Spring, and transplant when danger of frost is past. They should be lifted in the fall before frost, dried and stored in sand in a cool place.

Place between layers of damp moss, not too wet, temperature about 70 degrees. This starts both top and roots; then pot for root development before planting outside.

Single Flowering

These are of immense size, free blooming and very lasting. Each, 10c; doz., 85c; 100, \$6.00

Double Flowering

Often as full and beautiful as a rose, some of the white varieties resembling giant carnations. Price, separate colors: Each, 15c; doz., \$1.50; 100, \$10.00

Single frilled, having heavy frill or fringe on edges of the petals. Each, 20c; doz., \$2.00; 100, \$15.00 OUR DIAMOND MIXTURE, containing all of above sorts. Per doz., \$1.50; 100, \$10.00

Water Lilies

THESE beautiful and interesting plants can be easily grown in tubs made by cutting a barrel in half and setting one or both halves deep in the ground, to within a few inches of the top. Put in good loam soil, with one-third old manure, or better still is the soil from a swamp or lowland, using one-third of old, well-rotted manure; cover soil with a layer of sand one to two inches deep, allowing for a depth of six inches of water.

Water Lilies like a mild temperature, and still water, and will not succeed where a fountain is playing or where there is a strong or cold inflow.

NYMPHAE — Hardy white. Single roots, 35c, postpaid; large roots, 75c to \$1.50, prepaid.

Parrots Feathers

Produces long trailing sprays of lovely green, finely cut foliage set in symmetrical whorls; plant in a water tight vase or hanging basket, keeping water standing over the surface. A beautiful thrifty growing, hardy plant. Try it.

Good roots, each, 25c; doz., \$2.50

QUEENS PERFECTION.—One of the finest of the creamy flesh whites, large, full and attractive.

Each, 40c

Paeony Moutan

Paeony Moutan

(Tree Paeony)

Grows about four feet high, forming a small tree-shaped shrub. When this plant becomes well established and is covered with dozens of massive blooms it presents a magnificent display. We have Crimson, Pink, Scarlet, Rose and Varlegated,

STRONG IMPORTED ROOTS, from January to May, by express at buyer's expense (too heavy to mail). Each. 75c

RIS are of such easy culture and rare beauty that every one should grow them. They make a magnificent display either in clumps or border, blooming profusely and increasing rapidly, and are rarely troubled by disease or pests.

They are perfectly hardy in the open ground, and contrary to popular belief, do not require more water than other plants, although a moist situation is preferred, but any good garden soil will grow them to perfection.

If planted in light soil, depress the beds a little below the surroundings. This helps to collect and hold the moisture. Plant Fall or early Spring.

Japanese Iris (Iris Kaempferi)

Japan Iris is the largest and most wonderful the Iris family, no flower of any kind surpassing rare beauty of form, brilliance and variety of loring, ranging from snow white through maroon, olet and deep blue; striped, variegated, veined d blended in the greatest profusion, producing ects that are truly marvelous and indescribable. ossoms early summer. SWEET POTATO PLANTS-OREGON GROWN-See Page 136

Flavoring and Medicinal Herbs—Plants

PEPPERMINT

Mentha piperita-Black stem.

This is the variety used for the production of the valuable essential oil of commerce.

PLANTS are propagated by root cuttings and can be set from February to May inclusive, depending upon the weather and soil conditions; can be harvested in August or September, and will give a full crop the first year. It is customary to plant one ton of roots to the acre in rows three feet apart. Cultivate the first year only. A 50 lb. This hardy variety is perensack of roots will plant 100 feet of row. nial and once planted will last for years.

Root cuttings are furnished for propagation at the following prices: 50-lb. trial sack, will grow a row 100 feet long \$ 2.00

f. o. b. Willamette Valley shipping point.

THYME.—Broad leaved, used in soup, stuffing and sauce.

Each, 25c; doz., \$2.50

SWEET MARJORAM .- The sweet aromatic leaves are used in either Each, 20c; doz., \$2.00 the green or dry state.

SAGE (Glant).-The leaves and tender tops are used in stuffings and sauce; also in the beverage known as Sage Tea. The Giant or Mammoth Sage is a greatly improved variety, more vigorous, having much larger leaves. Each, 15c; doz., \$1.50

CHIVE .- Has mild onion flavor, grows in grass-like clumps; much Each, 15c; doz., \$1.50 used for flavoring.

LAVENDER .- By distillation produces the well-known Lavender water, the flowers for perfuming wardrobes, etc.

Each, 25c; doz., \$2.50

ROSEMARY .- Infusions of the leaves are used in medicinal beverages. Produces an aromatic oil. Each, 25c; doz., \$2.50

An Oregon Field of Mint

RIVERSIDE GIANT RHUBARB is a cross between the California Wine Plant and Victoria Mammoth,—the famous private stock produced by Mr. A. R. Cummings of Canby, Oregon, that has been the leader in Portland and San Francisco markets for several seasons. Roots being offered for sale for the first time last season as heretofore Mr. Cummings has used all the stock for his own planting, but the market has grown to such an extent and the demand from growers for stock cannot be longer denied, so Mr. Cummings has arranged with us for the exclusive sale.

RIVERSIDE GIANT is unequaled for yield and quality, being crisp, tender, free from stringiness, with a good color and a delicious, distinctive flavor. The skin is so thin that it disappears in cooking. Riverside Giant has every good quality of a commercial rhubarb and is so vigorous and productive that over thirty-five tons per acre is a conservative estimate for the season. Cuttings begin in March and usually four are made, the last one in July. Four men in six hours have cut over five tons from less than one-half acre on the fourth cutting.

No other variety of rhubarb is known in the Portland or San Francisco markets that has the uniformity and fine coloring, the flavor, the freedom from coarseness and stringiness, that has made Riverside Giant the leader, and we know of no other variety that has been produced in a large commercial way successfully, Mr. Cummings being the only man that has ever shipped rhubarb in car lots to the San Francisco market, sending as many as three a month in season.

Two cars of Riverside Giant Rhubarb were shipped to The Dalles for drying, and on the test proved to be the best variety for that purpose, containing more substance and not having a tough skin.

RIVERSIDE GIANT is not only the most productive and profitable hardy rhubarb, but is also the best yielding and finest in quality when forced of all forcing varieties. Full instructions and information on forcing will be sent on request.

We have the exclusive sale of this wonderful rhubarb and offer root divisions from the original stock. Each root will make a thrifty plant if properly cared for.

PRICE—each, 15c; dozen, \$1.25; \$8.50 per hundred, prepaid. Special prices on large lots.

Root divisions must be made from young healthy stock, cuttings from old roots will give poor returns.

BURBANK CRIMSON WINTER RHUBARB

A widely-advertised, forcing variety of great value, the flavor and quality being superior to any other rhubarb. Comes on very early and lasts through a long season, hardy in some sections, but gives best results when protected. Must be propagated from root divisions, as it does not come true from seed. Root divisions, each, 15c; \$1.25 doz., postpaid; \$8.00 per 100. Root clumps, each, 50c; \$4.00 doz.

VICTORIA MAMMOTH--STANDARD HARDY VARIETY

ONE-YEAR-OLD ROOTS--Postpaid, 8c each; 75c per dozen. By express or freight, 50c per dozen; \$3.00 per 100. TWO-YEAR-OLD ROOTS--Postpaid, 15c each;

\$1.25 per dozen. By express or freight, 85c per dozen; \$6.00 per 100.

If wanted in larger quantities write for special prices.

A larger, heavier yielding variety than the Crimson Winter. Our stock is locally grown from root divisions only and will be found true and uniform. Does not run up as many seed stalks as the Crimson Winter and in our experience has proven better in every way.

WAGNER'S GIANT

Price: Root divisions, each, 15c; \$1.25 doz.; \$8.00 per hundred, prepaid.

Price: Root Clumps, each 50c; \$4.00 per doz.

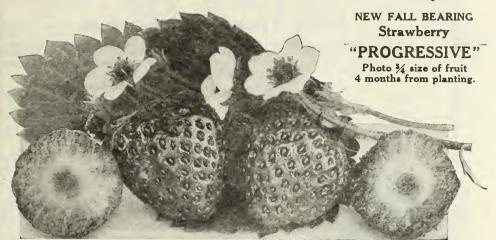

FULL INFORMATION and cultural directions for growing Riverside Giant Rhubarb in the open ground, and for forcing, will be sent to all interested. Every home garden should have a few plants of this wonderful new rhubarb.

"NEW OREGON" is an early and continuous bearer, being ready for marketing the first half of May in the Willamette Valley and holds up in size and quality throughout the season, which in some localities extends

until frost.

'I'he strawberries here offered have all stood the market test and you will be safe in selecting any one of them that will suit your conditions and requirements. They are the best varieties obtainable

Fall or Everbearing Strawberries

The new varieties of Fall bearing Strawberries, also known as "Everbearing," are very satisfactory for home gardens and under some conditions will prove profitable commercially, but require special care and attention to secure best results as the late fruit will be small and yield less if the first blossoms are not removed and the plants are allowed to fruit early and continuously. When properly grown they are of splendid quality and yield heavily until frost. We offer "Progressive" and "Superb," the most popular varieties.

Progressive

The berries are shapely, of a rich, red color, firm and of delicious flavor. Good keepers and Progressive will bear as early as most varieties, but blossoms should be cut back about 4 weeks before the berries are wanted. In our experience Progressive is the best of the "Everbearing" varieties.

Superb

Considered by some as being the best of the everbearing class, they are of large size and splendid appearance, and the quality is fully equal to that of the best of the standard sorts. Fall or Everbearing strawberries sell at a good price and are always in demand.

Per doz., 50c; 25 Plants, 75c; 100 plants, \$1.75, postpaid; Frt. or Express, \$1.35 per 100; \$3.00 per 250; \$10.00 per 1000.

Standard Varieties of Strawberries Gold Dollar-Extra Early Clark's Seedling

No early strawberry we have ever known

equals our special strain of "Gold Dollars."
Gold Dollar berries are large size, dark red all through, and have fine flavor. Foliage heavy, large and spreading, which protects the blooms from early frosts. Has a perfect bloom, and strong stems that hold the berries up from the ground, which helps to keep color and flavor during the early rainy season.

Gold Dollar Strawberries are the standard early berry in the big markets of the Northwest, and are always in demand. They are sure, heavy croppers, keep up their size throughout the season, and command the highest prices. They are the handsomest, most prolific early strawberry.

Wilson

An old standard variety; a heavy bearer of fine, moderate-sized berries; sharp acid flavor and the leading sort for canning.

The berry that has made Hood River famous; best shipper, berries large, firm and of delicious flavor; vines bear large crops; is especially adapted to dry soil.

Magoon

Originated near Portland; berry large, fine and of excellent sub-acid flavor; bears heavily throughout the season; especially adapted to Western Oregon and Washington.

Marshall

One of the best all-round strawberries; very large; dark crimson throughout; fine flavor; a fine market and table berry. Our stock of Marshalls has been carefully reselected and is a vigorous and prolific strain.

"DIAMOND BEE SUPPLIES FOR WESTERN BEE KEEPERS

WE ARE THE PIONEERS in the Bee Supply business in the Northwest, are thoroughly familiar with local conditions and requirements, and if you are new to the business or the country we can be of much help in saving you any unnecessary outlay. work or loss of time and can start you on the right road to success.

STOCKS ARE LARGE and complete and we can fill any size order on short notice and will give the small order just as careful attention as the larger one.

THE A. I. ROOT CO.'S HIVES AND SUPPLIES well-known the world over as the standard of excellence are always on hand for prompt delivery at lower prices than you can purchase them for direct, as we are agents for the Root Company and give our customers the advantage of car rates.

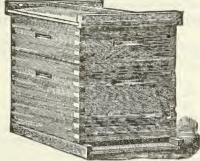

WESTERN PINE AND CEDAR HIVES made to our order in standard sizes and designs; of first-class material and workmanship, are very popular with local bee keepers. Our Western lumber is satisfactory and lasting and we recommend them as being economical and serviceable.

Portland Seed Co.'s Dovetailed Western Cedar Hives

These cedar hives are made especially for our Western trade. In construction they are the same as our pine hives, the only difference being that they are made of a superior quality of cedar, the best and most lasting wood for our Western climate. The sections and separators used in the supers are the regular No. 1 Eastern stock. Price and quality considered, these hives are splendid

For description of numbers, see those given for our pine hives at bottom of page.

P. S. Co.'s Dovetailed Western Pine Hives

This is our lowest priced hive and is the best value we can offer. It is standard size and well and carefully made of first-class lumber. The inside fixtures are just the same as in our regular pine hives, and the sections supplied are of the best grade of white Eastern basswood. For general description of the different numbers see corresponding numbers and descriptions under Eastern Pine Hives, bottom of page.

Root's Hive Combinations and How to Understand Them

To accommodate various localities and bee keepers of different preferences, we have a large number of different combinations, and each combination is indicated by a series of letters and figures. A glance at the following table showing the meaning of each letter or figure in alphabetical and numerical order will make all plain.

- Danzenbaker bottom.
- E. Excelsior cover.
- G. The gable cover.
- Super for Ideal plain sections, 35x5.
- M. Super 4x5 plain sections for the Danz, hive.
- Super equipped for plain 4 1/4 sections
- Rc. Metal roof, double cover.
- S. Super for 4 1/4 beeway sections.
- Super with section holders, separators of fences, but no sections or foundation.
- 4. Super with section holders, separators or fences, sections and foundation starters.
- Hive body or brood chamber, with frames and division board but no starters.
- Hive body or brood chamber with frames. division board, and foundation starters.

- Complete Hive Body with full sheets of foundation, without cover or bottom.
 - 8. Indicates hive with 8 brood frames.
 - 10. Indicates hive with 10 brood frames.

When the figures are doubled, it indicates that two of the articles are called for. For instance, 2-2P means two supers with plain section holders and fences.

If you desire a Danz bottom-board, Excelsior cover, 8-frame dovetailed hive with frames, foundation and super with section holders, 4 1/4 plain sections, fences and foundations, the number would stand thus: AE64P-8.

If you wish two supers, in place of the one you would add another figure 4, and the whole would read for 8-frame hive; or if you wanted this same combination without foundation or sections, the designation would be AE522P-8.

Improved Appliances of the A. I. Root Co.

DANZENBAKER HIVES .- These hives take the same Cover, Bottom Board and Super as the ten-frame dovetailed hive, but the Brood Chamber is more shallow, taking ten closed end Brood Frames 7½ inches deep and 17 inches long; each is supported by a pivot in the center of the end bars, a great improvement, as the frames can be reversed and filled out to the ends; it also prevents bees mashing in handling.

The Section Holder has the same kind of Pivot Support, and a fence separator is used. The Section is a plain 4x5x13/8, a size and shape that is very pleasing to the eye, and therefore a good seller. The arrangement in the super is such as to get perfect results in filling out the sections, and in no other hive are they so uniformly and attractively finished. While the Danz. Hive is more shallow than the standard Langstroth it has exactly the same Cubic Capacity as the eight-frame Dovetailed Hive. For prices see page 139.

Metal Roofed Double Cover Rc.

Consists of a % inch super cover, tin-bound, that should be supported a full bee-space above the sections; this is designated as c. The outside part of the cover is made of a solld sheet of lead coated

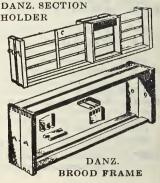

roofing tin folded at the corners around a frame that telescopes over the top of the hive making a weather proof cover that will not

blow off, warp or leak. This top is the R part of the combination cover listed and sold complete as Rc.

Add 25c per hive when Rc cover is ordered

The Danzenbaker Hive is Specially designed for the production of Fancy Comb Honey.

Showing Rc Cover

For Price of Rc Covers see page 139.

Section Honey Boxes

Our No. 1 Sections are made of the choicest white basswood lumber, and are all perfect in finish and free from defects. They are not all snow-white, but vary from that to a light cream color. Choice honey shows off to best advantage in a section not too white, as it is the honey rather than the wood that the consumer looks at. Wt., 6 ½ lbs. per 100. Root's No. 1, best white,

per 100, 80c; per 500, \$3.60; per 1000, \$6.90

Portland Seed Co.'s No. 1, per 100, 80c; per 500, \$3.40; per 1000, \$6.50

Our No. 2 Sections, selected from our best grade, sell at a price considerably less than our No. 1, and are correspondingly lower in quality. Most of them are equal to No. 1, except in color; some have dark spots, sawmarks, or other blemishes which exclude them from No. 1 grade. Wt., 6 ½ lbs. per 100.

Root's No. 2, second grade.

s. per 100. Root's No. 2, second grade, per 100, 75c; per 500, \$3.35; per 1000, \$6.40 P.S. Co.'s No.2. Wt.6 1/4 lbs. per 100,

per 100, 70c; per 500, \$3.15; per 1000, \$6.00

order any of the following sizes wanted. We nave 4 \(\frac{1}{3} \) \(\frac{1} \) \(\frac{1}{3} \) \(\fra

Different Styles of Sections.

Style 1 Beeway, commonly called closed-top.

Style 2 Beeway, open top and bottom.
This style is sent when no other is specified.

Style 3 Beeway, open three sides.

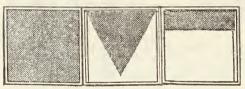

Style 5 M, 4x5x1% plain, no beeways.

For large quantities, other sizes, etc., write for special prices. If ordered by mail, allow 1c each for postage. Sample section, by mail, 1c each.

Comb Foundation

Full Sheet, Triangular and Quarter Sheet Method of Using Foundation.

There is little question but that it pays to use foundation in full sheets in the brood frames and sections, especially the latter. If you think you cannot afford so much you should at least have a strip for a starter. It will help much more than it costs you, in getting straight, even combs. You can use a starter any width from one inch up.

Our foundation is made by the "Weed process,"

Our foundation is made by the "Weed process," and is a very superior article. Packed in 1, 2, 3 and 5-lb. cardboard boxes in a case.

PRICES OF COMB FOUNDATION.

When you order, be sure to tell what grade you want, and give price.

"More MONEY from your COWS"

A Handbook for Cow Owners, describing the diseases that affect a cow's productivity and telling how to prevent and cure them in a single cow or a whole herd.

FREE on Request

KOW KURE is different from anything ever discovered for cow troubles. It is the only cow medicine that is strictly for cows only. It is not a stock food, but a specific remedy especially for cow diseases, such as Barrenness, Scours, Milk Fever, Caked Udder, Bloating, Red Water, Swelling of the Bag, etc. It prevents abortion and removes retained after-birth. It tones up the system, renews vitality, restores appetite to cows that are "off feed," and keeps them healthy. Makes poor cows good, good cows better, and makes more money for cow owners. It increases the milk flow, and enables the cows to produce strong, vigorous calves. It's the dairyman's gold mine, and a sure profit-payer.

Price, 50c, cans wt., 1 ¾ lbs., and \$1.00 cans, wt., 3 ½ lb.

AMERICAN DAIRY ASSOCIATION REMEDIES

BAG BALM .- A soothing, penetrating ointment for all affections of the bag.

25c boxes, wt., 1 lb.; 50c boxes, wt., 2 lbs.

Increases Milk So-Bos-So Protects Stock From the Torture of Flies

YOUR cows will give more milk-your horse do more work on less feed if protected by So-Bos-So at a cost of less than 1/2 cent a head per day.

Horses hitched or harnessed will stand quietly or work in comfort if protected by So-Bos-So, and many run-aways will be avoided. So-Bos-So is a boon to blacksmiths.

So-Bos-So is easily and quickly ap-

plied with a hand sprayer, cloth or sponge and is the only really efficient "fly bouncer" that we have ever seen.

Be sure to look for the trade-mark as there are many preparations offered that will prove disappointing.

Price So-Bos-So is sold in one gallon sealed tins only, weight 10 lbs., at \$1.25.

DAIRY SUPPLIES

700,000,000 is the value placed on Dairy Products in the U. S. for one year, and it is a matter of record that more money is made from dairy cows than from any other source of income on the farm.

CREAM SEPARATORS have made this possible by the great saving in time and labor, and the greater amount of butter fat secured, much of which is lost under the old method of hand skimming

BIG PROFITS are made from stock on the farm where a cream separator is used—the cream sold and the warm, wholesome skim milk fed to calves and pigs. Under the old system the expense of handling and hauling the milk used up the profits and left nothing for feeding.

KEEP COWS ON THE FARM-They are your most dependable and profitable source of income. Stock increases profitably. The manure is needed for the restoration of your cultivated land and if you own a Separator the dairy products will bring a steady income that means a good living and ready money for yourself and family.

WHEN YOU BUY A SEPARATOR you want the one that skims the closest, summer or winter; that will handle milk from "stripper" cows; that will produce cream of any desired density.

A durable machine that will give everlasting satisfaction and service, at the minimum cost of up-keep; a separator that is mechanically perfect, having the fewest parts, the greatest capacity for its size, the quickest, cleanest and easiest running,

The National IS THE ONLY SEPARATOR

that combines all the above and for 22 years has stood the test of time, maintaining its position against all competitors—and many of those first National Separators are in daily use after 20 years of service.

CLEANED IN THREE MINUTES

The superiority of the "National" Cream Separator is due to the marvelous one-piece skimming device, the famous Vortespoon. Just one cylinder-shaped piece of the finest German nickel steel, extremely light in weight and large enough for any woman to put her arm through.

A child can clean it in three minutes without risk of breaking or harming it. Just wipe off with a wet rag inside and out, and rinse in hot water and the job is done.

Capacity Governs Price of Separators

The National is not overrated, as is often the case with other separators (price being governed by capacity), but will make perfect separation of the amount of milk claimed under ordinary conditions and have ample reserve capacity. You can absolutely depend upon the National to handle perfectly the amounts listed for the various sizes. No separator that has to be crowded to handle its advertised capacity will skim perfectly.

PRICES OF NATIONAL SEPARATORS are the lowest of any high-grade separator and a better separator cannot be hought at any price.

The Exclusive Original Features of the National Separator are the inventions and property of the National Separator Company and cannot be duplicated or used by any other separator.

NATIONAL SEPARATOR—Continued

CENTRIFUGAL FORCE is the big factor in separating cream from milk, but centrifugal force alone is not sufficient and the aid of the wonderful Vortespoon is needed to give the proper amount of skimming surface—this combination gives ideal results. It should be specially noted that no mechanical contrivances are required between the Vortespoon and the feed tube, the globules of butter fat are, therefore, allowed to remain in a whole condition, the highest grade from which the finest butter is made, commanding the best prices. The National bowl, owing to the construction of the feed tube, flushes clean after using, not a particle of cream is lost, and is the simplest and easiest bowl to handle and clean.

The Marvelous Vortespoon

ONE SINGLE, SOLID PIECE OF GERMAN NICKEL STEEL DOES ALL THE SKIMMING

This wonderful invention belongs exclusively to the "National," and is the most efficient skimming device ever designed. It is made of the finest material, has no parts to wear out, is not easily damaged and can be cleaned in less than 3 minutes. The simple bowl parts here illustrated tell their own story of the great superiority of the National.

or shaft.

BOWL BEARINGS.—The upper bearing is a flexible, phosphor bronze bearing, encircled by a steel spring enabling the bowl to maintain its equilibrium without the slighest vibration to the machine. The lower bearing rests on a single ball-bearing, cushioned to prevent breaking of ball.

Inner Top Cone

The National Catalog

40 pages illustrated, gives complete and interesting facts about *National* Separators. We will gladly mail you a copy on request.

POULTRY SUPPLIES

Foods and Remedies

WE ARE PIONEERS in the POULTRY SUPPLY BUSINESS in the Northwest, and our Famous DIAMOND Poultry Foods and Supplies are the standards wherever known. This important part of our business is in the hands of trustworthy practical poultrymen-

men of experience, who are competent to confer with and advise you on any subject pertaining to

the raising of Poultry—a service that is free to you.

In the following pages we offer everything necessary for the successful production of Poultry and you can depend upon the supplies and appliances listed as being the standards in their line. Poultry and Eggs are always in big demand, and prices are good. Let us help you to get in line for your share of the profits.

"MANDY LEE" INCUBATORS

MANDY LEE INCUBATORS are guaranteed by the Manufacturer to hatch a larger percentage of big. healthy chicks that live than can be obtained from any other incubator, or even the mother hen—a strong guarantee, but one that is fully justified, for it is a well-known fact that "Mandy Lee" chicks are big, sturdy, healthy chicks of strong vitality that feather out quickly and grow rapidly.

"Mandy Lee" Incubators heat quickly, run evenly, regulate automatically, and do not depend upon the skill or experience of the operator, and are recognized as the best value in an incubator on the market today.

The New Automatic Regulator for Heat, Moisture and Ventilation. Di-rect ventilation of egg chamber if heat goes too high.

requirements. **EXCLUSIVE FEATURES** EGG LEVEL VENTILATION

"Mandy Lee" is built to automatically meet these

NURSERY TRAY .- Has a cloth bottom that can be turned up until the eighteenth day, thus cutting off the air space beneath the eggs.

HEAT BY RADIATION .- No smoke, gas or dry hot air from the lamp ever enter the egg chamber, the heat being equalized and applied by radiation from the heating tubes.

LEE HYGROMETER.-With every "Mandy Lee" the famous Lee Hygrometer is furnished for registering the moisture.

eWorld's Best

UILT up to a standard not down to a price. You'll find it in the plants of the biggest breeders in the country—

and you'll find it in the piano box coops of beginners just starting.

HE unprecedented success which has followed the Buckeye for 25 years is primarily due to the invention of the Buckeye hot-water system, without which that perfect balance between the temperature, moisture and ventilation which is so necessary to successful incubation, would be a physical impossibility. Heating the egg chamber without cooking all the moisture out of the air is responsible not only for the abundant supply of natural mois-ture but at the same time the soft, radiated heat from the hot water tank provides an absolutely uniform temperature and permits the perfect ventilation of the egg chamber.

We guarantee the temperature of every Buckeye we build to be uniform within a fraction of a degree at all times in the egg tray.

Requires no Artificial Moisture

Regardless of the conditions under which a "Buckeye" Incubator may be operated it NEVER requires ARTIFICIAL moisture. The word NEVER sounds pretty strong and yet we mean it in its full sense. A "Buckeye" NEVER requires

Simplicity of

Operation

artificial moisture. We have sent over four hundred thousand (400,000) of them to all quarters of the globe—to be operated under the same positive instructions—and have never found a single instance where applied moisture was required to produce a perfect hatch.

THE BUCKEYE SYSTEM of regulation is so

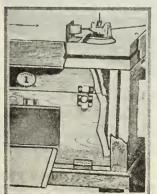

Regulation of perfectly adjusted that it works like a watch.
Temperature You set the regulator when the hatch is started

Purely Auto-matic--Needs and you never touch it until the next hatch. The solid, all-metal No Watching construction of the Buckeye thermostat is so positive and perfect in its action that a variation of more than 2 degrees is an absolute impossibility. We guarantee that.

Operated in any Temperature Regardless of Sudden Changes

Cold rooms or sudden changes in the temperature have no terror for the "Buckeye". Regardless of size or price we GUAR-

ANTEE every Buckeye to work satisfactorily in any temperature down to freezing.

Highest Type of Construction

automatic and requires no attention from the operator. Every item that enters into the construction of a Buckeye is, without exception, the best that money can buy. The lumber, the

the lamp and turning the eggs, everything is

No previous incubator ex-

perience is required to operate

a "Buckeye". Outside of filling

metal, the hardware, the lamp, the thermometer—every item without exception-the best.

The labor that builds the raw material into the finished product is the best that money can employ. Boys and unskilled labor are

unknown in the Buckeye factory.

A systematic inspection is made of every part of every incubator we build, and, as a consequence, we get less than one complaint from every ten thousand machines we sell. Perfect construction of a perfect design is the only thing that makes it possible for us to sell the Buckeye under such an absolute guarantee.

MANDY LEE BROODERS

The Only Brooders That Provide Natural Brooding Conditions DIRECT CONTACT HEAT

"Hovers 'Em like a Hen."

ETIL E DETAILS IN THE T IFIF ROOKS FREE to you

Showing portion of Hover. Lamp. Extension-Chimney, etc.

ADVANTAGES OF THE LEE BROODER

No lamp fumes or superheated air in the hover. Glass Front forming a comfortable exercising room for the little chicks, with similar space at back.

Opens up and cleans easily, an important feature.

All Cloth and Blankets are on wood strips, easily removable for cleaning or replacing,

Lamp Flame is always in plain sight, lamp easily removed. A Lamp Burner that does not heat and that successfully burns medium grade oils.

No. 1, or Regular "Mandy Lee"

Outside dimensions, 3x4 feet. It is as large as any 200-chick brooder on the market, but we call it only 100-chick size—50 chicks on each side of the hover. It will hold more, but it doesn't pay to crowd. Better have 50 healthy chicks in your brooder than 100 weak, sickly ones. The cost of a few brooders is insignificant as compared to the value of the season's hatch.

PRICE, complete, including Box Germozone, Drinking Fountain and Thermometer, \$15.00 LEE 60 CHICK BROODER—Heated

Lamp, heater, hover construction, cloth and metal parts, and width exactly the same as our "regular" brooder. Length of hover 30 inches; openings in swinging door covered with 60-mesh brass-wire cloth, and, when lowered either folds directly against hover opening or rests on flanged front of runway, making a rat and cat proof exercising space for the chicks. Weight packed 70 lbs. Price. \$6.50

LEE OUTDOOR BROODERS

OUTDOOR, HEATED and REGULATED BROODERS

Instead of the usual single floor we have a double floor 3x4 feet, the lower floor being directly on the ground where the chicks come in contact with mother earth even in most inclement weather. We have the Mandy Lee contact heat under a warm Blanket-a long, narrow hover with a curtain on both sides—just like our regular brooderjust like the old mother hen. The regulator is the same style as on the incubator. Capacity 100 to Weight 115 lbs.

Price, 4-foot size, \$20.00

NEW OUTDOOR FIRELESS No. 25

Has rain-proof top, glass front, large feeding compartment and removable board floor. A thoroughly practical and safe brooder. Size 2x4 feet, see cut Price, each, \$10.00

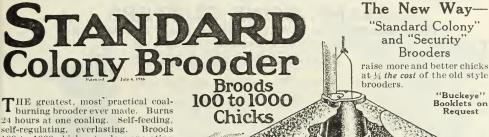

LEE FIRELESS BROODERS

"Mandy Lee" Fireless Brooders have double doors, adjustable hover, properly arranged ventilators, metal covered top and rain shield All parts are readily accessible for cleaning and airing.

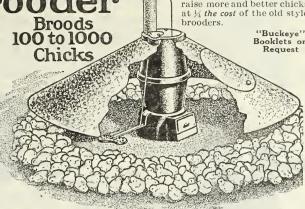

In two sizes

No. 8, for 100 chicks.....\$6.00 No. 10, for 200 chicks.....

THE greatest, most practical coalburning brooder ever made. Burns 24 hours at one coaling. Self-feeding, self-regulating, everlasting. Broods 100 to 1000 chicks at a low operating cost. Burns coal or briquettes. Used by over 10,000 big and little breeders. Grows Three Chicks Where One Grew Before. Cuts the Cost of Equipment to Less than Half.

It will do anything any other brooder will do—regardless of price—and do it better. It matters not whether you have ten or ten hundred chicks under a Standard Colony Brooder, the results are the same. You can remove part of the chicks or increase the number at any time.

AIR ALWAYS PURE AND FRESH. No dampers or valves of any kind between the smoke pipe and the fire, the draft being controlled automatically, an exclusive feature of the Standard Colony Brooder and the only coal-burning Brooder that is absolutely free from gases under the Hover.

OPERATED ANYWHERE. No room is too large or too small for a Standard Colony Brooder. Whether it is operated in the largest barn or the smallest colony house, the results will be the same.

BURNS ANY FUEL.—Hard or soft coal, charcoal, coke, briquets or gas. Hard coal is best simply because it is cleaner. All fuel should be nut size.

THE STANDARD COLONY BROODER is fire-proof, simple and requires little attention; has but one adjusting nut which you need never touch more than once in a season. Requires absolutely no more attention than filling with coal once a day, shaking down the ashes twice. These are caught in a pan and can be dumped; no shoveling.

NOTHING TO WEAR OUT—Nothing to break, being made of cast iron just like a kitchen range, and the Hover is of galvanized steel built to last a lifetime. The first cost is the only cost.

Price, f. o. b. Portland, \$19.50

"Security" Portable Brooder FIRE PROOF SAFE and Economical Broods 100 to 150 One size only SECURITY P plies and po little chicks. nothing to loo in 24 hours. downward to the foul air an the vent pipes gases under the It is fresh air the

Will maintain 100 degrees in any temperature down to freezing.

"SECURITY" BROODERS

SECURITY PORTABLE BROODERS are all that the name implies and possess every desirable qualification for the welfare of the little chicks. There is nothing to adjust, nothing to get out of order, nothing to look after but the lamp and that requires filling but once in 24 hours. The central heater with the overhead canopy sloping downward to the outside edges radiates the heat evenly and directs the foul air and impure gases into the upper chamber and out through the vent pipes. The moment the lamp is lighted, the impure air or gases under the Hover are drawn out.

It is fresh air that makes the chicks grow. The circulation is secured without draft. Four hundred and fifty square inches of curtain filter the air through four inches of outlet and keeps the pure air coming in all the time. Every particle of heat from the high power lamp is utilized on the interior of the brooder, heating the overhead canopy and throwing a soft, radiant heat toward the floor of the Brooder.

The SECURITY LAMP is not inclosed, making it absolutely safe, there being no possible chance of overheating. The lamp cannot reach a temperature higher than that under the Hover. The chicks never crowd but hover at the curtain just as they do in the Standard Colony Brooder, the Security being built on the same principle.

The "SECURITY" is built to last. Outside shell is 28 gauge galvanized steel; inside shell, 28 gauge black iron insulated with a 1-inch thickness of mineral wool. Is light, strong and can be operated in any place where the temperature is not below freezing point.

Price, f. o. b. Portland, \$13.50

MANN BONE CUTTERS

The Only Mill That Will Cut Green Bone and Not Clog.

 $\Gamma^{
m HE}$ Mann's Green Bone Cutter is offered to the poultry world on a warranty to produce a perfectly edlble poultry food, with no waste, from any lot of green bones, with less labor and less annoyance than any other bone cutter.

We send the Mann's to any responsible poultryman with this understanding; if you are not satisfied that it meets every claim we make for it, notify us, and we will give you instructions to return the machine, and will, upon receipt of same refund purchase price. Could you ask more?

The Mann's is the only machine which has a self-governing feed, producing

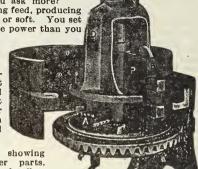

uniform pressure against the knife, whether the bone be hard or soft. the machine to suit your strength, and it never requires more power than you

Mann No. 5

Has four knives, large solid cylinder, and has the latest patent automatic governing spring feed which makes it one of the best low-priced bone cutters ever offered. We can furnish with crank, balance wheel, or mounted on iron stand. (See cut.)

Mechanism of the Mann's showing automatic force-feed, cylinder parts, etc. Mann's catalog gives all details.

Mann's No. 7

Fresh Cut BONE Is the FOOD that makes HENS LAY

Interesting Booklet BUGS and WORMS" FREE

The New No. 7 is mounted on a strong iron stand, and has patent automatic governing spring feed. Large, open-hinged cylinder, giving instant access to all working parts, has six knives, gear guard, anti-clog device, heavy balance wheel and other improvements. (See cut.)

Mann's No. 71/2

Adapted to run either by hand or power without any change. The particular advantage of the 7 1/2 is that while it is a complete power machine, it can be operated by hand just as easily as the No. 7. It is recommended even if you have no power at present, for should you get power in the near future, you need be at no further expense. It has all the improvements. It meets a long-felt want.

Mann's No. 9

About the same as No. 7, except that it has a larger cylinder and greater holding capacity, different design and larger table.

Mann's No. 11

The No. 11 is exactly the same as No. 9, with the power parts added. It has all the latest improvements. Capacity, 100 pounds per hour.

Mann's No. 12-Power

Strictly a power machine, and full of business from top to toe. Capacity, 120 to 150 pounds per hour. Horsepower required, one to two. Just the machine for marketmen, extensive breeders, or anyone who has large quantities of bone to cut.

Mann's Clover Cutter

Made entirely of Iron and steel; cannot warp or shrink. It cuts any kind of hay or clover, either dry or green, and more rapidly than any other make. Each revolution of the balance wheel produces twelve cuts. Do not buy a clover cutter until you have seen Mann's.

Price, \$10.50; mounted on Iron stand, \$12.00

Wilson's Mill No. 1

This is a practical mill, grinding all kinds of shell, crockery, grit, burnt or dry bone, feed, etc. Instantly adjusted to grind coarse or fine. Every poultry keeper should have one of these mills.

You will find them very convenient and serviceable. Weight, 33 pounds. Diameter of hand wheel, 20 inches.

Price, \$5.50

Mann's Cast Iron Mortar For breaking glass, crockery-

ware, oyster shells or other dry substances for poultry. Welght. 33 pounds: height, 12 Inches; 9 inches square; pestle 4 feet long.

Price, \$3.50

Wilson Mill No. O

A family grist mill in itself. Especially made for grinding flour, corn meal, spices, coffee, etc., for table use. It can also be adjusted for cracking grain. Capacity and size same as No. 1; hopper round. Weight, 30 pounds. Price, \$5.50

Mann's Corn Sheller

Best low-priced corn sheller made. A profitable tool If you have corn to shell. Weight 10 lbs.

Price. \$3.00

Bond's Grit Machine

Mann's

Mounted

Clover Cutter

Will break rock, limestone, ore, crockery, glass, dry clam and oyster shells, etc. A boy of seven can work lt. Drop the material in the top and work lever up and down quickly, but not with great pressure. Do not use green bone or wet oyster shells, but dry them. Weight, 25 pounds.

Price, \$4.00

A

Norwich Automatic Exerciser and Feeder

Every kernel of grain put into this feeder will go to your flock, not a single one will be wasted. Absolutely bird and rat proof. Rain or dampness cannot affect it. Saves its cost in 90 days by preventing waste, requires no attention except filling of hopper when empty. Adjustable for slow or fast feeding.

This is the most successful and practical automatic feeder ever invented; the slightest "peck" on the bait bar scattering the grain in the litter in a wide circle, where all the fowls have ample opportunity to "scratch for it," affording just the right amount of exercise. Keeps them busy all the time.

Guaranteed to improve the flock, increase the egg production and save feed. Descriptive pamphlet on request.

MADE OF HEAVY GALVANIZED IRON.

Each No. 1- 8 quarts..... \$3.00 3.75 4.75

CALMADE Straight Line Poultry Fence
The only fence made with less than one inch bottom mesh. Will not hang the chicks and chickens cannot climb it.

SPACING—Bottom, %; next, ¾; next two, ½; next six, 1 lnch; next eight, 2 ¼ lnches, making 29 inches of close mesh; the same in all widths. The top spacing is 31/2 inches.

Construction.

Straight line continuous weave. Line wires pull perfectly straight in stretching, taking up all slack in mesh wires, thus tightening same at the joints, permitting no sllp or play at the Intersection.

Will not unravel when cut. Requires no top or bottom il. Will not bag or sag. Rolls out like a carpet. rail. Built like a field fence. Is quickly and easily erected, perfectly uniform in weave. Conforms to uneven ground. Same width in center as at posts. Heavy selvage top and bottom. Costs no more than Ordinary Netting.

PRICES--Full 10-Rod Rolls.

EGG-O-HATCH and EGG-O-LATUM

DON'T GET THE TWO NAMES MIXED

Egg-o-hatch is a dry powder. It is mixed with water and the resulting liquid is applied to eggs two or three times during the 21 days of incubation. It is a liquid that does three things—supplies oxygen for the growing chick; absorbs carbon

dioxide given off; makes more brittle and porous the shell of the egg.

Price, 50c, postpald. Will treat 600 eggs.

Egg-o-latum is a white cerate. Rubbed over the shell of the egg it seals every pore so no air, moisœure, odors, or germs can get in. Preserves the egg in all its original freshness. The application of Egg-o-latum is easily and

quickly done. A dozen a minute and they will keep a year. Fresh eggs must be used, unfertile ones are best. One pkg. treats 50 doz. eggs. Price, 50c, postpald.

Thoroughbred Poultry and Eggs for Setting

Send us your orders for Poultry or Eggs, any breed or strain, and secure the advantage of expert, critical selection, that guarantees full value for your money. We do not depend on any one breeder, but can give you the pick of the prize-winning strains at right prices.

OUR SPECIAL POULTRY SUPPLY CATALOG lists everything necessary for the profitable production of poultry and contains valuable information on poultry diseases, care and treatment. We want everyone interested in poultry to have this catalog and the "Mandy Lee" Books. Free.

Portland Seed Co.'s "Diamond Quality" Poultry Foods

WE manufacture our Diamond Poultry Foods from W choice, clean, wholesome material, and they are the result of a lifetime of careful study and experiments by a thoroughly practical expert, who is a recognized authority on feeding.

Diamond Chick

Food

A Properly Balanced Ration that will make chicks grow and keep them healthy For Young Turkeys, Pheasants and all young fowls DIAMOND CHICK FOOD is unexcelled. The safest,

Our trade mark on every original package is your protection. Demand it of your dealer, as there are many dangerous substitutes.

The Making of Diamond Chick Food

The select grains that are used in the preparation of Diamond Chick Food are cut by a special process screened to a uniform size and run through a Fanning Mill to remove the dust and meal, which is the fatal element in most Chick Foods. After this process the ingredients are carefully weighed and mixed in correct proportions. No guess work.

By using Diamond Chick Food you are giving the chicks just what Nature intended they should have, a food composed of grains (cracked), small seeds, bone, dried sweet meat (to take the place of insects and bugs), charcoal, etc., mixed in the right proportions to produce a quick and profitable growth without loss. It's so convenient, so handy, always ready for use, and you can raise so many more chicks by feeding it that it is the cheapest food you can buy. A trial is all we ask.

Ask for descriptive pamphlet-Directions for feeding in each sack or package.

PRICE: 5 lbs., 25c: 12 lbs., 50c: 25 lbs., 95c: 50 lbs., \$1.70: 100 lbs., \$3.25

BERRY BOXES AND CRATES

or

TOP STITCHING the one-piece bottom makes the box open up perfectly. No loss from misfits and breakage as with the old style, and the bottom never drops out. Compare this new box with any box on the market. Prices on request. New-Machine Stapled Crate

THIS NEW STYLE STAPLED CRATE is made up on a special machine that centers the long staples uniformly, giving greater strength than can be obtained in a nailed crate. They never warp or pull apart and are the lightest

crate on the market, making a great saving to shippers. Prices and complete information on request.

Prices Right, Deliveries Prompt Let us supply you the splendid line of the Pacific Fruit Package Company

Parcel Post Rates

PARCEL POST RATES are based on DISTRICTS and ZONES. THE DISTRICT includes the office where mailed and the rural routes therefrom.

A DISTRICT RATE OF 5 CENTS for the first pound and 1 cent for each additional two pounds or fraction thereof up to 50 pounds (the district weight limit) is charged between points in this district.

THE 1ST ZONE covers a radius of 50 miles from the point of mailing; the rates are 5c for the first

pound and 1 cent for each additional pound or fraction thereof, up to the limit of 50 pounds. THE 2ND ZONE covers a radius of 150 miles, and the rate is 5c for the 1st pound and 1 cent for each additional pound or fraction thereof; weight limit of 50 pounds.

A WEIGHT LIMIT OF 20 POUNDS APPLIES TO THE 3rd, 4th, 5th, 6th, 7th and 8th zones. ZONE RATES increase with the distance—see table.

WHEN YOU ORDER FROM PORTLAND look for the Zone that corresponds to the distance you are away. Then note where the weight of your package is marked on the table of rates, on the same line under your ZONE will be shown the amount of postage to be added when ordering. We have catalogued the weight of most items mailable by parcel post, and by the aid of the table here shown you can always figure your postage.

SIZE AND WEIGHT.

A Parcel Post package may weigh from 4 ounces to 50 pounds for the first and second zones—with a 20 pound weight limit for third to eighth zones, and must not exceed in size 84 noches in length and girth combined.

Four ounces or less will be charged for at 1c per ounce or fraction thereof, except on Books, Seeds, Plants, Bulbs, etc., which are 1c for 2 ozs. up to 8 ozs. for any distance.

SEEDS, BOOKS, ETC.— Seeds, Plants and Books over 8 ozs. and other 4th Class matter over 4 ozs. are charged at pound rates, a fraction being charged as a full pound.
